Genes, Women, Equality Mary Briody Mahowald, 1999-10-14 Genetics is not gender neutral in its impact Mahowald cites a wide range of biological and psychosocial examples that reveal its different impact on men and women especially with regard to reproduction and caregiving She examines the extent to which these differences are associated with gender injustice arguing for positions that reduce inequality between the sexes The critical perspective Mahowald brings to this analysis is an egalitarian interpretation of feminism that demands attention to inequalities arising from racism ethnocentrism ableism and classism as well as sexism Eschewing a notion of equality as sameness Mahowald defines equality as attribution of the same value to different objects Gender justice she claims imputes the same value to men and women despite their differences It can only be maximized by practical efforts to equalize the burdens and benefits associated with genetics The topics considered include participation in research allocation of genetic services cultural difference sex selection misattributed paternity prenatal and

preimplantation diagnosis carrier testing genetic interventions genetic disabilities preferences for genetic ties to offspring  
 genetic susceptibility to late onset disorders behavioral genetics genetic discrimination in employment and insurance and  
 human cloning Cases both real and concocted are used to illustrate the questions addressed     **Ourselves Unborn** Sara

 EPILOGUE FETAL MEANINGS NOTES BIBLIOGRAPHY     **Responsibility, Law and the Family** Jo Bridgeman, Craig  
 Lind, 2016-04-08 Focusing on moral social and legal responsibilities as opposed to rights or obligations this volume explores  
 the concept of responsibility in family life law and practice Divided into four parts the study considers the nature of family  
 responsibility constructions of children s responsibilities shifting conceptions of family responsibilities and family  
 responsibility and the law The collection brings together leading experts from the disciplines of sociology socio legal studies  
 and law to discuss responsibilities prior to birth responsibilities for children as well as responsibilities of children and of the  
 state towards family members The volume informs and challenges the developing conceptualization of responsibilities which  
 arise in interdependent intimate and caring relationships and their legal regulation It will be of great interest to researchers  
 and practitioners working in this complex field     **The Impossibility of Motherhood** Patrice DiQuinzio, 1999-09-13 An  
 adequate analysis of experiences and situations specific to women especially mothering requires consideration of women s  
 difference A focus on women s difference however jeopardizes feminism s claims of women s equal individualist subjectivity  
 and risks recuperating the inequality and oppression of women especially the view that all women should be mothers want to  
 be mothers and are most happy being mothers This book considers how thinkers including Simone de Beauvoir Julia Kristeva  
 Nancy Choderow and Adrienne Rich struggle to negotiate this dilemma of difference in analyzing mothering encompassing  
 the paradoxes concerning embodiment gender and representation they encounter Patrice Di Quinzio shows that mothering  
 has been and will continue to be an intractable problem for feminist theory itself and suggests the political usefulness of an  
 explicitly paradoxical politics of mothering     *The Ethics of Care* Virginia Held, 2006 The author assesses the ethics of care  
 as a promising alternative to the familiar moral theories that serve so inadequately to guide our lives Held examines what we  
 mean by care and focuses on caring relationships She also looks at the potential of care for dealing with social issues and  
 global problems     **Principles of Health Care Ethics** Richard Edmund Ashcroft, Angus Dawson, Heather Draper, John  
 McMillan, 2015-08-12 Edited by four leading members of the new generation of medical and healthcare ethicists working in  
 the UK respected worldwide for their work in medical ethics Principles of Health Care Ethics Second Edition is a standard  
 resource for students professionals and academics wishing to understand current and future issues in healthcare ethics With  
 a distinguished international panel of contributors working at the leading edge of academia this volume presents a  
 comprehensive guide to the field with state of the art introductions to the wide range of topics in modern healthcare ethics

