Department of Health, Education, and Welfare, 1973 Improving Quality of Care in Family Planning Jay Satia, Kavita Chauhan, 2018-05-09 In this book the authors review initiatives in improving the quality of care for family planning in India and bring them to the broader forum of policy level discussions The global Family Planning 2020 FP2020 framework argues for voluntary rights based family planning programmes The rights based approach builds on the bedrock of quality of care which means listening to what women want treating individuals with dignity and respect and ensuring that everyone has access to full information and high quality care Improving the quality of care in family planning services in a country like India is crucial from individual national and global considerations This book critically discusses and evaluates the various interventions undertaken so far and the reasons for success and failure It also synthesizes current research studies in India identifies gaps and presents a research agenda to bridge this gap and accelerate progress towards improving quality of care in family planning It presents a comprehensive framework that underscores the importance of health systems and community environments in creating enabling motivating and empowering roles for providers and clients The examples and perspectives presented in this book make a strong case for adoption into policy frameworks and scaling up of quality of care efforts and identifying research priorities for strengthening the response to family planning This book greatly contributes towards enhancing the quality of family planning care at the grass roots level in low resource settings and is of interest to researchers and practitioners of public health particularly community health maternal and child health and social work **Family**

Planning Operations Research James R. Foreit, Tomaš Frejka, 1998 **A Review of the HHS Family Planning Program** Institute of Medicine, Board on Children, Youth, and Families, Board on Health Sciences Policy, Committee on a Comprehensive Review of the HHS Office of Family Planning Title X Program, 2009-09-07 A Review of the HHS Family

Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970. The program successfully provides family planning services to its target audience of low income individuals but there is room for improvement. While the program's core goals are apparent, a secondary set of changing priorities has emerged without a clear evidence based strategic process. Also, funding for the program has increased in actual dollars but has not kept pace with inflation or increased costs. Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population. At the same time, the extent to which the program meets those needs cannot be assessed without a greater capacity for long term data collection. A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program as well as to demonstrate its direct contribution to important end results such as reducing rates of unintended pregnancy, cervical cancer, and infertility. The book will guide the Office of Family Planning toward improving the effectiveness of the program. Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning, policy makers, researchers, and professional organizations.

Population and Family Planning United States. President's Committee on Population and Family Planning, 1968 *The Global Family Planning Revolution* Warren C. Robinson, John A. Ross, 2007. The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade. From the 1950s to the 1970s, scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications. Private educational and philanthropic organizations, government and international organizations joined in the struggle to reduce fertility. Three decades later, this movement has seen changes beyond anyone's most optimistic dreams, and global demographic stabilization is expected in this century. The Global Family Planning Revolution preserves the remarkable record of this success. Its editors and authors offer more than a historical record. They discuss important lessons for current and future initiatives of the international community. Some programs succeeded while others initially failed, and the analyses provide valuable guidance for emerging health related policy objectives and responses to global challenges.
