Contemporary Newtonian Research Z. Bechler, 2012-12-06 them in his cheat preface to Copernicus De Revolutionibus but the main change in their import has been that whereas Osiander defended Copernicus Mach and Duhem defended science The modern conception of hypothetico deductive science is again geared to defend the respectability of science in much the same way the physical interpretation it says is merely and always hypothetical and so the scientist is never really committed to it Hence when science sheds the physical interpretation off its mathematical skeleton as time and refutation catch up with it the scientist is not really caught in error for he never was committed to this interpretation in the first place This is the apologetic essence of present day Popper like versions of the idea of science as a mathematical core cum interpretational shell This is also Cohen's view for it aims to free Newton of any existential commitment to which his theory might allegedly commit him It will be readily seen that Cohen regards this methodological distinction between mathematics and physics to be the backbone of the Newtonian revolution in science which is in its turn the climax of the whole Scientific Revolution for a very clear reason it enables us to argue that Newton could use freely the new concept of

centripetal force even though he did not believe in physical action at a distance and could not conceive how such a force could act to produce its effects 3 pp
