Male Homosexual Behavior And The Effects Of Aids Education:

Male Homosexual Behavior and the Effects of AIDS Education B R Simon Rosser, 1991-11-30 Since the AIDS epidemic was recognized information on safer sex has been assumed to be the most crucial means of preventing further spread of the disease But how well has AIDS education worked What kinds of education work best and for whom This study is the first to provide an in depth analysis of the results of AIDS education programs and to explore the psychosocial factors that affect behavioral responses to education B R Simon Rosser provides a detailed profile of a specific population at risk including factors such as sexual behavior psychology religious affiliation legal status and discrimination Using comparative measures of behavior personality social status attitudes and risk taking he identifies important differences between homosexual men who engage in safer sex and those who do not Finally he evaluates the impact of different approaches to AIDS education Examining both positive and negative effects Rosser shows that the spread of the HIV virus was actually accelerated by a national education campaign utilizing fear and contrasts this result with four international gay sensitive education campaigns that produced positive changes in behavior and lifestyle He discusses ways in which AIDS education must develop in order to become more effective together with crucial changes that are needed in both the gay population and the larger community if HIV transmission is to be halted This study is a valuable resource for education and research in AIDS prevention sexual behavior psychovenereology education health and related disciplines **AIDS Bibliography** ,1994-12 *Gay Community Survival in the New Millennium* Michael R Botnick, 2021-06-03 Understand the international challenges facing gay male societies This eye opening account examines the idealistic structural and emotional meanings of community within the gay population *Gay Community Survival in the New Millennium* explores the concept of gay community as well as the problems and progress that these communities are facing in the United States Canada and Israel As a community leader gay rights advocate or policymaker you will gain insight into issues that must be addressed now in order to strengthen your own community *Gay Community Survival in the New Millennium* explores many of the fractures in gay society that must be addressed to ensure progress in the gay liberation movements including racial and ethnic divisions in the gay community especially based on HIV positive and HIV negative status and programs that work to bridge this gap the rift between HIV positive and HIV negative gay men based on the allocation of money for social programs meant to support entire gay communities AIDSphobia the irrational fear of contracting the virus and how it has affected gay communities the Israeli gay rights movement which is visibly pursuing full and equal citizenship in Israel including acceptance into the Israeli military projections for gay rights movements in the future if homophobia continues to exist the enormous power that would be created if all gay and AIDS social organizations in a given geographic region banded together to influence change in social policies and eliminate stereotypes *Gay Community Survival in the New Millennium* explores what it means to be a gay man in today s communities from the fear of AIDS and the need for financing of gay men s social programs to forming a collective

organization that will work for the gay men's liberation movements This essential guide will provide you with suggestions to help you shape and successfully change your gay community

Preventing HIV in Developing Countries Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control

Worlds in Collision Laurie Guy, 2002 The period from 1960 to 1986 was distinguished by the debate over decriminalization of sexual acts between males In the 1960s homosexual men faced prison sentences if they were sexually active and so they made themselves invisible By 1986 they were demanding their rights and the nation s attention This change had come after years of debate The New Zealand Homosexual Law Reform Society and the gay liberation movement actively sought reform Many within society actively opposed it and the issue became a catalyst for a significant rift in the churches Intense lobbying and vehement opposition marked the fifteen months before the Homosexual Law Reform Bill was passed in July 1986 Based on 22 interviews with important participants in the debates as well as extensive research in archives and published material Worlds in Collision is the first time this important story has been told It is a major contribution not only to the international literature on the history of homosexuality but also to our understanding of New Zealand society in the later twentieth century

Women at Risk Ann O'Leary, PhD, Loretta Sweet Jemmott, 2013-06-29 AIDS is the fourth leading cause of death among women of childbearing age and is increasing by about 8% a year in this group And yet our understanding of the impact of HIV and AIDS on women s lives remains fragmented and incomplete After a decade of struggling with mounting surveys of risk behavior clinical trials and behavioral interventions that were based primarily on experience with gay communities in large cities and subsequently on the needs of injection drug users we have not given programs for women the attention they require if they are to be meaningful effective and gender appropriate This book will introduce the reader to the range of complex issues of HIV and AIDS in women s lives Ann O Leary and Loretta Sweet Jemmott have assembled an impressive list of authors who have contributed chapters from different disciplinary viewpoints The reader will find information on prevention programs that have been effective for adolescent girls on culturally specific strategies for African American and Latina women and on the multiple issues of substance use and HIV that need to be faced by any outreach and intervention programs for drug using women

