Nicholas Entrikin,2004-06-24 This volume has as its focus the role of the Marshall Plan as both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan

New Europe's New Development Aid Balázs Szent-Iványi, Simon Lightfoot, 2015-04-17 This book examines the international development policies of five East Central European new EU member states the Czech Republic Hungary Poland Slovakia and Slovenia These countries turned from being aid recipients to donors after the turn of the millennium in the run up to EU accession in 2004 The book explains the evolution subsequent to EU accession and current state of foreign aid policies in the region and the reasons why these deviate from many of the internationally agreed best practices in development cooperation It argues that after the turn of the millennium a Global Consensus has emerged on how to make foreign aid more effective for development A comparison between the elements of the Global Consensus and the performance of the five countries reveals that while they have generally implemented little of these recommendations there are also emerging differences between the countries with the Czech Republic and Slovenia clearly aspiring to become globally responsible donors Building on the literatures on foreign policy analysis international socialization and interest group influence the book develops a model of foreign aid policy making in order to explain the general reluctance of the five

countries in implementing international best practices and also the differences in their relative performance *The Place of Landscape* Jeff Malpas, 2011 Interdisciplinary perspectives on landscape from the philosophical to the geographical with an emphasis on the overarching concept of place This volume explores the conceptual topography of landscape It examines the character of landscape as itself a mode of place as well as the modes of place that appear in relation to landscape Leading scholars from a range of disciplines explore the concept of landscape including its supposed relation to the spectatorial its character as time space its relation to indigenous notions of country and its liminality They examine landscape as it appears within a variety of contexts from geography through photography and garden history to theology and more specific studies look at the forms of landscape in medieval landscape painting film and television and in relation to national identity The essays demonstrate that the study of landscape cannot be restricted to any one genre cannot be taken as the exclusive province of any one discipline and cannot be exhausted by any single form of analysis What the place of landscape now evokes is itself a wide ranging terrain encompassing issues concerning the nature of place of human being in place and of the structures that shape such being and are shaped by it Envisioning Landscapes, Making Worlds Stephen Daniels, Dydia DeLyser, J. Nicholas Entrikin, Doug Richardson, 2012-03-15

There has been a remarkable resurgence in the past decade of intellectual interplay between geography and the humanities in both academic and public circles Terminology and concepts such as space place landscape mapping and geography are becoming pervasive as conceptual frameworks and core metaphors in recent publications by humanities scholars and well known writers *Envisioning Landscapes Making Worlds* examines the depth and complexity of human meaning invested in maps attached to landscapes and embedded in the spaces and places of modern life The clashing and blending of cultures caused by globalization and the new technologies that profoundly alter human environmental experience suggest new geographical narratives and representations that are explored here by a multidisciplinary group of authors With contributions from leading scholars this text is essential reading for scholars and students seeking to understand the new synergies and interconnectedness of geography and the humanities

The New Global Trading Order Dennis Patterson, Ari Afilalo, 2008-03-31 The international institutions that have governed global trade since the end of World War II have lost their effectiveness and global trade governance is fractured The need for new institutions is obvious and yet few proposals seem to be on offer The key to understanding the global trading order lies in uncovering the relationship between trade and the State and how the inner constitution of Statecraft drives the architecture of the global order and requires structural changes as the State traverses successive cycles The current trade order focused on the liberalization of trade in goods and services and the management of related issues is predicated on policies and practices that were the product of a global trading order of the 20th century modern nation states Today a new form of the State the post modern State is evolving In this book the authors propose a new trade norm the enablement of global economic opportunity and a new institution the Trade Council to overhaul the global trading order *Gender,*

