Markets and Ideology in the City of London David Lazar, 2016-07-27 Markets and Ideology in the City of London is the first fieldwork based sociological study of how participants in City of London financial markets view the markets in which they work and the market mechanism in general But it is more than a narrow study of financial market participants because it is also an empirical investigation into how ideologies function and it develops a critique of pro market ideologies such as Thatcherism Finally it is one of a small number of sociological studies into the privileged world of high earners and the wealthy sociologists too frequently study the powerless and the deviant or marginal groups **The Re-Emergence of**

Producing Early Modern London Kelly J. Stage,2018-01-01 Early seventeenth century London playwrights used actual locations in their comedies while simultaneously exploring London as an imagined ephemeral urban space Producing Early Modern London examines this tension between representing place and producing urban space In analyzing the theater s use of city spaces and places Kelly J Stage shows how the satirical comedies of the early seventeenth century came to embody the city as the city embodied the plays Stage focuses on city plays by George Chapman Thomas Dekker William Haughton Ben Jonson John Marston Thomas Middleton and John Webster While the conventional labels of city comedy or citizen comedy have often been applied to these plays she argues that London comedies defy these genre categorizations because the ruptures expansions conflicts and imperfections of the expanding city became a part of their form Rather than defining the city comedy comedy in this period proved to be the genre of London As the expansion of London s social space exceeded the strict confines of the square mile the city burgeoned into a new metropolis The satiric comedies of this period became in effect playgrounds for urban experimentation Early seventeenth century playwrights seized the opportunity to explore the myriad ways in which London worked taking the expected a romance plot a typical father son conflict a cross dressing

intrigue and turning it into a multifaceted complex story of interaction and proximity **Freedom Is Power** Lawrence Hamilton,2014-07-31 Using the history of political thought and real world political contexts including South Africa and the recent global financial crisis this book argues that power is integral to freedom It demonstrates how freedom depends upon power and contends that liberty for all citizens is best maintained if conceived as power through political representation Against those who de politicise freedom through a romantic conception of the people and faith in supposedly independent judicial and political institutions Lawrence Hamilton argues that real modern freedom can only be achieved through representative and participative mechanisms that limit domination and empower classes and groups who become disempowered in the conflicts that inevitably pervade politics This is a sophisticated contribution to contemporary political theory that will be of interest to scholars and students of history politics philosophy economics sociology development studies and Southern African studies **The Building Society Promise** Antoninus Samy,2016-08-18 The permanent building societies of England grew from humble beginnings as a multitude of small and localized institutions in the nineteenth century to become the dominant players in the house mortgage market by the inter war period Throughout the nineteenth and early twentieth centuries the movement cultivated an image of being a champion of home ownership for the working classes but housing historians have questioned whether building societies really lived up to this claim This study fills a major gap in the historiography of the movement by investigating the class profile of building society members and how the design of different building societies affected their accessibility efficiency and risk taking practices between 1880 and 1939 These themes are explored using case studies of several building societies from this period and drawing upon extensive archival records The Building Society Promise shows that building societies did lend to working class households before the First and Second World Wars with some societies showing a greater commitment to working class home ownership than others What ultimately affected the outreach of individual societies was the quality of information they possessed which in turn was largely determined by the types of agency networks they used to find and select borrowers The phenomenal growth of some of these institutions in the inter war period however and the ensuing competition which emerged between them brought about profound changes in their firm structure which impaired their ability to reach out to lower income households as efficiently as before The findings of this research are relevant to both past and present debates about the optimal design of financial institutions in overcoming social exclusion in credit markets and the deleterious effects that firm growth market competition and managerial self interest can have on their performance and stability **Visions of a Digital Nation** Jacob Ward,2024-02-06 Why the privatization of British Telecom signaled a pivotal moment in the rise of neoliberalism and how it was shaped by the longer development and digitalization of Britain s telecommunications infrastructure When Margaret Thatcher sold British Telecom for 3 6 billion in 1984 it became not only at the time the largest stock flotation in history but also a watershed moment in the rise of neoliberalism and deregulation In Visions of a Digital Nation Jacob Ward offers an

incisive interdisciplinary perspective on how technology prefigured this pivot Giving due consideration to the politicians engineers and managers who paved the way for this historic moment Ward illustrates how the decision validated the privatization of public utilities and tied digital technology to free market rationales In this examination of the national and at times global history of technology Ward s approach is sweeping Utilizing infrastructure studies environmental history and urban and local history Ward explores Britain s nationalist and welfarist plans for a digital information utility and shows how these projects contested and adapted to the market turn under Margaret Thatcher Ultimately Visions of a Digital Nation compellingly argues that politicians did not impose neoliberalism top down but that technology engineers and managers shaped these politics from the bottom up

