Reproducing Families:

Reproducing Families David Levine, 1987-08-27 A review of the course of English population history from 1066 to the 1980s with a particular focus on English family forms Reproducing Citizens: family, state and civil society Sasha

Roseneil, Isabel Crowhurst, Ana Cristina Santos, Mariya Stoilova, 2017-10-02 Whilst the politics of reproduction have been at the heart of feminist struggles for over a century and a half their analysis has not yet come to occupy a central place in the interdisciplinary study of citizenship This volume takes up the challenge posed by Bryan Turner when he noted the absence of any systematic thinking about familial relations reproduction and citizenship 2008 and offers the first major global collection of work exploring this nexus of practices and political contestations The book brings together citizenship scholars from across Europe the Americas and Australia to develop feminist and queer analyses of the relationship between citizenship and reproduction and to explore the ways in which citizenship is reproduced Extending the foundational work of feminist political theorists and sociologists who have interrogated the public private dichotomy on which traditional civic republican and liberal understandings of citizenship rest the contributors examine the biological sexual and technological realities of natality and the social realities of the intimate intergenerational material and affective labour that are generative of citizens and that serve to reproduce membership of and belonging to states nations societies and thus of citizenship itself This book was published as a special issue of Citizenship Studies **Social Reproduction** Antonella Picchio, 1992-10-22

This book focuses on the relationship between the process of producing commodities and the process of social reproduction of the labouring population and seeks to restore that problematic relationship to the central place it had in the analysis of Smith Ricardo and Marx *Human Reproductive Decisions* R. I. M. Dunbar, 1995-04-12 Reproductive biologists evolutionary biologists demographers and social scientists all have a common interest in the business of human reproduction Their perspectives however are very different and have traditionally prevented them from having much to do with each other The conference on which this book is based brought together contributors from each of these disciplines in an attempt to explore the common ground that they share and so generate a better understanding of the factors that influence human fertility

Oil Palm Breeding Aik Chin Soh, Sean Mayes, Jeremy A. Roberts, 2017-08-14 The oil palm is a remarkable crop producing around 40% of the world's vegetable oil from around 6% of the land devoted to oil crops Conventional breeding has clearly been the major focus of genetic improvement in this crop A mix of improved agronomy and management coupled with breeding selection have quadrupled the oil yield of the crop since breeding began in earnest in the 1920s However as for all perennial crops with long breeding cycles oil palm faces immense challenges in the coming years with increased pressure from population growth climate change and the need to develop environmentally sustainable oil palm plantations In Oil Palm Breeding Genetics and Genomics world leading organizations and individuals who have been at the forefront of developments in this crop provide their insights and experiences of oil palm research while examining the different

challenges that face the future of the oil palm The editors have all been involved in research and breeding of oil palm for many years and use their knowledge of the crop and their disciplinary expertise to provide context and to introduce the different research topics covered *Reproduction, Sexuality, and the Family* Karen J. Maschke,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors* Miola's edited work also features a comprehensive critical history coupled with a full bibliography and photographs of major productions of the play from around the world In the collection there are five previously unpublished essays The topics covered in these new essays are women in the play the play's debt to contemporary theater its critical and performance histories in Germany and Japan the metrical variety of the play and the distinctly modern perspective on the play as containing dark and disturbing elements To compliment these new essays the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficultly accessible journals newspapers and other sources This collection brings together these essays for the first time **American Families** Stephanie Coontz,2013-01-11 In the past forty years American families have become more racially and ethnically diverse than ever before Different family forms and living arrangements have also multiplied with single parent families cohabiting couples with children divorced couples with children stepfamilies and newly visible same sex families During the same period socioeconomic inequality among families has risen to levels not seen since the 1920s This second edition of *American Families* offers several benefits clear conceptual focus new attention to the historical origins of contemporary family diversity well chosen essays by leading names from across the curriculum explores the interactions between race ethnicity class gender and sexuality in shaping family life cCompletely updated and expanded bibliography of related sources new companion website with student and instructor resources to enhance learning Leading off with a comprehensive and teachable introduction to the topic this completely updated revised and expanded second edition of Stephanie Coontz's classic collection *American Families* remains the best resource available on family diversity in America For additional information and classroom resources please visit the *American Families* companion website at www.routledge.com/textbooks/9780415958219 **De Gruyter Handbook of Business Families** Michael Carney,Marleen Dieleman,2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The *De Gruyter Handbook of Business Families* brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business

