Defining Technological Literacy J. Dakers, 2006-04-29 Never before have we so needed a new literacy that will enable us to meaningfully participate in the rapidly evolving technologically mediated world This collection offers a solid basis for defining this new technological literacy by bringing together theoretical work encompassing philosophy design and pedagogy

What Things Do Peter-Paul Verbeek, 2010-11-01 How are all these things affecting us How can their role in our lives be understood *What Things Do* answers these questions by focusing on how technologies mediate our actions and our perceptions of the world Subject Guide to Books in Print , 1996 *Technology, Media Literacy, and the Human Subject* Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis's book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna *Technology Media Literacy and the Human Subject* is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today's world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities

Postphenomenological Methodologies Jesper Aagaard, Jan Kyrre Berg Friis, Cathrine Hasse, Jessica Sorenson, Oliver Tafdrup, 2018-08-15 This edited volume is the first publication to tackle the issue of researching human technology relations from a methodological postphenomenological perspective While the traditional phenomenology of the 20th century with figures like Husserl Heidegger and Merleau Ponty provided valuable insights into the formal structures of essence being and embodiment etc their mode of philosophizing mostly involved abstract pure thinking Although rooted in this tradition the postphenomenological approach to the study of human technology relations emphasizes the empirical turn and interdisciplinary work in the field of philosophy and reaches out to other disciplines like anthropology education media studies and science and technology studies STS The contributors discuss what it means for the field of postphenomenology to be empirically based and what kind of methodology is required in order for researchers to go out and study human technology relations in this perspective In many disciplines methodology refers to the analytical approach taken e g the analytical concepts you employ to make an analysis in postphenomenology these might include concepts such as multistability variation or mediation In a discipline like anthropology it also refers to reflections over the methods researchers use to approach an empirical field Methods can include interviews of different kinds participant observations surveys and auto ethnography Furthermore methodology can include ethical issues tied to doing research in an empirical field These practical aspects are not separate from but rather connected to theoretical approaches This book ties together the methods ethics and theories of postphenomenology in a groundbreaking volume on methodology With postphenomenological studies of education digital media biohacking health robotics and skateboarding as points of reference the authors of this volume in twelve chapters provide new perspectives on what a comprehensive postphenomenological research methodology must consist of

Design for Behaviour Change Kristina Niedderer, Stephen Clune, Geke Ludden, 2017-08-23 Design impacts every part of our lives The design of products and services influences the way we go about our daily activities and it is hard to imagine any activity in our daily lives that is not dependent on design in some capacity Clothing mobile phones computers cars tools and kitchenware all enable and hold in place everyday practices Despite design's omnipresence the understanding of how design may facilitate desirable behaviours is still fragmented with limited frameworks and examples of how design can effect change in professional and public contexts This text presents an overview of current approaches dedicated to understanding how design may be used intentionally to make changes to improve a range of problematic social and environmental issues It offers a cross disciplinary and cross sectoral overview of different academic theories adopted and applied to design for behaviour change The aim of the volume is twofold firstly to provide an overview of existing design models that integrate theories of change from differing scientific backgrounds secondly to offer an overview of application of key design for behaviour change approaches as used across case studies in different sectors such as design for health and wellbeing sustainability safety design against crime and social design Design

