includes leading research collections speech anthologies critical studies and biographies Given the large number of
contributors the entries are remarkably even in coverage and clarity On the whole the editors have achieved a sensible
balance among mainstream political leaders religious orators and spokesmen and spokeswomen for a variety of historical and

might have included it deserves high marks Scrupulously edited superbly produced and splendidly bound it will be the

 and Disorders,2012-12-06 Information analysis centers were developed to help the scientist and practitioner cope with the
 ever increasing mass of published and unpublished information in a specific field Their establishment resulted from a further
 extension of those pressures that had brought about the formation of the specialized primary journal and the abstracting
 services at the turn of the century The information analysis center concept was greatly advanced by the 1963 report of the
 President s Science Advisory Committee Panel on Science Information This report stated scientific interpreters who can
 collect relevant data review a field and distill information in a manner that goes to the heart of a technical situation are more
 help to the overburdened specialist than is a mere pile of relevant docu ments Such specialized information centers are
 operated in closest possible contact with working scientists in the field These centers not only furnish information about
 ongoing research and dis seminate and retrieve information but also create new information and develop new methods of
 infor mation analysis synthesis and dissemination The continually expanding biomedical literature produced by scientists
 from the world s laboratories research centers and medical centers led the National Institute of Neurological Diseases and
 Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information
 The Centers are designed to bring under control and to promote ready access to important segments of the literature
