Feds in the Classroom Neal P. McCluskey, 2007 The federal government is deeply entrenched in American public education and virtually dictates what can be taught to students Why At what cost And what are the benefits to public school students To public schools The author challenges the constitutionality of the feds in the classroom and reminds readers that public education has until recently been the function of state and local governments

Mother Earth and Uncle Sam Rena I. Steinzor, 2009-05-21 In this compelling study Rena Steinzor highlights the ways in which the government over the past twenty years has failed to protect children from harm caused by toxic chemicals She believes these failures under funding excessive and misguided use of cost benefit analysis distortion of science and devolution of regulatory authority have produced a situation in which harm that could be reduced or eliminated instead persists Steinzor states that as a society we are neglecting our children's health to an extent that we would find unthinkable as individual parents primarily due to the erosion of the government's role in protecting public health and the environment At this pace she asserts our children will inherit a planet under grave threat We can arrest these developments if a critical mass of Americans become convinced that these problems are urgent and the solutions are near at hand By focusing on three specific case studies mercury contamination through the human food chain perchlorate rocket fuel in drinking water and the effects of ozone smog on children playing outdoors Steinzor creates an analysis grounded in law economics and science to prove her assertions about the existing dysfunctional system Steinzor then recommends a concise and realistic series of reforms that could reverse these detrimental trends and serve as a blueprint for restoring effective governmental intervention She argues that these recommendations offer enough material to guide government officials and advocacy groups toward prompt implementation for the sake of America's and the world's future generations

Leviathan on the Right Michael D. Tanner, 2007-02-16 For conservatives generally and the Republican Party in particular 2006 was a time of intense soul searching For the first time in a dozen years Republicans lost control of Congress As a result they are being forced to reexamine who they are and what they stand for It's about time After all more than a decade has passed since President Bill Clinton announced in his State of the Union address that the era of big government is over Yet since then government has grown far bigger and far more intrusive It spends more regulates us more and reaches far more into our daily lives than it did before the Republican Revolution Behind this alarming trend stands the rise of a new brand of conservatism one that believes big government can be used for conservative ends It is a conservatism

that ridicules F A Hayek and Barry Goldwater while embracing Teddy and even Franklin Roosevelt It has more in common with Ted Kennedy than with Ronald Reagan Leviathan on the Right provides an incisive analysis of the roots and core beliefs of big government conservatism and the major currents that fueled its growth neoconservatism the Religious Right supply side economics national greatness conservatism and Newt Gingrich style technophilia and offers a detailed critique of its policies on a wide range of issues The book contains a clear warning that unless conservatives return to their small government roots the electoral defeat of 2006 is just the beginning

Welfare for Politicians? John Samples,2005-03-25 Candidates and parties need money to fight election campaigns In the United States this money comes largely from individuals and groups not the government and taxpayers Many people criticize such private financing of politics Private donations they claim advance special interests thereby corrupting politics and government Some critics argue that government should ban private campaign contributions in favor of financing by taxpayers Since public money comes from everyone they reason it actually comes from no one which cuts out corruption before it begins But taxpayer financing of campaigns such as the income tax check off for presidential campaigns has its share of critics who point out that public financing has often come up short in terms of increasing electoral competition Another major problem concerns the taxpayers who are called on to fund these programs Taxpayer financing in polls and in reality lacks public support The public resists giving welfare to politicians to run their campaigns In Welfare for Politicians leading analysts from both sides of the public financing debate address the history of these programs including the successes and failures of the financing system for presidential elections They also take up recent innovations in the states

Democracy is in shambles economically and politically The recent economic meltdown in Europe and the U S has substituted democratic deliberation with technocratic decisions In Athens Madrid Lisbon New York Pittsburgh or Istanbul protesters have denounced the incapacity and unwillingness of elected officials to heed to their voices While the diagnosis of our political economic illness has been established remedies are hard to come What can we do to restore our broken democracy Which modes of political participation are likely to have an impact And what are the loci of political innovation in the wake of the crisis It is with these questions that Reclaiming Democracy engages We argue that the managerial approach to solving the crisis violates a right to politics that is a right that our collective life be guided by meaningful politics by discussion of and decision among genuinely alternative principles and policies The contributors to this volume are united in their commitment to explore how and where this right can be affirmed in a way that resuscitates democracy in the wake of the crisis Mixing theoretical reflection and empirical analysis the book offers fresh insights into democracy's current conundrum and makes concrete proposals about how the right to politics can be protected