Disputing the Subject of Sex Cris Mayo, 2007-04-26 Sexuality remains a hotly debated subject nowhere more so than in education This perceptive and balanced book shows that discussions of sexuality and schooling can be simultaneously polarizing and democratizing Disputing the Subject of Sex examines controversies over sex AIDS and gay inclusive multicultural education which offer especially fruitful opportunities to explore the claims of various identities the social aims of public schools and the relation between schools and the publics they serve These controversies help to show the kind of confused tumble of discourses seemingly nonsensical policy decisions and student resistances that are born of arguments over sexuality and community membership In part disputes over sexuality are driven by conservative and anti pluralist agendas that help

communities draw strong lines around themselves in an effort to stave off what they perceive as threatening shifts in gender and sexual identity. However, these disputes are also democratizing, allowing a variety of constituents to argue their case in the public sphere. Rather than choosing between one of these two positions, this book uses case studies, interviews with queer youth, and analysis of curricular texts to help readers understand how power dynamics play out in educational controversies and how they can guide us to new ideas about students' abilities to learn and relate ethically to one another about the subject of sex.

Interventions to Prevent HIV Risk Behaviors Peggie S. Tillman, 1996 *De Los Otros* Joseph Carrier, 1995 A detailed description of sexual practices and bonds among Latino males in Guadalajara, Mexico, using a combination of ethnographic techniques and participant observations.

How effective is AIDS education? United States Congress. Office of Technology Assessment, 1988 *Biomedical Index to PHS-supported Research*, 1991

How Effective is AIDS Education?, 1988 *Preventing AIDS* Ralph J. DiClemente, John L. Peterson, 1994-03-31 This is the first comprehensive review and examination of the effectiveness of behavioral interventions to reduce HIV-related high-risk behaviors. It describes current theoretical models and empirical studies of behavioral interventions, details the state of the art of behavioral intervention strategies for high-risk populations, and identifies limitations and gaps in prior research and discusses implications for future investigations. This vital text will help researchers and clinicians plan, develop, and evaluate behavioral change approaches to HIV prevention.

Men's Health and Illness Donald Sabo, David F. Gordon, 1995-08-30 The reader, whether a professional health care worker, researcher, clinician, or concerned individual, will obtain a clearer perspective on the connections between men's health and gender along with a broader conceptualization of the experiences of men in contemporary society. *Choice Men's Health and Illness* contextualizes men's health issues within the broader theoretical framework of the new men's studies. This framework focuses on the profound influence of gender on social life and individual experience. The editors and chapter contributors of this groundbreaking volume argue that gender is a key factor for understanding the patterns of men's health risks, the ways men perceive and use their bodies, and men's psychological adjustment to illness itself. Part I introduces readers to men's studies perspectives and explains their relevance for understanding men's health. Part II explores the linkages between traditional gender roles, men's health, and larger structural and cultural contexts, and Part III examines the implications of multiple masculinities for health issues. The scope of this volume is both multidisciplinary and international. The authors use quantitative and qualitative research methodologies which provide a well-rounded analysis of the subject matter. Taken collectively, the contributions to *Men's Health and Illness* reflect current efforts by men's studies practitioners to develop theoretical explanations of men's lives that also refer to the influences of class, race, ethnicity, sexual preference, and age. This collaborative effort in presenting research and theories is so significant that it should become part of the literature studied by advocates of women's studies and men's studies. The reader

whether professional healthcare worker researcher clinician or concerned individual will obtain a clearer perspective on the connections between men's health and gender along with a broader conceptualization of the experiences of men in contemporary society Upper division undergraduate through professional Choice *The Social Psychology of HIV Infection* John B. Pryor, Glenn D. Reeder, 2015-06-19 In the early 1980s we witnessed the birth of one of the most complex and perplexing social problems faced by modern society the epidemic of infection with human immunodeficiency virus HIV which causes acquired immunodeficiency syndrome AIDS Originally published in 1993 this title looks at the social psychology surrounding HIV and AIDS The organization of the volume centres upon two themes The Theoretical Roots of Prevention and The Dilemma of the PWA person with AIDS The goal of this volume is not to evaluate previous attempts to answer these social problems but to provide theoretical analyses of some of the basic sociopsychological processes that underlie the problems Over 20 years on this is a snapshot of research into HIV and AIDS and attitudes of the time looking at social problems that are very much still with us