Wall Street's Assault on Democracy Georges Ugeux,2023-11-22 On November 24 2020 in the midst of a global pandemic the Dow Jones Index surpassed 30 000 points for the first time ever This historic moment exposed the incredible disconnect between financial markets and society The stock market s one hundred percent rebound was triggered by a massive injection of capital by the US Federal Reserve and by fiscal stimulus measures that reached 16 trillion globally in only a year It was the taxpayer who came to the aid of the shareholders This imbalance between low and high income individuals has become unbearable and calls into question the mechanisms that allow such an abuse of financial power to exist This abuse has allowed populism to flourish in a world where humanism should prevail This book invites the reader to understand how such a financial drift of capitalism was even possible and proposes reforms to correct the system Written by the former Group Executive Vice President for International Research at the New York Stock Exchange this volume provides concrete solutions for democratizing financial markets and reintroducing the morals and ethics that these markets and its leaders are so sorely lacking Ugeux argues that the purpose of such reforms is to reduce the inequalities which are plaguing our democracies Citizens are losing hope that equity exists in the system and it has become clear as fundamental liberties like right voting rights are being threatened that the problem lies much deeper Ugeux insists that a change of perspective and a redefinition of societal goals is essential social and solidarity capitalism is

possible only if our leaders listen to the expectations of their citizens While it is supported by research and facts this book includes elements of opinion essays with an educational objective It aims to educate readers who want to better understand these complex issues without having to be specialists Urban Land and Property Markets in the United Kingdom Richard Williams, Barry Wood, 2018-05-20 Originally published in 1994 Urban Land and Property Markets in the United Kingdom adopts a perspective that encompasses the distinctive nature of the legal framework land law property market and procedures of Scotland England and Wales The book provides detailed accounts of the structure of property planning and tax law governing urban land and property markets registration procedures and transactions charges market processes and how they all work in practice The book is based on a report commissioned by the German Federal Government as part of a five country study completed in 1991 **What's Next?** David Hale, Lyric Hale, 2011-01-01 The world spins in economic turmoil and who can tell what will happen next Cold numbers and simple statistical projections don't take into account social financial or political factors that can dramatically alter the economic course of a nation or a region In this unique book more than twenty leading economists and experts render thorough rigorously researched prognoses for the world's major economies over the next five years Factoring in such varied issues as the price of oil the strength of the U S dollar geopolitics tax policies and new developments in investment decision making the contributors ground their predictions in the realities of current events political conditions and the health of financial institutions in each national economy The most comprehensive volume on the global economy available today this book presents up to date research on Russia Australia Europe sub Saharan and South Africa the major Asian economies North America and the largest economies of Latin America With unsurpassed expertise the authors explain what's going on in individual countries how important current global issues will impact them and what economic scenarios they most likely will face in upcoming years **The City** Tony Norfield, 2016-04-12 Radical insider's account of how the city of London really works The City as London's financial centre is known is the world's biggest international banking and foreign exchange market shaping the development of global capital It is also as this groundbreaking book reveals a crucial part of the mechanism of power in the world economy Based on the author's twenty years experience of City dealing rooms The City is an in depth look at world markets and revenues that exposes how this mechanism works All big international companies not just the banks utilise this system and The City shows how the operations of the City of London are critical both for British capitalism and for world finance Tony Norfield details with shocking and insightful research the role of the US dollar in global trading the network of British linked tax havens the flows of finance around the world and the system of power built upon financial securities Why do just fifty companies now have control of a large share of world economic production The City explains how this situation came about examining the history of the world economy from the postwar period to the present day If you imagine you don't like finance but have no problem with the capitalist market system think again it turns out the two cannot be separated **The British Regulatory State**

Michael Moran, 2003 For the first two thirds of the twentieth century British government was among the most stable in the advanced industrial world In the last three decades the governing arrangements have been in turmoil and the country has been a pioneer in economic reform and in public sector change In his major new book Michael Moran examines and explains the contrast between these two epochs What turned Britain into a laboratory of political innovation Britain became a formal democracy at the start of the twentieth century but the practice of government remained oligarchic From the 1970s this oligarchy collapsed under the pressure of economic crisis The British regulatory state is being constructed in its place Moran challenges the prevailing view that this new state is liberal or decentralizing Instead he argues that it is a new threatening kind of interventionist state which is colonizing dominating and centralizing hitherto independent domains of civil society The book is essential reading for all those interested in British political development and in the nature and impact of regulation

Crime In Context Ian Taylor, 2019-04-03 At the end of the twentieth century the bookstores are full of books on crime though this title will certainly not find a place on the same shelves In the massive Waterstones bookstore in the city of Manchester England where I lived through most of the 1990s the ground floor display area was rearranged in 1995 so as to accommodate right at the front of the store several hundred new titles on topics like Serial Murderers and Sexual Crimes of the Twentieth Century 1 Several of these new books are companion volumes to movies on release in the city's cinemas or in some instances are simply the original text on which the movies are based The movies in question Shallow Grave Silence of the Lambs Reservoir Dogs Natural Born Killers and others focus heavily on interpersonal violence and murder and also place great emphasis in the manner of many earlier cinematic genres on the idea of the criminal mind not least as a way of dramatizing the detection of the originating criminal act but also to a significant extent these are movies which emphasize the idea and contemporary social presence of evil Similar moral and psychologistic preoccupations are now also widely apparent on primetime television most notably in Britain in the extraordinarily powerful Cracker series produced by Granada Television in 1994 and 1995 watched by over 15 million people and featuring inter alia the forensic investigation of serial and sexual murders some of them extremely graphically displayed Crace 1994 2 The prominence of Gothic themes in movies about violent death is not new in itself there is a long history of interest in the cinema in horror and indeed in transgression and evil What may be definitive about the present genre of movies as well as the range of fictional and non fictional titles in the bookstores about crime is the overwhelming focus on murder and killing represented in very contemporary and mundane ordinary and indeed respectable settings and the powerful suggestion that these movies are a representation of the risks and dangers involved in everyday life at the end of the twentieth century The bookstore display in Waterstones is straightforwardly called the Real Crimes section
