Markets Civil Society Democracy In Ken:

Markets, Civil Society and Democracy in Kenya Peter Gibbon,1995 Focuses on three of the most important dimensions of grassroots development and change in the country over the last decade and a half continuity and transformation in the cereals marketing chain the centrepiece of World Bank European Community and USAID efforts during the 1980s and early 1990s to liberalize Kenyan economic institutions on the basis of aid conditionality the nature and political role of local level development institutions before and after the re emergence of multi party politics in 1991 92 and the complex relation between recent political developments and religious organizations *Readings in African Politics* Tom Young,2003 Table of contents

Common Security and Civil Society in Africa Lennart Wohlgemuth,1999 This book is the outcome of a conference on common security and civil society in Africa The contributions seek to go beyond the war of images to imagine a different and more secure future They are concerned with five different themes economic and social change prevention of violent conflicts the causes of conflict political security and the international politics of development partnership *Church, State and Society in Kenya* Galia Sabar,2012-12-06 This volume offers a debate on the role of Christianity in post colonial Kenya charting the role of the church state and society in the transformation of Kenya and the relationship between the three It shows how the church initiated health education and economic activities showing it to be a major instrument of transformation

The Politics of Opposition in Contemporary Africa Adebayo O. Olukoshi,1998 In South Africa Michael Neocosmos

The Political Economy of Development and Underdevelopment in Africa Toyin Falola,Jessica Achberger,2013-06-07 While Africa is too often regarded as lying on the periphery of the global political arena this is not the case African nations have played an important historical role in world affairs It is with this understanding that the authors in this volume set out upon researching and writing their chapters making an important collective contribution to our understanding of modern Africa Taken as a whole the chapters represent the range of research in African development and fully tie this development to the global political economy African nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development

Cross-border Trade and the Parallel Currency Market Yahaya Hashim,Kate Meagher,1999 The authors of this study challenge the assumptions of the World Bank that the expansion in informal cross border trade is a vindication of the market liberalizing thrust of structural adjustment and that adjustment policies have improved the effectiveness of an independent bourgeoisie that is emerging out of this trade as an agent of regional integration Instead they make the case for the adoption of what they call a development approach for tapping the benefits of the informal currency markets as an alternative to the market coercion of structural adjustment

Human Rights and Good Governance Hans-Otto Sano,Gudmundur Alfredsson,Robin Clapp,2021-08-04 This

volume the result of an ongoing Nordic research project undertaken under the auspices of the Danish Centre for Human Rights in Copenhagen and the Raoul Wallenberg Institute for Human Rights and Humanitarian Law in Lund examines the relationship and possible interaction between good governance and human rights The contributors consist of academics and professionals with backgrounds in development studies economics law political science and sociology Together they demonstrate the need for interdisciplinary dialogue and clarification of concepts contents and processes of realisation While good governance is mainly pursued in a development context it is a central message of the book that good governance guidelines ought to have universal applicability affecting international organisations and public and private actors in Northern as well as Southern countries Yet an established consensus does not exist on how good governance and human rights can or should complement each other The book therefore assesses the advantages of using existing links and identifies ways of building new bridges for mutual support between governance and human rights The authors examine their topics on the basis of theory best practices law the experiences of societies undergoing democratic transition and other empirical evidence without attempting to come up with a common definition of good governance The plurality of interpretations will hopefully further strengthen good governance and human rights as integral elements of a global agenda

States, Scarcity, and Civil Strife in the Developing World Colin H. Kahl, 2018-06-05 Over the past several decades civil and ethnic wars have undermined prospects for economic and political development destabilized entire regions of the globe and left millions dead States Scarcity and Civil Strife in the Developing World argues that demographic and environmental stress the interactions among rapid population growth environmental degradation inequality and emerging scarcities of vital natural resources represents one important source of turmoil in today's world Kahl contends that this type of stress places enormous strains on both societies and governments in poor countries increasing their vulnerability to armed conflict He identifies two pathways whereby this process unfolds state failure and state exploitation State failure conflicts occur when population growth environmental degradation and resource inequality weaken the capacity legitimacy and cohesion of governments thereby expanding the opportunities and incentives for rebellion and intergroup violence State exploitation conflicts in contrast occur when political leaders themselves capitalize on the opportunities arising from population pressures natural resource scarcities and related social grievances to instigate violence that serves their parochial interests Drawing on a wide array of social science theory this book argues that demographically and environmentally induced conflicts are most likely to occur in countries that are deeply split along ethnic religious regional or class lines and which have highly exclusive and discriminatory political systems The empirical portion of the book evaluates the theoretical argument through in depth case studies of civil strife in the Philippines Kenya and numerous other countries The book concludes with an analysis of the challenges demographic and environmental change will pose to international security in the decades ahead

