Fairchild Republic A-10 Thunderbolt II Peter C. Smith, 2021-01-31 A comprehensive account of the origins design and history of the A 10A Warthog Highly recommended AMPS Indianapolis Includes photos The Fairchild Republic A 10A Close Support aircraft has become a legend over its long front line life Known as the Warthog due to her unusual appearance this little aircraft has built up an awesome reputation in the specialized ground attack role where her accuracy and deadliness are widely recognized as the best of their kind Hard lessons from World War II which were reinforced by the bitter experience of the Vietnam War two decades later showed it was both impracticable and cost inefficient to use supersonic fighter jets in the close air support mission A requirement was therefore drawn up for a plane capable of carrying a heavy and varied load of ordnance which had good endurance and unprecedented maneuverability and could survive heavy ground fire thus the A 10 was born But by the time it came into service its role had changed to that of a tank buster in the defense of Western Europe in the face of the overwhelming numbers of Soviet battle armor With her straight wing twin tails and turbine engines mounted high on her rear fuselage this single seat aircraft certainly presented a unique appearance But all these features served a vital role as Peter C Smith explains in this highly detailed study Although the Warthog's expected missions on the plains of Germany did not materialize she did destroy hundreds of Soviet built tanks during the Gulf wars The A 10 has also flown almost continuous missions over the Balkans against the Taliban in Afghanistan and ISIS in Iraq and Syria This beautifully illustrated and comprehensive volume brings the A 10 s incredible story right up to date The Official Pictorial History of the AAF United States. Army Air Forces. Historical Office, 1947 Air Power History ,1997 Air American Book Publishing Record, 1997-09 Force Magazine .1997-07 Combat Biplanes of World War II Peter C. Smith, 2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini's Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World

War II describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well Mitsubishi Zero Peter C.