The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families Limited Livelihoods Sonya O. Rose,2003-09-02 Integrating analytical tools from feminist theory cultural studies and sociology to illuminate detailed historical evidence Sonya Rose argues that gender was a central organizing principle of the nineteenth century industrial transformation in England She elaborates a cultural theory of gender that suggests why it is an inherent aspect of all social and economic relations Analysing employer strategies and state policies and the role of work in family life she demonstrates that neither industrial transformation nor class relations can be understood when reduced to gender neutral and abstract forces **Sexuality, Family Planning, and Reproduction** Fritz Dross,Birgit Nemec,Igor Kąkolewski,2025-08-12 The history of sexuality family planning and reproduction in Central and Eastern Europe sounds out the historical dimensions across a broad field where human biology medicine policy and government social programmes intersect with fundamental conceptions of desired or feared social developments From contraception to representations of motherhood and controversies over reproductive rights using the example of the historically changing political social cultural and scientific interconnections in Central and Eastern Europe the contributors to this volume invite reflections on historical developments that open new perspectives for the 21st century **The State of Families** Jennifer Reich,2020-12-29 The State of Families Law Policy and the Meanings of Relationships collects essential readings on the family to examine the multiple forms of contemporary families the many issues facing families the policies that regulate families and how families and family life have become politicized This text explores various dimensions of the family and uses a critical approach to understand the historical cultural and political constructions of the family Each section takes different aspects of the family to highlight the intersection of individual experience structures of inequality including race class gender sexuality disability and immigration and state power Readings both original and reprinted from a wide range of experts in the field show the multiple forms and meanings of family by delving into topics including the traditional ground of motherhood childhood and marriage while also exploring cutting edge research into fatherhood reproduction child free families and welfare Taking an interdisciplinary approach to the family The State of Families offers students in the social sciences and professionals working with families new ways to identify how social structure and institutional practice shape individual experience **Karl Marx's Social and Political Thought** Bob Jessop,Russell Wheatley,1999 The Family and Family Relationships, 1500-1900 Rosemary O'Day,1994-10-26 While historians have written with ease about the state and the church the family has so far defied historical analysis As the primary cell of human social organisation upon which both state and church depend it is of crucial

importance In this concise informative and stimulating book Rosemary O Day seeks to explain the difficulties facing the historian of the family and to suggest strategies for their solution She compares families and households in time space and economy over the period 1500 1914 and draws together the important existing work

Surrogacy and the Reproduction of Normative Family on TV Lulu Le Vay,2019-05-23 This book examines the proliferation of surrogacy storylines on TV exploring themes of infertility motherhood parenting and family It investigates how despite reproductive technologies ability to flex contours of family the shows narratives work to uphold the white heterosexual genetically reproduced family as the ideal In dialogue with responses from a range of female viewers both mothers and non mothers the book scrutinises the construction of family ideology on television with studies including Coronation Street 1960 present Giuliana is homosexuality only acceptable when it echoes heterosexual norms Are female characters only fulfilled when they are genetic mothers Does heterosexual romance override technology in the cure for infertility While the answers to these questions may suggest that television still conforms to heteronormative narratives this book importantly demonstrates that audiences desire alternative happy endings that show infertile female characters more positively and recognise alternative kinship formations as meaningful

Conceiving Cuba Elise Andaya,2014-05-30 After Cuba s 1959 revolution the Castro government sought to instill a new social order Hoping to achieve a new and egalitarian society the state invested in policies designed to promote the well being of women and children Yet once the Soviet Union fell and Cuba s economic troubles worsened these programs began to collapse with serious results for Cuban families Conceiving Cuba offers an intimate look at how with the island s political and economic future in question reproduction has become the subject of heated public debates and agonizing private decisions Drawing from several years of first hand observations and interviews anthropologist Elise Andaya takes us inside Cuba s households and medical systems Along the way she introduces us to the women who wrestle with the difficult question of whether they can afford a child as well as the doctors who with only meager resources at their disposal struggle to balance the needs of their patients with the mandates of the state Andaya s groundbreaking research considers not only how socialist policies have profoundly affected the ways Cuban families imagine the future but also how the current crisis in reproduction has deeply influenced ordinary Cubans views on socialism and the future of the revolution Casting a sympathetic eye upon a troubled state Conceiving Cuba gives new life to the notion that the personal is always political