from consent to human rights from utilitarianism to feminism from the doctor patient relationship to xenotransplantation This volume is the Second Edition of the highly successful work edited by Professor Raanan Gillon Emeritus Professor of Medical Ethics at Imperial College London and former editor of the Journal of Medical Ethics the leading journal in this field Developments from the First Edition include The focus on Four Principles Method is relaxed to cover more different methods in health care ethics More material on new medical technologies is included the coverage of issues on the doctor patient relationship is expanded and material on ethics and public health is brought together into a new section Origin Stories in Political Thought Joanne Harriet Wright,2004-01-01 Origin stories are a recurring motif in the history of political thought Presented as narratives that describe the beginnings of politics and power these stories are among the most provocative and politically contentious means by which Western society organizes and represents its experience Indeed as scripts of citizenship origin stories seek to manufacture consent to a preconceived and hierarchical political vision Joanne H Wright s Origin Stories in Political Thought examines Plato s Timaeus Hobbes s story of the state of nature and the social contract and early Second Wave feminist stories about the beginnings of patriarchal social relations Using a historically sensitive feminist methodology Wright documents and deconstructs the tradition of telling origin stories in the larger history of political thought Although individual tales have been assessed in current scholarship the motif of the origin story itself has until now escaped systematic analysis With meticulous research and convincing conclusions Origin Stories in Political Thought makes a groundbreaking and valuable contribution to both feminist and political studies *Without Apology* Shannon Stettner,2016-08-26 Until the late 1960s the authorities on abortion were for the most part men politicians clergy lawyers physicians all of whom had an interest in regulating women s bodies Even today when we hear women speak publicly about abortion the voices are usually those of the leaders of women s and abortion rights organizations women who hold political office and on occasion female physicians We also hear quite frequently from spokeswomen for anti abortion groups Rarely however do we hear the voices of ordinary women women whose lives have been in some way touched by abortion Their thoughts typically owe more to human circumstance than to ideology and without them we run the risk of thinking and talking about the issue of abortion only in the abstract Without Apology seeks to address this issue by gathering the voices of activists feminists and scholars as well as abortion providers and clinic support staff alongside the stories of women whose experience with abortion is more personal With the particular aim of moving beyond the polarizing rhetoric that has characterized the issue of abortion and reproductive justice for so long Without Apology is an engrossing and arresting account that will promote both reflection and discussion **New Blood** Chris Bobel,2010-05-05 New Blood offers a fresh interdisciplinary look at feminism in flux For over three decades menstrual activists have questioned the safety and necessity of feminine care products while contesting menstruation as a deeply entrenched taboo Chris Bobel shows how a little known yet enduring force in the feminist health environmental and consumer rights movements lays bare tensions between second

and third wave feminisms and reveals a complicated story of continuity and change within the women's movement Through her critical ethnographic lens Bobel focuses on debates central to feminist thought including the utility of the category gender and challenges to building an inclusive feminist movement Filled with personal narratives playful visuals and original humor *New Blood* reveals middle aged progressives communing in Red Tents urban punks and artists culture jamming commercial menstrual products in their zines and sketch comedy queer anarchists practicing DIY health care African American health educators espousing holistic womb health and hopeful mothers refusing to pass on the shame to their pubescent daughters With verve and conviction Bobel illuminates today's feminism on the ground indisputably vibrant contentious and ever dynamic

*Abortion Law and Politics Today* Ellie Lee, 1998-11-12 Women's needs are placed at the centre of this collection The contributors discuss the extent to which the contemporary legal framework on abortion matches the needs of women faced with unwanted pregnancy The book contains sections on Britain including an account of the campaign to legalize abortion written by those centrally involved with that campaign international comparisons of abortion law with chapters on France the United States Ireland and Poland and chapters covering contemporary debates including men's rights in abortion and abortion for foetal abnormality

**Technology and Values** Craig Hanks, 2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics

*Reconstructing Motherhood and Disability in the Age of Perfect Babies* Gail Landsman, 2008-08-18 Examining mothers of newly diagnosed disabled children within the context of new reproductive technologies and the discourse of choice this book uses anthropology and disability studies to revise the concept of normal and to establish a social environment in which the expression of full lives will prevail