for Behaviour Change will appeal to designers design students and practitioners of behavioural change *The Philosophy of Imagination* Galit Wellner,Geoffrey Dierckxsens,Marco Arienti,2024-04-18 Combining perspectives from both continental and analytic philosophy this timely volume explores how imagination today both shapes and is shaped by technology art and ethics Imagination is one of the most significant and broadly examined concepts in contemporary philosophy and is frequently understood as a basic human faculty that enables complex activities This book shows however that imagination is more than a mere enabler Whilst imagination shapes our experiences it is at the same time shaped by our environments Some of the most creative manifestations of imagination are the result of its two way interaction with art or technology or both In short imagination co shapes us Beyond the traditional perspectives of Kant and Heidegger *The Philosophy of Imagination Technology Art and Ethics* examines our dynamic relationship with imagination from contemporary technological advancements such as AI that transform the whole ecosystem to imagination in the context of videogames and literary fiction Analysing societal imagination it addresses the relationship between the racial imaginary and white ignorance as well as the effects that societal mechanisms such as lockdowns can have on our imagination Taking its cue from the here and now this volume brings together leading international scholars to investigate how the concept of co shaping allows us to see imagination and its crucial role in society in new and productive ways *Social Research Methods* Alan Bryman,2012-01-19 Now in its fourth edition this market leading textbook continues to provide students with an excellent explanation and demonstration of the main theories and techniques in social research methods **SAGE Biographical Research** John Goodwin,2012-06-25 Biographical research may take a range of forms and may vary in its application and approach but has the unified and coherent aim to give voice to individuals The central concern of this collection is to assemble articles from sociology social psychology education health criminology social gerontology epidemiology management and organizational research that illustrate the full range of debates methods and techniques that can be combined under the heading biographical research Volume One *Biographical Research Starting Points Debates and Approaches* explores the different biographical methods currently used while locating these within the history of social science methods Volume Two *Biographical Interviews Oral Histories and Life Narratives* focuses on the more established interview based biographical research methods and considers the analytical strategies used for interview based biographical research Volume Three *Forms of Life Writing Letters Diaries and Auto Biography* considers the value of data contained within letters diaries and auto biography and illustrates how this data has been analyzed to reveal biographies and their social context Volume Four *Other Documents of Life Photographs Cyber Documents and Ephemera* focuses on the other human documents and objects like photographs cyber documents emails blogs social networking sites webpages and other ephemera such as official documents that are used extensively in biographical research *Directory of American Scholars: Philosophy, religion and law* ,1999 *European Journal of Tourism Research* ,2015-10-01 The European Journal of Tourism Research is an

Daniel Johnston Henry Glassie,2020-03-03 DANIEL JOHNSTON raised on a farm in Randolph County returned from Thailand with a new way to make monumental pots Back home in North Carolina he built a log shop and a whale of a kiln for wood firing Then he set out to create beautiful pots grand in scale graceful in form and burned bright in a blend of ash and salt With mastery achieved and apprentices to teach Daniel Johnston turned his brain to massive installations First he made a hundred large jars and lined them along the rough road that runs past his shop and kiln Next he arranged curving clusters of big pots inside pine frames slatted like corn cribs to separate them from the slick interiors of four fine galleries in succession Then in concluding the second phase of his professional career Daniel Johnston built an open air installation on the grounds around the North Carolina Museum of Art where 178 handmade wood fired columns march across a slope in a straight line 350 feet in length that dips and lifts with the heave while the tops of the pots maintain a level horizon In 2000 when he was still Mark Hewitt s apprentice Daniel Johnston met Henry Glassie who has done fieldwork on ceramic traditions in the United States Brazil Italy Turkey Bangladesh China and Japan Over the years during a steady stream of intimate interviews Glassie gathered the understanding that enabled him to compose this portrait of Daniel Johnston a young artist who makes great pots in the eastern Piedmont of North Carolina

Philosophy and Computing Thomas M. Powers,2017-10-26 This book features papers from CEPE IACAP 2015 a joint international conference focused on the philosophy of computing Inside readers will discover essays that explore current issues in epistemology philosophy of mind logic and philosophy of science from the lens of computation Coverage also examines applied issues related to ethical social and political interest The contributors first explore how computation has changed philosophical inquiry Computers are now capable of joining humans in exploring foundational issues Thus we can ponder machine generated explanation thought agency and other quite fascinating concepts The papers are also concerned with normative aspects of the computer and information technology revolution They examine technology specific analyses of key challenges from Big Data to autonomous

robots to expert systems for infrastructure control and financial services The virtue of a collection that ranges over philosophical questions such as this one does lies in the prospects for a more integrated understanding of issues These are early days in the partnership between philosophy and information technology Philosophers and researchers are still sorting out many foundational issues They will need to deploy all of the tools of philosophy to establish this foundation This volume admirably showcases those tools in the hands of some excellent scholars