Kenya Charles Hornsby, 2013-03-01 Since independence from Great Britain in 1963 Kenya has survived five decades as a

functioning nation state holding regular elections its borders and political system intact and avoiding open war with its neighbours and military rule internally It has been a favoured site for Western aid trade investment and tourism and has remained a close security partner for Western governments However Kenya's successive governments have failed to achieve adequate living conditions for most of its citizens violence corruption and tribalism have been ever present and its politics have failed to transcend its history The decisions of the early years of independence and the acts of its leaders in the decades since have changed the country's path in unpredictable ways but key themes of conflicts remain over land money power economic policy national autonomy and the distribution of resources between classes and communities While the country's political institutions have remained stable the nation has changed its population increasing nearly five fold in five decades But the economic and political elite's struggle for state resources and the exploitation of ethnicity for political purposes still threaten the country's existence Today Kenyans are arguing over many of the issues that divided them 50 years ago The new constitution promulgated in 2010 provides an opportunity for national renewal but it must confront a heavy legacy of history This book reveals that history Development Centre Studies Conflict and Growth in Africa Kenya, Tanzania and Uganda Volume 2 Klugman Jeni, Neyapti Bilin, Stewart Frances, 1999-11-23 This is a book about conflict It identifies aggravating economic factors proceeds to an appreciation of its economic cost then proposes economic policy changes for Kenya Tanzania and Uganda Democratization in the Third World Lars Rudebeck, Olle Törnquist, Virgilio Rojas, 2016-07-27 Democratization in the Third World addresses many current issues of development democratization and civil society in countries in Asia Africa and Latin America against the background of theoretical introductions and comparisons with the Swedish historical experience of democratisations The authors from seven different continents examine civil society and its relation to the state throughout the world and assess prospects for sustainable democratization I Say to You Gabrielle Lynch, 2011-09-26 In 2007 a disputed election in Kenya erupted into a two month political crisis that led to the deaths of more than a thousand people and the displacement of almost seven hundred thousand Much of the violence fell along ethnic lines the principal perpetrators of which were the Kalenjin who lashed out at other communities in the Rift Valley What makes this episode remarkable compared to many other instances of ethnic violence is that the Kalenjin community is a recent construct the group has only existed since the mid twentieth century Drawing on rich archival research and vivid oral testimony I Say to You is a timely analysis of the creation development political relevance and popular appeal of the Kalenjin identity as well as its violent potential Uncovering the Kalenjin's roots Gabrielle Lynch examines the ways in which ethnic groups are socially constructed and renegotiated over time She demonstrates how historical narratives of collective achievement migration injustice and persecution constantly evolve As a consequence ethnic identities help politicians mobilize support and help ordinary people lay claim to space power and wealth This kind of ethnic politics Lynch reveals encourages a sense of ethnic difference and competition which can spiral into violent confrontation and retribution *The*

International Politics of East Africa Robert Pinkney, 2001 This book uses the notion of the public sphere to produce a new view of the history of England in the post reformation period tracing its themes from the 1530s to the early eighteenth century The contributors who are all leaders in their own fields bring a diverse range of approaches to bear on the central theme The book aims to put the results of some of the most innovative and exciting work in the field before the reader in accessible form Each chapter stands alone in representing an important contribution to its own area of study and sub period as well as to the overall argument of the book Politics culture and religion all feature prominently in the resulting analysis which should be of interest to students and academics of early modern English history and literature Political Protest in Contemporary Kenya Jacob Mwathi Mati, 2020-02-04 This book analyses the emergence strategies and outcomes of the struggle to embed democratic governance and constitutional order in Kenya showcasing both the power and the limits of citizen agency in the struggle to transform a postcolonial African state Utilising data from primary interviews media and existing literature this book analyses the emergence diffusion operational strategies and outcomes of Kenyan constitutional reform struggles with a view to highlighting both the power and limits of social movement in transforming a postcolonial African state It engages intersections of social movement and theories of democratisation to probe the production operations and outcomes of the disruptive yet creative power of the movements at the centre of the struggle to transform the Kenyan constitution The book also appraises the meanings of and developments after the promulgation of the 2010 constitution with a view to illuminating the prospects for a transformative democratic political order in Kenya This book is a useful tool in understanding the struggles specific to Kenya but also offers insights into other democratic struggles on the African continent and beyond This book will be of interest to students and scholars of social movements and political change in Africa in general and Kenya in particular Between Militarism and Technocratic Governance Anders Sjögren, 2013 State civil society relations in Africa have during recent decades been transformed in the context of economic liberalisation and state reform This study explores state civil society relations in contemporary Uganda from 1986 to the present in order to illustrate and explain the scope for and capacity of different social forces to create access to and democratise the state The study interrogates state civil society relations under the incumbent National Resistance Movement government as these are expressed through forms of interest representation and conflict regulation in different political arenas It analyses this problem through an empirical study of the health sector at both national and local levels Changes in the health regime the rules and practices that regulate health politics are analysed by a historical reconstruction of how different health regimes evolved from demands from social forces on the colonial and post colonial state in relation to broader patterns of political change The ruling political coalition from 1986 has promoted a model for capitalist development based on donor driven economic growth institutional reform and political monopoly what is referred to in the study as technocratic governance Throughout however the technocratic tendency has been shaped in relation to the political economy of militarism as a more

