The colonisation of time Giordano Nanni, 2020-10-20 The Colonisation of Time is a highly original and long overdue examination of the ways that western European and specifically British concepts and rituals of time were imposed on other cultures as a fundamental component of colonisation during the nineteenth century Based on a wealth of primary sources it explores the intimate relationship between the colonisation of time and space in two British settler colonies Victoria Australia and the Cape Colony South Africa and its instrumental role in the exportation of Christianity capitalism and modernity thus adding new depth to our understanding of imperial power and of the ways in which it was exercised and limited All those intrigued by the concept of time will find this book of interest for it illustrates how western European time s rise to a position of global dominance from the clock to the seven day week is one of the most pervasive enduring and taken for granted legacies of colonisation in today s world

Scandalous Error C. Philipp E. Nothaft, 2018 The Gregorian calendar reform of 1582 which provided the basis for the civil and Western ecclesiastical calendars still in use today has often been seen as a triumph of early modern scientific culture or an expression of papal

ambition in the wake of the Counter Reformation Much less attention has been paid to reform s intellectual roots in the European Middle Ages when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied before 1500 For centuries prior to the Gregorian reform astronomers mathematicians theologians and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace Scandalous Error is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical astronomical problem to medieval society and details the often sophisticated ways in which computists and churchmen reacted to this challenge By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the fifteenth century the volume offers substantial new insights on the place of exact science in medieval culture Calendrical Calculations Nachum Dershowitz,Edward M. Reingold,2008 Expanded coverage includes generic cyclical calendars astronomical lunar calendars and the Korean Vietnamese Aztec and Tibetan calendars **Chasing the Sun** Richard Cohen,2011-08-04 The Sun is so powerful so much bigger than us that it is a terrifying subject Yet though we depend on it we take it for granted Amazingly the first book of its kind CHASING THE SUN is a cultural and scientific history of our relationship with the star that gives us life Richard Cohen applying the same mix of wide ranging reference and intimate detail that won outstanding reviews for By the Sword travels from the ancient Greek astronomers to modern day solar scientists from Stonehenge to Antarctica site of the solar eclipse of 2003 when penguins were said to sing Mexico s Aztecs to the Norwegian city of Tromso where for two months of the year there is no Sun at all He introduces us to the crucial sunspot cycle in modern economics the religious dances of Indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and Galileo recording his discoveries in code for fear of persecution And throughout there is the rich Sun literature from the writings of Homer through Dante and Nietzsche to Keats Shelley and beyond Blindingly impressive and hugely readable this is a tour de force of narrative non fiction **Calendrical Calculations Millennium Edition** Edward M. Reingold,Nachum Dershowitz,2001-08-06 This book makes accurate calendrical algorithms readily available for computer use **The A to Z of Everyday Things** Janice Weaver,2012-07-10 Why are Americans superstitious about two dollar bills Why do we have twelve months in a year instead of ten or six or even twenty Why do we celebrate foolishness on the first day of April Why is yawning contagious Why is the number thirteen considered to be unlucky in so many different cultures The A to Z of Everyday Things tells the surprising stories behind twenty six seemingly ordinary objects and activities From calendars and money to tulips and sideburns this book uses commonplace items to explore the rich but often overlooked cultural history of

our everyday lives In the end *The A to Z of Everyday Things* offers us a picture of modern life and how we got here in a funny quirky and highly readable form

The Politics and Poetics of Cicero's Brutus Christopher S. van den Berg, 2023-07-20 Cicero's *Brutus* 46 BCE a tour de force of intellectual and political history was written amidst political crisis Caesar's defeat of the republican resistance at the battle of Thapsus This magisterial example of the dialogue genre capaciously documents the intellectual vibrancy of the Roman Republic and its Greco Roman traditions This book studies the work from several distinct yet interrelated perspectives Cicero's account of oratorical history the confrontation with Caesar and the exploration of what it means to write a history of an artistic practice Close readings of this dialogue including its apparent contradictions and tendentious fabrications reveal a crucial and crucially productive moment in Greco Roman thought Cicero this book argues created the first nuanced sophisticated and ultimately modern literary history crafting both a compelling justification of Rome's oratorical traditions and also laying a foundation for literary historiography that abides to this day This title is also available as Open Access on Cambridge Core

A History of American Puritan Literature Kristina Bross, Abram Van Engen, 2020-10-15 For generations scholars have imagined American puritans as religious enthusiasts fleeing persecution finding refuge in Massachusetts and founding America The puritans have been read as a product of New England and the origin of American exceptionalism This History challenges the usual understanding of American puritans offering new ways of reading their history and their literary culture Together an international team of authors make clear that puritan America cannot be thought of apart from Native America and that its literature is also grounded in Britain Europe North America the Caribbean and networks that spanned the globe Each chapter focuses on a

single place method idea or context to read familiar texts anew and to introduce forgotten or neglected voices and writings A History of American Puritan Literature is a collaborative effort to create not a singular literary history but a series of interlocked new histories of American puritan literature

Beginnings: Interrogating Hauerwas Brian Brock, Stanley Hauerwas, 2017-02-09 Stanley Hauerwas is arguably the most well known figure in theological ethics of the last generation Having published voluminously over the last 30 years late in his career he has also published two volumes of essays discussing his corpus retrospectively as well as a widely acclaimed memoir The sheer volume of his work can be daunting to readers and it is easy to get the impression that his retrospective volumes are restating positions developed earlier Brian Brock delves into Hauerwas formation as a theologian at Yale his first book Character and the Christian Life and examines some of his early and outspoken criticisms of the guild of Christian ethics This chapter is followed by a discussion of his memoir Hannah's Child and raises tricky questions about the role of autobiography in Christian ethics as well as the troubling problem of race in the modern academy Brock explores Hauerwas work on disability his criticisms of the discipline of medical ethics and the role played by vulnerability in his work The next chapter examines his views on just war and pacifism here probing the sensitive issue of the role of gender in his work and leading into a discussion on the nature of the church's peaceable politics in which his supposed hyper ecclesiocentricism is examined Brock examines the role of virtue in Hauerwas thought and teases out why he hates to be called a virtue ethicist A final chapter asks him to respond to the recently levelled criticism that scripture does no work in his theology focusing especially on his under appreciated commentary on the gospel of Matthew The editor of this volume has managed to maneuver Hauerwas into positions where he has directly faced tricky questions that he normally does not discuss such as the accusation that he is racist too soft on Yoder or misogynist
