Representaciones De Arquitectura En La Arqueologia De America:

Las Representaciones de arquitectura en la arqueología de América: Mesoamérica Daniel Schávelzon,1982

Las representaciones de arquitectura en la arqueología de America ,1982 Métrica en arquitectura Constanza Mónica Suárez Jiménez,2008 Made to Order Cynthia Conides,2018-10-18 The ancient city of Teotihuacan North America's first metropolis flourished for nearly eight centuries in central Mexico until its demise in 650 C E Known primarily for its massive architecture and monumental wall paintings the city and its dazzling artwork inspired awe in its time and continues to do so today Made to Order the first systematic study of more than 150 painted portable artworks produced in Teotihuacan offers a unique deeply informed perspective on the cultural practices and artistic techniques of the largest urban community in pre Hispanic Mesoamerica The painted vessels Cynthia Conides considers featured here in finely reproduced full color photographs constitute nearly the entire body of material now available for analysis With attention to their origins and provenance wherever possible the author views these objects from a range of vantage points using ceramic chronologies to measure the changing characteristics and cultural significance of pictorial paintings on portable media Her approach ranging from stylistic analysis and narrative theory to theoretical perspectives on artistic exchange among artisans living and working in a thriving urban setting reveals the importance of such objects to a city where social status and the acquisition and display of its symbols were paramount This perspective is in turn grounded in new interpretations of the religious social and ritual contexts in which the objects functioned The most complete analysis of both ceramics from excavations at Teotihuacan and those held in museum collections worldwide Made to Order will become a standard source for specialists and students of pre Columbian visual culture and archaeology and a vital resource for those interested in cross cultural ceramic studies *Function and Meaning in Classic Maya Architecture* Stephen D. Houston,1998 These articles mark a significant stage in the study of Maya architecture and the society that built it They represent advances in our understandings of the past point toward avenues for further studies and note the distance yet to travel in fully appreciating and understanding this ancient American culture and its material remains **Urban Images of the Hispanic World, 1493-1793** Richard L. Kagan,Fernando Marias,Fernando Marías Franco,2000-01-01 This fascinating book examines the particular importance of cities in Spanish and Hispanic American culture as well as the different meanings that artists and cartographers invested in their depiction of New and Old World cities and towns Kagan maintains that cities are both built human structures and human communities and that representations of the urban form reflect both points of view He discusses the peculiar character of Spain's empire of towns the history and development of the cityscape as an independent artistic genre both in Europe and the Americas the interaction between European and native mapping traditions differences between European maps of urban America and those produced by local residents whether native or creole and the urban iconography of four different New World towns Lavishly illustrated with a variety of maps pictures and plans many

reproduced here for the first time this interdisciplinary study will be of interest to general readers and to specialists in art history cartography history urbanism and related fields **El realismo circular** Alessandra Russo,2005 **Bibliographie Internationale D'anthropologie Sociale Et Culturelle** International Committee for Social Science Information and Documentation,1986-11-20 First published in 1986 Routledge is an imprint of Taylor Francis an informa company

Ideología y política a través de materiales, imágenes y símbolos María Elena Ruiz Gallut,2002 *Images from the Underworld* Andrea J. Stone,2010-07-05 An in depth look at Maya cave painting from Preconquest times to the Colonial period plus a complete visual catalog of the cave art of Naj Tunich In 1979 a Kekchi Maya Indian accidentally discovered the entrance to Naj Tunich a deep cave in the Maya Mountains of El Peten Guatemala One of the world s few deep caves that contain rock art Naj Tunich features figural images and hieroglyphic inscriptions that have helped to revolutionize our understanding of ancient Maya art and ritual In this book Andrea Stone takes a comprehensive look at Maya cave painting from Preconquest times to the Colonial period After surveying Mesoamerican cave and rock painting sites and discussing all twenty five known painted caves in the Maya area she focuses extensively on Naj Tunich Her text analyzes the images and inscriptions while photographs and line drawings provide a complete visual catalog of the cave art some of which has been subsequently destroyed by vandals This important new body of images and texts enlarges our understanding of the Maya view of sacred landscape and the role of caves in ritual It will be important reading for all students of the Maya as well as for others interested in cave art and in human relationships with the natural environment Not only an extraordinarily detailed and insightful analysis of the painted representations and texts found in Naj Tunich but also a complete survey of all known Maya painted caves A major monograph on a major Maya site For completeness of presentation for clarity of writing and for depth and scope of analysis *Images from the Underworld* is a model of what a final report should be Journal of Anthropological Research *The Teotihuacan Trinity* Annabeth Headrick,2013-03-15 Northeast of modern day Mexico City stand the remnants of one of the world s largest preindustrial cities Teotihuacan Monumental in scale Teotihuacan is organized along a three mile long thoroughfare the Avenue of the Dead that leads up to the massive Pyramid of the Moon Lining the avenue are numerous plazas and temples which indicate that the city once housed a large population that engaged in complex rituals and ceremonies Although scholars have studied Teotihuacan for over a century the precise nature of its religious and political life has remained unclear in part because no one has yet deciphered the glyphs that may explain much about the city s organization and belief systems In this groundbreaking book Annabeth Headrick analyzes Teotihuacan s art and architecture in the light of archaeological data and Mesoamerican ethnography to propose a new model for the city s social and political organization Challenging the view that Teotihuacan was a peaceful city in which disparate groups united in an ideology of solidarity Headrick instead identifies three social groups that competed for political power rulers kin based groups led by influential lineage heads and military orders that each had their own animal insignia Her findings provide the

