RESEARCH METHODOLOGY Dr. Prakash Divakaran Achari, 2014-08-01 This book is based upon my understanding in research as an academic practitioner and educator. The difficulties faced in accepting research as an academic exposure about what was relevant and irrelevant in the field as a research practitioner, my development of the aptitude to successfully communicate difficult concepts in simple language without sacrificing precision and meticulousness as an educator, and discussion with experts in the same field is the basis of this book. Many aspects of methodology were supplementary on the basis of the response of the teachers of research methods from different regions. This experience has taken several forms including research-based teaching seminar projects and supervising numerous bachelor's and PhD theses. This work has helped me to discover which examples of other researchers' work most serve to inform what research is about.