Digitalization, and Resilience in International Development Julia Bello-Bravo, John William Medendorp, Anne Namatsi Lutomia, Barry Robert Pittendrigh, 2023-09-07 This book explores the intersection of gender digitalization and resilience in international development Building resilience is increasingly seen as crucial when planning and implementing development programmes enabling communities to mitigate adapt to and recover from shocks and stresses in a manner that reduces chronic vulnerability and facilitates inclusive growth Gender plays a crucial role in the resilience of development systems as the exclusion of women from participation can make communities more vulnerable to economic shocks perpetuating and even worsening current levels of poverty instability and insecurity Drawing on meta data from across the world as well as specific case studies from Ghana Kenya Burkina Faso and Mozambique this book reflects on these intersections and the potential of digitalization as a democratizing tool for improving the access of women and other marginalized groups to information vital for their participation in the process of development By outlining the importance of digitalization for addressing gender imbalances this book draws the evidentiary lines between the role of digitalization for women and resilience as a whole This book will be of interest to development practitioners and policy makers as well as researchers with specialisms in gender inclusion resilience digitalization and international development **Ascent to Power** David L. Roll, 2024-04-23 One of Foreign Affairs s Best Books of 2024 From Franklin Roosevelt s final days through Harry Truman s extraordinary transformation this is the enthralling story behind the most consequential presidential transition in US history When Roosevelt in failing health decided to run for a fourth term he gave in to the big city Democratic bosses and reluctantly picked Senator Truman as his vice president a man he barely knew Upon FDR s death in April 1945 Truman after only 82 days as VP was thrust into the presidency Utterly unprepared he faced the collapse of Germany a Europe in ruins the organization of the UN a summit with Stalin and Churchill and the question of whether atomic bombs would be ready for use against Japan Meanwhile the Soviet Union was growing increasingly hostile towards US power Truman inherited FDR s hope that peace could be maintained through cooperation with the Soviets but he would soon learn that imitating his predecessor would lead only to missteps and controversy Spanning the years of transition 1944 to 1948 **Ascent to Power** illuminates Truman s struggles to emerge as president in his own right Yet from a relatively unknown Missouri senator to the most powerful man on Earth Truman s legacy transcends With his come from behind campaign in the fall of 1948 his courageous civil rights advocacy and his role in liberating millions from militarist governments and brutal occupations Truman s decisions during these pivotal years changed the course of the world in ways so significant we live with them today **The EU and Neighbors** Brian W. A World More Equal Sandrine Kott,2024-02-06 The post World War II period is typically seen as a time of stark division an epochal global conflict between the United States and the Soviet Union But beneath the surface the postwar era witnessed a striking degree of international cooperation The United Nations and its agencies as well as regional organizations international nongovernmental organizations and private foundations brought together actors from conflicting worlds fostering international collaboration across the geopolitical and ideological divisions of the Cold War Diving into the archives of these organizations and associations Sandrine Kott provides a new account of the Cold War that foregrounds the rise of internationalism as both an ideology and a practice She examines cooperation across boundaries in international spaces emphasizing the role of midsized powers including Eastern European and neutral countries Kott highlights how the need to address global inequities became a central concern as officials and experts argued that economic inequality imperiled the creation of a lasting peace International organizations gave newly decolonized and Third World countries a platform to challenge the global distribution of power and wealth and they encouraged transnational cooperation in causes such as human rights and women s rights Assessing the failure to achieve a new international economic order in the 1970s Kott adds new perspective on the rise of neoliberalism A truly global study of the Cold War through the lens of international organizations A World More Equal also shows why the internationalism of this era offers resources for addressing social and global inequalities today

Local Space, Global Life Luis Eslava,2015-07-09 This book examines the everyday functioning and impact of international law and the development project particularly across cities in emergent nations **Levelling Up Left Behind Places** Ron Martin,Ben Gardiner,Andy Pike,Peter Sunley,Peter Tyler,2021-12-20 EXECUTIVE SUMMARY AND KEY RECOMMENDATIONS The nature of the problem Geographical inequalities in the UK are a longstanding and persistent problem rooted in deepseated and cumulative processes of local and regional divergence with antecedents in the inter war years and accelerating since the early 1980s This spatial divergence has been generated by the inability of some places to

