Kind of Trouble Shiloh Walker, 2025-06-25 Desire won't take no for an answer in *The Right Kind of Trouble* by Shiloh Walker. In the small Southern town of McKay's Treasure, everybody knows that the handsome local police chief Gideon Marshall has been carrying a torch for Moira McKay. It's also no secret that Moira has been rejecting Gideon since forever. But after an attack from a mysterious stranger bent on taking down the McKay family, Moira becomes filled with distrust toward most men. Now she wonders whether she's been wrong about Gideon all along and if it's not too late to admit him back into her life and into her bed. Gideon has finally convinced his wasted heart to give up on Moira, who he's loved since he was sixteen years old. Moira's attack changes everything, however, and he vows to protect her. But how much is he willing to risk for a woman who's always kept him at bay until now? And is it too late for Moira to tell him that her love for him has always been locked deep in her heart and he holds the key? Shiloh Walker's writing just gets better and better, and the sex is sizzling. RT Book Reviews

The War Between the State and the Family Patricia Morgan, 2017-07-28 Patricia Morgan's core assumption is that the family is an extremely effective vehicle for raising the welfare of its members. If this is correct, it is quite possible that the state can best support the family by doing very little, by not taxing the family heavily and by minimizing the subsidization of those who choose alternatives to financially self-sustaining family life. At one level, Morgan argues the family can be seen as a unit within which there occurs enormous transfer of economic resources between husband and wife, parents and children, and on a wider scale within extended families. The family is the most important vehicle of welfare and the welfare vehicle of first resort. Within the family, many services are provided by family members to each other rarely for direct personal benefit. Basic economic analysis, Morgan asserts, suggests that the family could be seriously undermined if the state provided significant support for dependents who are not brought up within self-sustaining family units and if it also provided services such as childcare that are generally provided within families. This work shows that this is precisely what has happened in the last twenty-five years. The driving force of significantly reduced family formation is not economic but social. Perhaps social changes have led to a desire by individuals to bring up children in family circumstances different from those of a generation or two ago, but evidence does not support this hypothesis. Rather, tax and benefit systems seem to be important determinants of family structure worldwide. Patricia Morgan does not simply analyze the problem; she also suggests policy solutions. The author argues that divorce laws should be reformed to ensure that those who make commitments are held financially responsible. The author's argument is compelling because it is backed up with strong evidence and is argued from an unemotional economic perspective: individuals within families are rational agents who respond to incentives.