most complete evidence to date that Teotihuacan had powerful rulers who allied with the military to maintain their authority in the face of challenges by the lineage heads Headrick's analysis also underscores the importance of warfare in Teotihuacan society and clarifies significant aspects of its ritual life including shamanism and an annual tree raising ceremony that commemorated the Mesoamerican creation story **Ancient Mesoamerican Warfare** Kathryn M. Brown, Travis W.

Stanton, 2003-10-07 The understanding of warfare in ancient Mesoamerica has blossomed in recent years In this volume the authors use recent empirical studies to help us understand the patterns and nature of Mesoamerican warfare Using evidence from ceramics settlement pattern epigraphy ethnohistory and ethnography these projects define the martial nature of Mesoamerican societies and link it to ritual political economy and other cultural systems The studies range from preclassic to post contact and from Belize to Central Mexico A comparison between this corpus and warfare studies in the American Southwest is also included This volume will be of interest to Mesoamericanists and other archaeologists anthropologists and historians of ancient warfare **Exploring the Mesoamerican Subterranean Realm** James E. Brady, Cristina

Verdugo, 2025-09-01 Exploring the Mesoamerican Subterranean Realm brings together recent work and interpretations on the use of underground cavities by Mesoamerica's pre-Columbian cultures demonstrating their invaluable cultural purpose Case studies from across the region investigate the ways in which these highly charged points in the sacred landscape were the focus of countless political and religious activities The volume expands the study of caves to focus on the broader realm of subterranean space introducing the concept of the constructed subterranean a space in which the Maya deliberately created sacred landmarks through excavation Chapters critically examine chultuns previously thought to be subterranean storage chambers and sascaberas previously considered mines demonstrating that the traditional archaeological models are deeply flawed A wealth of data on both features is used to envision a new sacred landscape filled with thousands of subterranean sacred landmarks Natural caves are also examined a survey conducted around the ancient site of Yaxchilan considers the obvious importance of large stalagmites set up in the site core as monuments Long distance pilgrimages to these caves fundamentally reevaluates the nature of pilgrimage and reveals an economic and political importance that structured settlement and activities around the pilgrimage sites Finally evidence is analyzed to show that the human bones recovered from Midnight Terror Cave Belize were the result of human sacrifice Dealing equally with the archaeology of both natural and constructed subterranean spaces Exploring the Mesoamerican Subterranean Realm challenges preconceived notions of these spaces and their meanings dramatically shifting the field's focus and extending the understanding of the critical importance of this dark side of archaeology **The Ch'ol Maya of Chiapas** Karen Bassie-Sweet, 2015-04-08 The Ch'ol Maya who live in the western Mexican state of Chiapas are direct descendants of the Maya of the Classic period Exploring their history and culture volume editor Karen Bassie Sweet and the other authors assembled here uncover clear continuity between contemporary Maya rituals and beliefs and their ancient counterparts With evocative and thoughtful essays by

leading scholars of Maya culture The Ch ol Maya of Chiapas the first collection to focus fully on the Ch ol Maya takes readers deep into ancient caves and reveals new dimensions of Ch ol cosmology In contemporary Ch ol culture the contributors find a wealth of historical material that they then interweave with archaeological data to yield surprising and illuminating insights The colonial and twentieth century descendants of the Postclassic period Ch ol and Lacandon Ch ol for instance provide a window on the history and conquest of the early Maya Several authors examine Early Classic paintings in the Ch ol ritual cave known as Jolja that document ancient cave ceremonies not unlike Ch ol rituals performed today such as petitioning a cave dwelling mountain spirit for health rain and abundant harvests Other essays investigate deities identified with caves mountains lightning and meteors to trace the continuity of ancient Maya beliefs through the centuries in particular the ancient origin of contemporary rituals centering on the Ch ol mountain deity Don Juan An appendix containing three Ch ol folktales and their English translations rounds out the volume Charting paths literal and figurative to earlier trade routes pre Columbian sites and ancient rituals and beliefs The Ch ol Maya of Chiapas opens a fresh richly informed perspective on Maya culture as it has evolved and endured over the ages
