Lauer, Jeanette C. Lauer, 2022 What do you want out of life If you are like most Americans you would probably include happiness in your answer But where can you find happiness We wrote this text because we believe your personal happiness is crucially tied up with the quality of your intimate relationships The text not only will provide you with a basic understanding of marriage and family life but also will show you how you can apply the knowledge you gain to enrich your life In other words this is not only a text it s a practical guide as well It is conceptual and theoretical social science but it is also applied social science The former comes from the wealth of information and the empirical work of the hundreds of researchers we discuss The latter is found in the Principles for Enhancing Intimacy sections presented in each chapter as well as in the Personal Comparison and What Do You Think inserts Hopefully by the time you complete this book you will have a thorough understanding of marriage and family life today and an understanding of the steps you can take to enhance the quality of your own intimate relationships We have updated this edition throughout with the latest available information First we have incorporated the latest available research more than 200 new references from the professional literature Second we have utilized the most recent government data The new references and government data in addition to updating our knowledge about intimate relationships provide increasingly more information on racial and ethnic differences in those relationships This information integrated throughout the chapters as appropriate shows how Americans of various racial and ethnic backgrounds have similar as well as dissimilar experiences in their family relationships In addition to updating every chapter s research base and statistical data we have made a number of other enhancements to the text s coverage

Understanding Marriage, Family, and Intimate Relationships Jerry D. Lehman, 2005 This introductory textbook is for students who are interested in learning about and establishing healthy marriage family and intimate relationships With divorce rates high and relationships fragile books and courses are needed that help students address important issues regarding relationships The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable understandable and easy to apply to one's life It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful healthy relationships There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations The text provides material on the research of John Gottman the object relations theory of Harville Hendrix the solution focused approach of Michele Weiner Davis and the PREP approach to conflict management of Markman Stanley and Blumberg These and other topics discussed are very relevant to students concerns and are addressed in greater depth than found in most other texts The emphasis is not just on couple relationships but also on family relationships Therefore in this book there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families There is also material on how change produces transitions in family life that must be assimilated into the family structure for example when a couple has their first child Thus both couple and family issues are addressed throughout the book For instructors who want to focus their courses on marriage family and intimate relationships this book would be an ideal choice A study guide for students and instructional material for instructors can be obtained by visiting www.understandingrelationships.net
