Mudrov, 2016-06-03 All too often religion is largely ignored as a driver of identity formation in the European context whereas in reality Christian Churches are central players in European identity formation at the national and continental level. Christian Churches in European Integration challenges this tendency highlighting the position of churches as important identity formers and actors in civil society. Analysing the role of Churches in engaging with two specific EU issues that of EU treaty reform and ongoing debates about immigration and asylum policy the author argues that Churches are unique participants in European integration. Establishing a comprehensive view of Christian Churches as having a vital role to play in European integration this book offers a substantial and provocative contribution both to our understanding of the European Union and the broader question of how religious and state institutions interact with one another.

*Advances in Applied Social Psychology* R. F. Kidd, M. J. Saks, 2013-08-21 First Published in 1983 This volume is the second in a series of volumes on applied social psychology. The contents of the contributions represent the richly diverse approaches and settings in which social psychology is being used. In preparing their chapters the contributors were asked to focus on how social psychologists as scientists and advocates could contribute to the resolution of the debates that often surround important social problems. Each author was asked to place his or her attempts to use social psychological knowledge in the context of his or her own specific problem. If one consistent theme emerges from this collection it is the emphasis on employing social psychology to enlighten and understand decisions at the level of public policy. This book is a vital display of how existing literature and methods in the field can work to illuminate and inform issues of national and even international importance.
