International Competitiveness in Financial Services Marvin H. Kusters,A.H. Meltzer,2012-12-06 financial markets suggests that factors such as differences in capital requirements limitations on size or on the range of financial activities in which firms can engage government guarantee arrangements for deposits or payments and reporting or disclosure requirements can have important effects on the efficiency of industrial and commercial firms and thus on the international competitive positions of major sectors of the U S economy Regulatory and tax policies must therefore take into account effects on inter national competitive positions in addition to domestic concerns The articles in this issue analyze differences in market organization and regulation across countries and examine how efficiency in producing financial services is influenced by these differences These articles were presented and discussed at a conference sponsored by the American Enterprise Institute in Washington D C on May 31 and June 1 1990 This conference on International Competitiveness in Financial Services brought to the attention of Washington policy officials these analyses by leading scholars in finance Publication of these studies and critiques in the *Journal of Financial Services Research* is intended to stimulate further interest in research on these important issues

European Developments in Corporate Criminal Liability James Gobert,Ana-Maria Pascal,2011-06-10 When corporations carry on their business in a grossly negligent manner or take a cavalier approach to risk management the consequences can be catastrophic The harm may be financial as occurred when such well regarded companies as Enron Lehman Brothers Worldcom and Barings collapsed or it may be environmental as illustrated most recently by the Gulf oil spill Sometimes deaths and serious injuries on a mass scale occur as in the Bhopal gas disaster the Chernobyl nuclear explosion the Paris crash of the Concorde the capsizing of the Herald of Free Enterprise and rail crashes at Southall Paddington and Hatfield in England What role can the law play in preventing such debacles and in punishing the corporate offenders This collection of thematic papers and European country reports addresses these questions at both a theoretical and empirical level The thematic papers analyse corporate criminal liability from a range of academic disciplines including law sociology criminology economics philosophy and environmental studies whilst the country reports look at the laws of corporate crime throughout Europe highlighting both common features and irreconcilable differences between the various jurisdictions

range of innovative applications of IT in the financial services industry *The Resilience of New Public Management* Irvine Lapsley, Peter Miller, 2024-01-12 The Resilience of New Public Management examines the role and significance of New Public Management NPM in contemporary society and explores its emergence and resilience Eminent scholars have said that NPM only existed from 1980 2000 and that we now live in a post NPM world This book tells a very different story Evidence is presented in this book of 40 years of continuous NPM in public services including government agencies universities and health care NPM has diffused across sectors and globally since the 1980s and in the process mutated to become modernization It also coexists with alternative models of managing public services including models such as digital era governance and network governance which were considered replacements for NPM The capacity of NPM to mutate has caught many of its critics by surprise This capacity for NPM to reinvent itself includes the adoption of Lean Management the Toyota Production System Early NPM adopter countries engaged with the use of Lean Management techniques but late NPM adopters did not The most recent alternative to NPM is Trust based management which has made significant advances in Scandinavian countries However Trust based management is closely linked to proto NPM and NPM practices and it has itself mutated to present itself as a friendlier and more supportive version of NPM which at the very least deserves close scrutiny The above trends are indicative of the resilience of NPM and its intuitive appeal for policymakers Its advocates argue that NPM has the capacity to deliver policy outcomes but this book shows that such claims and aspirations are not always matched by the evidence of NPM in action **Transaction Cost Economics and Beyond** Michael Dietrich, 2008-01-28 In