openly repressive form of authoritarian rule The study argues that limits to democratisation of state society relations within the health sector and of Ugandan politics at large are best explained by relations of domination in society within the state and among external political forces The main conclusion is that democratisation of the state has been resisted by ruling groups and therefore restricted

Civil Society in Africa Christine Bodewes, 2014-01-03 This book examines the efforts of one particular civil society organization the human rights ministry of a Catholic parish located in the Kibera slum in Nairobi to determine the extent to which it was able to promote democracy human rights and the rule of law It concludes from an analysis of the social economic and political environment of Kibera as well as church structures that parishioners demonstrated an observable improvement in their democratic values and behavior at a localized level but they did not increase their involvement in advocacy and lobbying efforts Parishioners were inhibited from holding government officials to account for their abuse of power primarily due to fears of retaliation other factors such as apathy ethnic divisions limited resources and restrictive church protocols further curtailed their actions The findings of this book are important for scholars and students active in the fields of political science African Christianity development studies international law and human rights This book is also an important resource for practitioners who are addressing the social legal political challenges facing the urban poor in Africa

Giving to Help, Helping to Give Tade Akin Aina, 2013-08-01 The past decade has seen a flowering of philanthropic activities across many parts of Africa Unlike before this flowering has the distinct character of African agency energy and engagement Philanthropy is no longer about narratives of passive poor and miserable Africans receiving help from rich fortunate and often Western outsiders The emerging narratives about philanthropy in Africa are about an increasingly confident and knowledgeable assertion of African capacities to give not only to help but also to transform and seek to address the root causes of injustice want ignorance and disease The narratives are also about the increasing questioning of the role and place of Africans in the world s philanthropic traditions and what constitutes African specificities but also African differences and varieties This book is about African philanthropic experiences their varieties challenges and opportunities It is about documenting investigating describing questioning and reflecting on philanthropy in Africa Because Africa is not a monolithic entity with one single history cultural political and economic experience this ground breaking book rightly tackles the varied modes forms vehicles and means in which the philanthropic experiences are expressed in Africa It is a pioneering and ambitious effort in a field and community of practice that is new both in terms of scholarship and in professional practice Many of the chapters boldly engage the burden of reflections questions ambivalences and ambiguities that one often finds in an emerging field innovatively positing the outlines concepts frameworks and theories of scholarship and practice for a field critical to development on the continent

Politics, Public Policy and Social Protection in Africa Nicholas Awortwi, Emmanuel Aiyede, 2017-05-08 Africa is now in a much improved position to support its poor and vulnerable people It has more money more policy commitment and abundant intervention programmes Yet the

number of citizens living lives of desperation or at risk of destitution is at an all time high and still rising What is turning such positive prospects into such a disappointing result Politics Public Policy and Social Protection in Africa reveals key answers drawing on empirical studies of cash transfer programmes in Botswana Ghana Kenya Nigeria and Uganda Social cash transfer might be the most effective safety net formula to emerge so far The country chapters in this book explore why it works and how it might be harnessed for poverty alleviation The studies uncover the very different motives of donors politicians and the poor themselves for making it their preferred choice why governments are not expanding the donor driven pilot programmes as expected and why ruling elites are not trying to help or hinder a concept which on the face of it could derail one of their most lucrative gravy trains This book will be of value and interest to researchers and students of African politics African social policy and sociology as well as policy maker and donors
