Progress Reports Carl Edwin Wood,Edward Phillip Barrett,P. R. Porath,1940    Progress in Physics, vol. 2/2005 Dmitri Rabounski ,Florentin Smarandache, Larissa Borissova, Progress in Physics has been created for publications on advanced studies in theoretical and experimental physics including related themes from mathematics    Nuclear Science Abstracts ,1974    **Scientific and Technical Aerospace Reports** ,1989    **On Beyond Uranium** Sigurd Hofmann,2018-10-08 In the early nineteenth century chemists knew of the existence of ninety two chemical elements from Hydrogen to Uranium For nearly forty years scientists thought they knew the content of our planet and all of its contents In the late 1930s the world of chemical science began to discover elements beyond Uranium the transuranics These new super heavy elements are probably not found in nature at all but can be detected if only for a few fractions of a second in precisely designed experiments using powerful nuclear tools On Beyond Uranium Journey to the End of the Periodic Table is full of exciting new concepts and tells the story of the author s quest to discover elements never before known to man    *Review of Progress in Quantitative Nondestructive Evaluation* Donald O. Thompson,2013-11-11 This volume Parts A and B contains the edited papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at the University of California San Diego La Jolla CA on August 1 5 1988 The Review was organized by the Center for NDE at Iowa State University and the Ames Laboratory of the U S Department of Energy in cooperation with the Air Force Materials Laboratory the Office of Basic Energy Sciences USDOE the Office of Naval Research the NASA Langley Research Center and The Metallurgical Society TMS Yith a total of over 450 participants from the US and nine foreign countries who presented a record 325 papers this conference has grown into the largest most significant gathering of NDE researchers and engineers anywhere in the Yest The meeting was divided into 36 sessions with as many as four sessions running concurrently All stages of NDE development from basic research investigations to early engineering applications and all methods of inspection science from ultrasonics to x ray tomography were covered Following a pattern now familiar to regular attendees of the Review and readers of the Proceedings the editors have organized the papers in the Proceedings according to topical subject headings rather than the original order of presentation This rearrangement yields a more user friendly reference work Part A of the Proceedings treats NDE technique development whereas Part B is organized around the theme of materials
