**Revolution and the Historical Novel** John McWilliams, 2017-12-15 John McWilliams has written the first much needed account of the ways the promise and threat of political revolution have informed masterpieces of the historical novel The jolting sense of historical change caused by the French Revolution led to an immense readership for a new kind of fiction centered on revolution counter revolution and warfare which soon came to be called the historical novel During the turbulent

wake of The Declaration of the Rights of Man promptly followed by the phenomenon of Napoleon Bonaparte the historical novel thus served as a literary hybrid in the most positive sense of that often dismissive term It enabled readers to project personal hopes and anxieties about revolutionary change back into national history While immersed in the fictive lives of genteel often privileged heroes readers could measure their own political convictions against the wavering loyalties of their counterparts in a previous but still familiar time McWilliams provides close readings of some twenty historical novels from Scott and Cooper through Tolstoy Zola and Hugo to Pasternak and Lampedusa and ultimately to Marquez and Hilary Mantel but with continuing regard to historical contexts past and present He traces the transformation of the literary conventions established by Scott's Waverley novels showing both the continuities and the changes needed to meet contemporary times and perspectives Although the progressive hopes imbedded in Scott's narrative form proved no longer adaptable to twentieth century carnage and the rise of totalitarianism the meaning of any single novel emerges through comparison to the tradition of its predecessors A foreword and epilogue explore the indebtedness of McWilliams's perspective to the Marxist scholarly tradition of Georg Lukacs and Frederic Jameson while defining his differences from them This is a scholarly work of no small ambition and achievement

**The Cult of the Modern** Gavin Murray-Miller, 2017-05-01 The Cult of the Modern focuses on nineteenth century France and Algeria and examines the role that ideas of modernity and modernization played in both national and colonial programs during the years of the Second Empire and the early Third Republic Gavin Murray Miller rethinks the subject by examining the idiomatic use of modernity in French cultural and political discourse The Cult of the Modern argues that the modern French republic is a product of nineteenth century colonialism rather than a creation of the Enlightenment or the French Revolution This analysis contests the predominant Parisian and metropolitan contexts that have traditionally framed French modernity studies noting the important role that colonial Algeria and the administration of Muslim subjects played in shaping understandings of modern identity and governance among nineteenth century politicians and intellectuals In synthesizing the narratives of continental France and colonial North Africa Murray Miller proposes a new framework for nineteenth century French political and cultural history bringing into sharp relief the diverse ways in which the French nation was imagined and represented throughout the country's turbulent postrevolutionary history as well as the implications for prevailing understandings of France today

**Law and Catastrophe** Austin Sarat, Martha Merrill Umphrey, Lawrence Douglas, 2007-06-18 The study of catastrophe is a growth industry Today cosmologists scan the heavens for asteroids of the kind that smashed into earth some ninety million years ago leading to the swift extinction of the dinosaurs Climatologists create elaborate

models of the chaotic weather and vast flooding that will result from the continued buildup of greenhouse gases in the planet's atmosphere Terrorist experts and homeland security consultants struggle to prepare for a wide range of possible biological chemical and radiological attacks aerated small pox virus spread by a crop duster botulism dumped into an urban reservoir a dirty bomb detonated in a city center Yet strangely law's role in the definition identification prevention and amelioration of catastrophe has been largely neglected The relationship between law and other limiting conditions such as states of emergency has been the subject of rich and growing literature By contrast little has been written about law and catastrophe In devoting a volume to the subject the essays authors sketch the contours of a relatively fresh yet crucial terrain of inquiry

**Law and Catastrophe** begins the work of developing a jurisprudence of catastrophe

**Schism and Solidarity in Social Movements** Christopher K. Ansell, 2001-10-01 Like many organizations and social movements the Third Republic French labour movement exhibited a marked tendency to schism into competing sectarian organizations During the roughly 50 year period from the fall of the Paris Commune to the creation of the powerful French Communist Party the French labour movement shifted from schism to broad based solidarity and back to schism In this 2001 book Ansell analyses the dynamic interplay between political mobilization organization building and ideological articulation that produced these shifts between schism and solidarity The aim is not only to shed light on the evolution of the Third Republic French labour movement but also to develop a more generic understanding of schism and solidarity in organizations and social movements To develop this broader understanding the book builds on insights drawn from sociological analyses of Protestant sects and anthropological studies of segmentary societies as well as from organization and social movement theory
