International Marketing Research

Objectives:

1. Define the terms and importance of Marketing research
2. How a company used a range of different research designs to launch a new product
3. Explain the scope of international marketing research

In the field of business and industry, the need for research is not only important but urgent and compelling. This is because, as may have been doubtless observed by most of us, changes brought about by the rapid strides in science and technology occur so fast that what is now in common use might indeed become obsolete tomorrow.

Defining International Marketing Research

International Marketing Research defines as market research conducted either simultaneously or sequentially to facilitate marketing decisions in more than one country. The process calls for studying the various market characteristics for facilitating marketing decisions that can be taken across countries.

Leon Schiffman, Aron O'Cass, Angela Paladino, Jamie Carlson, 2013-10-15. A trusted resource for Consumer Behaviour theory and practice. Consumer Behaviour explores how the examination and application of consumer behaviour is central to the planning, development and implementation of effective marketing strategies. In a clear and logical fashion, the authors explain consumer behaviour theory and practice, the use and importance of consumer research, and how social and cultural factors influence consumer decision making. The sixth edition of this Australian text provides expanded coverage of contemporary topics. Monthly Catalog of United States Government Publications, 1992 *Monthly Catalogue, United States Public Documents*, 1992 **Ethnic Marketing** Guilherme Pires, John Stanton, 2018-12-17. Together with the development of transformative technologies that epitomize globalization, the ongoing movements of people across borders and other socio-economic pressures are creating a fast-changing business environment that is difficult for business to understand, let alone control. Dominant social expectations that immigrants should seek to adopt an assimilationist socialization path towards the host country's mainstream are contradicted by minority ethnic group resilience. There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries. Since ethnic minority consumers cannot be expected to assimilate, then they maintain some significant degree of unique ethnicity-related consumer characteristics that convert into threats and opportunities for business. The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business. Following from the extensive examination of scholarly perspectives of ethnic marketing theory, there is an acknowledged and marked divide between theoretical exhortations and what is done in practice: a relative oversight of the implications of mixed embedded markets and

a propinquity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities Keeping a focus on the ethnic group as the unit of analysis combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives The ultimate objective is to reduce the theory practice divide through the development of a collaborative framework between business and scholars that converts into theory in use
