Trautmann, Peter M. Whiteley, 2012-11-01 The Crow Omaha problem has perplexed anthropologists since it was first described by Lewis Henry Morgan in 1871 During his worldwide survey of kinship systems Morgan learned with astonishment that some Native American societies call some relatives of different generations by the same terms Why Intergenerational skewing in what came to be named Crow and Omaha systems has provoked a wealth of anthropological arguments from Rivers to Radcliffe Brown from Lowie to Lévi Strauss and many more Crow Omaha systems it turns out are both uncommon and yet found distributed around the world For anthropologists cracking the Crow Omaha problem is critical to understanding how social systems transform from one type into another both historically in particular settings and evolutionarily in the broader sweep of human relations This volume examines the Crow Omaha problem from a variety of perspectives historical linguistic formalist structuralist culturalist evolutionary and phylogenetic It focuses on the regions where Crow Omaha systems occur Native North America Amazonia West Africa

Northeast and East Africa aboriginal Australia northeast India and the Tibeto Burman area The international roster of authors includes leading experts in their fields The book offers a state of the art assessment of Crow Omaha kinship and carries forward the work of the landmark volume Transformations of Kinship published in 1998 Intended for students and scholars alike it is composed of brief accessible chapters that respect the complexity of the ideas while presenting them clearly The work serves as both a new benchmark in the explanation of kinship systems and an introduction to kinship studies for a new generation of students Series Note Formerly titled Amerind Studies in Archaeology this series has recently been expanded and retitled Amerind Studies in Anthropology to incorporate a high quality and number of anthropology titles coming in to the series in addition to those in archaeology

The Alor-Pantar languages Marian Klammer, 2017-06-23 The Alor Pantar family constitutes the westernmost outlier group of Papuan Non Austronesian languages Its twenty or so languages are spoken on the islands of Alor and Pantar located just north of Timor in eastern Indonesia Together with the Papuan languages of Timor they make up the Timor Alor Pantar family The languages average 5 000 speakers and are under pressure from the local Malay variety as well as the national language Indonesian This volume studies the internal and external linguistic history of this interesting group and showcases some of its unique typological features such as the preference to index the transitive patient like argument on the verb but not the agent like one the extreme variety in morphological alignment patterns the use of plural number words the existence of quinary numeral systems the elaborate spatial deictic systems involving an elevation component and the great variation exhibited in their kinship systems Unlike many other Papuan languages Alor Pantar languages do not exhibit clause chaining do not have switch reference systems never suffix subject indexes to verbs do not mark gender but do encode clusivity in their pronominal systems Indeed apart from a broadly similar head final syntactic profile there is little else that the Alor Pantar languages share with Papuan languages spoken in other regions While all of them show some traces of contact with Austronesian languages in general borrowing from Austronesian has not been intense and contact with Malay and Indonesian is a relatively recent phenomenon in most of the Alor Pantar region This is the second edition of the volume that was originally published in 2014 In this edition typographical errors have been corrected small textual improvements have been implemented broken URL links repaired or removed and references updated The overall content of the chapters has not been changed

40 Marriages that must not Hold Dr. D. K. Olukoya, 2014-06-26 There are many marriage patterns today Many men and women are in a mess because the patterns they followed are contrary to divine principles The lives of many have been turned upside down as a result Unfortunately today most marriages are death traps When people are contemplating marriage they will do well if they consider the fact that there are many types of marriages Certain marriages are dead while some are wholesome Certain marriages are best described as a journey into crisis An understanding of the various patterns of marriage will enable you to sit and plan before undertaking the journey The manual in your hand has its details study it hard

The Institutions of the

Law of Scotland, Deduced from Its Originals and with the Civil, Canon, and Feudal Nations and with the Customs of Neighbouring Nations James Stair (viscount.),1832 *An Institute of the Laws of Scotland in Civil Rights* Lord Andrew MacDowall Bankton,1753 *The French Civil Code* France, Henry Cachard,1895 **Civil Code of Lower Canada** Québec (Province), William Prescott Sharp,1889 **Church and State in Scotland** Francis Lyall,2016-05-05 The interaction of faith and the community is a fundamental of modern society The first country to adopt Presbyterianism in its national church Scotland adopted a system of church government which is now in world wide use This book examines the development and current state of Scots law Drawing on previous material as well as discussing current topical issues this book makes some comparisons between Scotland and other legal and religious jurisdictions The study first considers the Church of Scotland its Disruption and statutorily recognised reconstitution and then the position of other denominations before assessing the interaction of religion and law and the impact of Human Rights and various discrimination laws within this distinctive Presbyterian country This unique book will be of interest to both students and lecturers in constitutional and civil law as well as historians and ecclesiastics **The Great Marriage Physician** Jerry and Carole Wilkins,2014-11-17 Jerry and Carole Wilkins have decoded the Bible for the secrets to a happy marriage in *The Great Marriage Physician* It s not very often you get sincere advise like it s coming from your grandmother But that s the kind of feeling that chapter after chapter in this book exudes It makes you wonder why no one ever thought of the Bible as a the most comprehensive book of sage marriage advise Until now Skeptics may say they are not credible they don t use a scientific approach or technical terms or they don t have degrees in psychology but would you rather trust a marriage counselor whose personal background you don t know and for all you know is also dealing with their own broken marriage Or would you be more interested in listening to a couple who has been successfully dealing with the highs and lows of marriage and so far have been living their own version of happily ever after for forty eight years *Asian Horizons* Angelo Andrea Di Castro,David Templeman,2015-04-01 *Asian Horizons* is published in honour of the great scholar of Asia Professor Giuseppe Tucci 1894 1984 Through the work of present day scholars both senior and emerging this volume represents their efforts to maintain the impetus of the profound legacy Tucci left Renowned to this day as a founding scholar in an extraordinarily wide variety of disciplines as well as being an explorer of hitherto largely unknown lands such as Tibet Tucci gained a deep knowledge of Asia through a familiarity with its people places and literature His contribution to modern scholarship is nothing less than remarkable The volume reflects the broad variety of topics in which Tucci himself displayed deep interest and serves as an homage to his work Comparative Criticism: Volume 4, The Language of the Arts E. S. Shaffer,1982-11-11 Addresses literary theory and criticism comparative studies in terms of theme genre movement and influence and interdisciplinary perspectives Anthropological Theory Robert Alan Manners,David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors

of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory. Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory. The development of field work in anthropology generated a tremendous emphasis on empirical data and research. The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole. Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline. Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology. Essays by anthropologists and other social scientists deal with explanation, evolution, ecology, ideology, structuralism, and a number of other issues reflecting throughout the editors' conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena. The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist.

Robert A. Manners, 1913-1996, received his Ph.D. from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa. He wrote numerous articles and reviews for anthropological journals as well as many books. He was professor of anthropology at Brandeis University where he started up the department. David Kaplan is professor emeritus of anthropology at Brandeis University. He has contributed articles and reviews to various journals. He has also done field work in Mexico and his areas of specialty include economic anthropology, method and theory, and peasant culture of Mesoamerica.
