Lee,1977 **Bioarchaeologists Speak Out** Jane E. Buikstra,2018-10-26

Bioarchaeologists who study human remains in ancient historic and contemporary settings are securely anchored within anthropology as anthropologists yet they have not taken on the pundits the way other subdisciplines within anthropology have Popular science authors frequently and selectively use bioarchaeological data on demography disease violence migration and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors While bioarchaeologists are experts on these subjects bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye Current issues such as climate change droughts warfare violence famine and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time The contributions in this volume will explore the how and where the data has been misused present new ways of using evidence in the service of making new discoveries and demonstrate ways that our long term interdisciplinarity lends itself to transdisciplinary wisdom We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media Bibliographie Internationale D'anthropologie Sociale Et Culturelle International Committee for Social Science Information and Documentation,1986-11-20 First published in 1986 Routledge is an imprint of Taylor Francis an informa company **Biosocial Evolutionary Analysis**

Turner, Alexandra Maryanski, 2024-01-18 This authoritative book proposes a methodological and theoretical strategy for developing sociological explanations of the socio cultural universe Jonathan H Turner and Alexandra Maryanski discuss the problems that persist in explaining the socio cultural universe using only biological and psychological approaches and outline new strategies for understanding the evolution of human beings and their biological nature **The Household**

Robert C. Ellickson, 2010-08-02 Some people dwell alone many in family based households and an adventuresome few in communes The Household is the first book to systematically lay bare the internal dynamics of these and other home arrangements Legal underpinnings social considerations and economic constraints all influence how household participants select their homemates and govern their interactions around the hearth Robert Ellickson applies transaction cost economics sociological theory and legal analysis to explore issues such as the sharing of household output the control of domestic misconduct and the ownership of dwelling units Drawing on a broad range of historical and statistical sources Ellickson contrasts family based households with the more complex arrangements in medieval English castles Israeli kibbutzim and contemporary cohousing communities He shows that most individuals when structuring their home relationships pursue a strategy of consorting with intimates This he asserts facilitates informal coordination and tends ultimately to enhance the quality of domestic interactions He challenges utopian critics who seek to enlarge the scale of the household and legal advocates who urge household members to rely more on written contracts and lawsuits Ellickson argues that these commentators fail to appreciate the great advantages in the home setting of informally associating with a handful of trusted intimates The Household is a must read for sociologists economists lawyers and anyone interested in the fundamentals of domestic life *Cross-Cultural Research Methods*

F. Robertson,1991-10-30 Reproduction is the most vital process in the regeneration of our species and our society Nevertheless its influence on the shape of the modern world has been consistently overlooked by social scientists who have emphasized the erosion of the family in industrialized societies In A F Robertson s view families persist And the goal of reproduction plays an essential role in everything from the organization of political parties to the growth of banks and factories Robertson inverts the traditional wisdom that reproduction responds passively to the powerful transformative force of technology Reproduction he asserts requires such extensive cooperation on the state and community level as well as within the family that it has had great impact on our social and political organization Whether discussing Lesotho women and the South African economy or the effects of the family on the development of capitalism Robertson demonstrates that the ramifications of human reproduction extend far beyond the family Boldly argued and laced with cross cultural comparisons *Beyond the Family* synthesizes the writings of a range of thinkers It is sure to garner discussion and debate among divergent scholars of many stripes
