MobileandSocialMediaJournalism share the latest industry trends and offer tips for teaching the topic **The Myth of Media Globalization** Kai Hafez, 2007-03-26 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates The Myth of Media Globalization will be essential and provocative reading for students and scholars alike

A New History of War Reporting Kevin Williams,2019-12-23 This book takes a fresh look at the history of war reporting to understand how new technology new ways of waging war and new media conditions are changing the role and work of today s war correspondent Focussing on the mechanics of war reporting and the logistical and institutional pressures on correspondents the book further examines the role of war propaganda accreditation and news management in shaping the evolution of the specialism Previously neglected conflicts and correspondents are reclaimed and wars considered as key moments in the history of war reporting such as the Crimean War 1854-56 and the Great War 1914-18 are re evaluated The use of objectivity as the yardstick by which to assess the performance of war correspondents is questioned The emphasis is instead placed on war as a messy business which confronts reporters and photographers with conditions that challenge the norms of professional practice References to the demise of the war correspondent have accompanied the growth of the specialism since the days of William Howard Russell the so called father of war reporting This highlights the fragile nature of this sub genre of journalism and emphasises that continuity as much as change characterises the work of the war correspondent A thematically organised historically rich introduction this book is ideal for students of journalism media and communication

The Anthropocene Working Group and the Global Debate Around a New Geological Epoch Martin Bohle,Boris Holzer,Leslie Sklair,Fabienne Will,2025-03-03 This book examines the role of the Anthropocene Working Group AWG in public and scholarly discussions of the meaning of the Anthropocene proposal The status of the Anthropocene both as a geoscientific concept and as a cultural concept becoming increasingly familiar in the public sphere has been highly controversial While geoscientists focus on possible geological markers and periodisation the social sciences environmental humanities and creative arts have taken up the Anthropocene as a cultural concept to make

sense of the planetary environmental crisis and contemporary society This book documents intra inter and transdisciplinary debates particularly although not limited to how different scholarly disciplines have responded to the Anthropocene proposal The authors analyse how the AWG has become the focal point of a debate that straddles the boundaries between academic disciplines and public perceptions of science The AWG thus serves as a case of the globalisation of science in terms of the global interconnectedness of scientific disciplines and the cultural significance of the Anthropocene proposal