Lived Realities of Solo Motherhood, Donor Conception and Medically Assisted Reproduction Tine Ravn,2021-09-30 This book explores the empirical manifestations of the paradoxical features of reproductive technologies and provides in depth understandings of solo motherhood through assisted reproduction and by recognising the complex experiences and the lived realities of forming donor conceived families

Anthropology of Reproduction: The Basics Sallie Han,Cecília Tomori,2025-02-24 Anthropology of Reproduction The Basics is a clear and accessible guide to topics in reproduction from the perspective of anthropology emphasizing the central importance of reproduction in human

sociocultural and biological experience It examines why reproduction matters so much to human beings and what anthropology offers to better understand their decisions about having or not having children and their experiences with periods infertility contraception abortion pregnancy pregnancy loss birth and care for children The book shows that all of reproduction is shaped by our evolution prehistory and history as well as the cultural social political and economic contexts and conditions that impact our lives It tells the story of how these conditions enable support constrain or coerce reproduction and how people around the world survive or thrive within comply with or resist against these forces to create their reproductive futures Its primary goals are to promote an understanding of human reproduction as sociocultural and biological experience awareness of and attention to the sociocultural historical political and economic contexts and conditions influence the ideas and practices of human reproduction particularly how social inequities shape reproduction and in turn how we can move towards more equal and just reproductive futures to introduce and reinforce an understanding of anthropology as a discipline taking a holistic approach to human experiences This student friendly text provides an overview of the fundamental principles of reproduction and is an invaluable guide for anyone wanting to learn more about this fascinating subject It is an essential read for students approaching the subject for the first time as well as researchers coming to the topic from another discipline in the sciences and humanities

The Routledge Companion to Gender and Reproduction Barbara Katz Rothman, Elizabeth Newnham, Rodante van der Waal, Christie Sillo, 2025-03-31 The Routledge Companion to Gender and Reproduction provides an in depth approach to issues of gender and reproductive justice from a wide variety of countries and perspectives with particular attention to the range of reproductive injustices that flow from racism and sexism This collection provides a comprehensive and interdisciplinary approach to the current issues surrounding gender and procreation Topics addressed within these chapters include feminist history and reproductive rights reproductive care midwifery obstetric violence trans pregnancy abortion IVF LGBTQ inclusive maternity care obstetric racism gender and parenting from a diverse range of disciplines including anthropology sociology history and midwifery The Routledge Companion to Gender and Reproduction provides an urgent and necessary overview of research in these areas and is an essential resource for those studying these topics as well as practitioners

The New Reproductive Order Sarah Franklin, Marcia C. Inhorn, 2025-04-22 The New Reproductive Order documents the effects of half a century of new reproductive technologies on ideas and practices surrounding fertility infertility fertility control and fertility decline that is on reproduction itself causing profound transformations in family life national political agendas global economies and environmental movements in the twenty first century

Reproduction and Biopolitics Silvia De Zordo, Milena Marchesi, 2016-02-05 The central theme of this volume is the notion of irrational reproduction the ways in which women s and couples reproductive choices and practices are deemed irrational or irresponsible because they result in the wrong number of children In a global context of declining fertility population policies have shifted to a neoliberal register which

despite local differences includes both the deepening of economic and social inequalities and the intensification of rights discourses applied to the unborn Inspired by Foucault's theories on biopolitics and biopower and by a long tradition of feminist anthropological studies on reproduction the ethnographically based papers collected in this volume address the following crucial questions How does the notion of irrational reproduction emerge and play out in diverse socio political contexts and what forms of subjectivities and resistance does it generate How does the threat of too few or too many children itself constructed through expert knowledge of statistics and political concerns over the size of different ethnic populations or classes justify and support different biopolitical projects And how do the increasing privatization of healthcare and the dismantling of welfare states affect reproductive practices and decisions on the ground in the global North and South This book was originally published as a special issue of *Anthropology and Medicine*
