[Supporting Research Writing](#) Valerie Matarese, 2012-11-06 Supporting Research Writing explores the range of services designed to facilitate academic writing and publication in English by non native English speaking NNEST authors It analyses the realities of offering services such as education translation editing and writing and then considers the challenges and benefits that result when these boundaries are consciously blurred It thus provides an opportunity for readers to reflect on their professional roles and the services that will best serve their clients needs A recurring theme is therefore the interaction between language professional and client author The book offers insights into the opportunities and challenges presented by considering ourselves first and foremost as writing support professionals differing in our primary approach through teaching translating editing writing or a combination of those but with a common goal This view has major consequences for the

training of professionals who support English language publication by NNES academics and scientists Supporting Research Writing will therefore be a stimulus to professional development for those who support English language publication in real life contexts and an important resource for those entering the profession Takes a holistic approach to writing support and reveals how it is best conceived as a spectrum of overlapping and interrelated professional activities Stresses the importance of understanding the real world needs of authors in their quest to publish Provides insights into the approaches used by experienced practitioners across Europe

Multimodal Composing and Writing Transfer Kara Poe Alexander, Matthew Davis, Lilian W. Mina, Ryan P. Shepherd, 2024-02-15 Multimodal Composing and Writing Transfer explores transfer across various contexts of multimodal composing extending the early conversations connecting multimodality to writing Contributors address how writing transfer theories intersect with multimodal composing and present methods for facilitating transfer across modes and media offering insight into how writers can learn to compose when they encounter familiar modes in new contexts Over the past two decades the concepts of multimodal composing and writing transfer have grown and reshaped the nature of writing studies but rarely have the ways in which these areas overlap been studied This collection shows how this shift in writing studies has been mutually informative covering a wider range of contexts for multimodality and writing transfer than just in first year composition courses It places composition teaching practices and multimodal research in conversation with learning transfer theory to provide an in depth examination of how they influence one another Multimodal Composing and Writing Transfer develops these intersections to connect multimodal composition and writing practices across a wide array of fields and contexts Scholars across disciplines postsecondary writing teachers writing program administrators writing center directors and graduate students will find this collection indispensable
