Tomas Hamilton,2025-01-22 Despite the establishment of UN embargoes the Arms Trade Treaty ATT and the EU Common Position arms export regulation suffers from significant legal and practical limitations This book critically evaluates the existing body of Arms Trade Law highlighting its inadequacies in preventing weapons from reaching perpetrators of mass violence Drawing on interviews participant observation and empirical research to assess the perspectives of judges and lawyers it also explores the International Criminal Court s narrow focus on prosecuting political and military leaders Arguing that institutional attitudes and commitments contribute to a legal culture that obscures the potential for an arms trader case the book illustrates these dynamics through a case study of the UN Security Council s response to the Second Congo War and the ICC s investigations in the DRC Situation elucidating missed opportunities to enforce accountability against the entire spectrum of actors responsible for international crimes Through detailed examination of the arms trade s complexities The Arms Trade and International Criminal Law foregrounds the structural causes of atrocity and argues for broader accountability It investigates how individuals including corporate executives state officials and arms traffickers can be held directly accountable for atrocities under international law even when their actions are geographically or causally distant from the violence itself Furthermore by advancing a specific interpretation of the actus reus and mens rea elements of accomplice liability under Article 25 of the Rome Statute this book argues for a robust legal basis upon which the ICC can prosecute arms traders It therefore underscores how international criminal law can complement existing regulations by leveraging its expressive function to condemn all those who profit from atrocity **Explaining and Influencing Chinese**

Diplomatic Interventions K. Fierke, 2005-04-22 Diplomatic Interventions argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look at again from a new angle at international practice
