In an era of far-reaching changes, organizational learning and knowledge creation are high on the agenda of social scientists, managers and consultants worldwide as they seek to adapt to new environments. The *Handbook of Organizational Learning and Knowledge* provides a comprehensive overview of how the concept of organizational learning emerged, how it has been used and debated, and where it may be going. It summarizes the state of the art and provides a full account of the diverse approaches, themes, issues and debates of the field. The handbook unites a distinguished team of international authors who examine both the central themes and key emerging issues. The coverage extends beyond the American tradition to include the experiences of Europe, Asia and the Middle East. The book opens with chapters drawing insights from various social science approaches. The following sections examine fundamental issues concerning the external triggers, factors and conditions, agents and processes of organizational learning. Subsequent chapters review the subject within a global context, looking in particular at processes of interorganizational learning and knowledge transfer. The next sections examine the development of learning practices and provide case studies to illustrate organizational learning and knowledge creation. The book concludes with an analysis of the state of the art and an agenda for the future. This handbook will be an invaluable reference tool for scholars and students in the social sciences as well as for professionals involved in organizational development, learning and change. *The Sociology of Military Science* Colonel (US Army Ret.) Chris Paparone, 2012-11-08. This groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm. The author offers fresh sociological avenues to become more institutionally reflexive, to offer a variety of design frames of reference beyond those typified by modern military doctrine. Modernist military knowledge has been institutionalized to the point that it blinds militaries to alternative designs organizationally and in their interventions. This book

seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that Military Design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished Written by Colonel Paparone U S Army Ret PhD with a special chapter by two active duty officers it will appeal to all in military and security studies including professionals and policymakers

A Positive Psychology Perspective on Quality of Life Anastasia Efklides, Despina Moraitou, 2012-11-02 The construct quality of life QoL since the 1980s when it was introduced is being used mainly in the context of health problems Areas of one's life that contribute to QoL are good physical and mental health efficient cognitive functioning social support being able to meet the requirements of professional life positive emotions etc Power 2003 Work on subjective well being SWB on the other hand was developed in the context of healthy everyday life it also has a history of more than 30 years During this 30 year period factors that have an impact on SWB such as SES gender health age and religiosity have been identified Diener 2000 A third independent line of research pertains to what has been called Positive Psychology Seligman Csikszentmihalyi 2000 that is an emphasis on human strengths such as optimism hope wisdom positive emotions resilience etc which contribute to positive functioning in life Recently SWB has been associated to human strengths and to the movement of positive psychology but this did not happen for QoL possibly because of its emphasis on people with health problems However QoL can be conceived of as a generic term that pertains to all people healthy or not In this sense it is closely related to SWB defined as happiness Diener 2000 Also QoL encompasses positive emotions that go beyond happiness and has the advantage that it can be applied to many different domains of life such as interpersonal relations health related situations and professional and educational strivings Moreover the mechanisms that underpin QoL and SWB can be studied in relation to people's goals and strengths of character that is from a positive psychological perspective Such a perspective can reveal the specificities of quality in the various domains of life and specifically the positive emotions and strengths that contribute to a happier healthier and more successful life even in face of adversity Therefore despite the differences among the three theoretical traditions namely QoL SWB and positive psychology it is possible to find the common ground they share and each of them can benefit from notions developed in the others The aim of the present book is to bring together these three traditions show the interactions of variables emphasized by them and give an integrative perspective from the positive psychology point of view It also aims to extend the range of life situations in which one can look for quality and which go beyond the traditional emphasis of QoL on health problems Thus the content of the proposed book covers different age

populations from children to older adults healthy and people facing health problems as well as people facing problems in their interpersonal lives or in their pursuits It also discusses factors that contribute to marital satisfaction well being in the school context and things that people value and cherish The chapters refer to notions such as happiness interest resilience wisdom hope altruism optimism and spirituality religiosity that represent unique human strengths Finally it emphasizes the role of goals and motivation that connect SWB with self regulation and managing of one s life priorities To conclude the chapters included in the proposed edited book aim at bringing to the fore new theoretical developments and research on QoL SWB and positive psychology that bridges previously distinct theoretical traditions The proposed book covers a broad range of topics addresses different theoretical interests and paves the way for a more integrative approach Finally it brings together an international set of authors from USA Europe Australia and Asia Management Laureates Arthur G.

Bedeian,2018-04-17 First published in 1993 This volume compiles the autobiographies of the management discipline s most distinguished laureates Prior to this publication the available management literature provided little insight into the personal and intellectual lives the frustrations as well as the triumphs of the individuals in the management discipline Although such understanding could be conveyed in many forms perhaps the most intimate and fascinating of these for gaining behind the scenes insights is the autobiography Thus the autobiographies in this volume as in the five companion volumes offer the reader not only a glimpse of the subjective determinants and personal experiences of the management discipline s most distinguished laureates but also a deeper understanding of what management is and what it is becoming The various accounts reflect a diversity of approaches interests and experiences The Treatment of Information Issues and Concepts in Management and Organizational Literatures Norman Roberts,David Clarke,1987 **Personnel Literature** ,1982