**Genetic Morality** David Shaw, David M. Shaw, 2006 Cloning embryo research and genetic modification are three of the most controversial issues of our time Is it ethical to use cloning as a means of reproduction Are embryos people Is there a difference between removing genetic disease and creating designer babies This book will attempt to show that these and other problems are ultimately resolvable given careful and unbiased application of established ethical principles many of which underlie common morality These principles when applied to the problems of the new genetic technologies form the basis of a new genetic morality This book applies established principles of biomedical ethics to the new genetic technologies and examines the ethical implications of reproductive and therapeutic cloning genetic modification and stem cell research from a deontological and a

rule utilitarian perspective Finally it seeks to establish what if anything is wrong with each of these practices and why

**The Routledge Handbook of the Ethics of Human Enhancement** Fabrice Jotterand, Marcello Ienca, 2023-08-01 The Routledge Handbook of the Ethics of Human Enhancement provides readers with a philosophically rich and scientifically grounded analysis of human enhancement and its ethical implications A landmark in the academic literature the volume covers human enhancement in genetic engineering neuroscience synthetic biology regenerative medicine bioengineering and many other fields The Handbook includes a diverse and multifaceted collection of 30 chapters all appearing here in print for the first time that reveal the fundamental ethical challenges related to human enhancement The chapters have been written by internationally recognized leaders in the field and are organized into seven parts Historical Background and Key Concepts Human Enhancement and Human Nature Physical Enhancement Cognitive Enhancement Mood Enhancement and Moral Enhancement Human Enhancement and Medicine Legal Social and Political Implications The depth and topical range of the Handbook makes it an essential resource for upper level undergraduates graduate students and postdoctoral fellows in a broad variety of disciplinary areas Furthermore it is an authoritative reference for basic scientists philosophers engineers physicians lawyers and other professionals who work on the topic of human enhancement

*Our Bodies, Whose Property?* Anne Phillips, 2013-07-21 An argument against treating our bodies as commodities No one wants to be treated like an object regarded as an item of property or put up for sale Yet many people frame personal autonomy in terms of self ownership representing themselves as property owners with the right to do as they wish with their bodies Others do not use the language of property but are similarly insistent on the rights of free individuals to decide for themselves whether to engage in commercial transactions for sex reproduction or organ sales Drawing on analyses of rape surrogacy and markets in human organs *Our Bodies Whose Property* challenges notions of freedom based on ownership of our bodies and argues against the normalization of markets in bodily services and parts Anne Phillips explores the risks associated with metaphors of property and the reasons why the commodification of the body remains problematic What she asks is wrong with thinking of oneself as the owner of one's body What is wrong with making our bodies available for rent or sale What if anything is the difference between markets in sex reproduction or human body parts and the other markets we commonly applaud Phillips contends that body markets occupy the outer edges of a continuum that is in some way a feature of all labor markets But she also emphasizes that we all have bodies and considers the implications of this otherwise banal fact for equality Bodies remind us of shared vulnerability alerting us to the common experience of living as embodied beings in the same world Examining the complex issue of body exceptionalism *Our Bodies Whose Property* demonstrates that treating the body as property makes human equality harder to comprehend

**Medical Sexism** Jill B. Delston, 2019-10-17 Doctors routinely deny patients access to hormonal birth control prescription refills and this issue has broad interest for feminism biomedical ethics and applied ethics in general Medical Sexism argues that such practices violate a variety of legal and moral standards including medical

malpractice informed consent and human rights Jill B Delston makes the case that medical sexism serves as a major underlying cause of these systemic and persistent violations Delston also considers other common abuses in the medical field such as policy on abortion access and treatment in childbirth Delston argues that sexism is a better explanation for the widespread abuse of patient autonomy in reproductive health and health care generally Identifying addressing and rooting out medical sexism is necessary to successfully protect medical and moral values