adapt to the emergence of the post industrial service and knowledge based economy whose geographies are very different from those of past heavy industries As a consequence the left behind problem has become spatially and systemically entrenched Challenging ideas of market led adjustment there is little evidence that real cost advantages in Northern areas are correcting and offsetting the geographically differentiated development of skilled labour and human capital and the quality of residential and business environments A variety of different types of left behind place exist at different scales and these types combine common problems with distinctive economic trajectories and varied causes These different types will need policies that are sensitive and adaptive to their specific problems and potentialities Contemporary economic development is marked by agglomeration in high skilled and knowledge intensive activities Research based concentrations of high skilled activity in the UK have been limited and concentrated heavily in parts of London and cities in the Golden Triangle especially Oxford and Cambridge Even in London the benefits have been unevenly spread between boroughs Existing analyses of the predicaments of left behind places present a stark division between rapid growth in winning high skilled cities and relative decline in losing areas This view is problematic because it oversimplifies the experience in the UK and other countries A false binary distinction is presented to policymakers which offers only the possibility of growth in larger cities and derived spillovers and other compensations elsewhere Yet the post industrial economy involves strong dispersal of activity and growth to smaller cities towns and rural areas However this process has been highly selective between local areas and needs to be better understood The institutional and policy response Past policies in the UK have lacked recognition of the scale and importance of the left behind problem and committed insufficient resources to its resolution The objective of achieving a less geographically unequal economy has not been incorporated into mainstream policymaking When compared with other countries the UK has taken an overcentralized top down approach to policy formulation and implementation often applying one size fits all policy measures to different geographical situations Political cycles have underpinned a disruptive churn of institutions and policies In contrast with other Organisation for Economic Co operation and Development OECD countries particularly in Europe there has been limited long term strategy and continuity and inadequate development of local policymaking capacity and capabilities especially for research analysis monitoring and evaluation Past policies have been underfunded inconsistent and inadequately tailored and adapted to the needs of different local economies We estimate that on average over the period 1961 2020 the UK government invested on average 2.9 billion per annum in direct spatial policy 2020 prices equivalent to around 0.15% of gross national income GNI per annum over the period European Union Structural and Cohesion Policy support has added around 0.12% GNI 2020 prices per annum to this over the period from the late 1970s These broad estimates suggest that discretionary expenditure in the UK on urban and regional policy when both domestic and European Union spatial policy was in operation was equivalent to 0.27% per annum of UK GNI 2020 prices This is dwarfed by mainstream spending programmes by comparison the UK committed 14.5 billion 0

7% of GNI to international aid in 2019 The level of resources devoted to spatial policy has been modest given the entrenched and cumulative nature of the problem Policies for levelling up need clearly to distinguish different types of left behind places and devise a set of place sensitive and targeted policies for these types of clubs of left behind areas This shift will need a radical expansion of place based policymaking in the UK which allows national and local actors to collaborate on the design of appropriate targeted programmes A key priority for levelling up is revitalizing Northern cities and boosting their contribution to the national economy Underperformance in these urban centres has been a major contributor to persistent geographical inequality in the UK Addressing the UK's geographical economic inequalities and the plight of left behind places requires substantially more decentralization of power and resources to place based agencies This would enable the current UK government's levelling up agenda to capitalize on the many advantages of more place based policymaking to diagnose problems build on local capabilities strengthen resilience and adapt to local changes in circumstances Crucially place based efforts need to be coordinated and aligned with place sensitive national policies The key challenge of a levelling up mission is to integrate place based policies with greater place sensitivity in national policies and in regulation and mainstream economic spending It is important to develop policies that spread the benefits from agglomeration and ensure that the income effects and innovations produced by high skill concentrations diffuse to the wider cityregional economies and their firms especially small and medium sized enterprises and workers There is a clear need for more policy thinking on how this can be achieved Policy for levelling up needs to align and coordinate with the other national missions for net zero carbon and post pandemic recovery This suggests that a strong place making agenda focused on quality of life infrastructure and housing in many left behind places is important for post industrial and service growth Genuine place making is a long term process involving public private and civic participation which allows local responses to those economic environmental and social constraints and problems that most strongly reduce the quality of life in local areas A truly total place approach is required The quality of infrastructure housing stock and public services is crucial for the quality of place as well as the ability to secure and attract more dispersed forms of growth There is little hope of delivering place making if public sector austerity is once again allowed to cut back public services more severely in poorer and more deprived areas The way forward The scale and nature of the UK's contemporary left behind places problem are such that only a transformative shift in policy model and a resource commitment of historic proportions are likely to achieve the levelling up ambition that is central to the current government's political ambitions **KEY RECOMMENDATIONS** In summary our recommendations are that the UK government should Grasp the transformative moment for local regional and urban development policy as the UK adjusts to a post Covid 19 world and seeks a net zero carbon future Establish a clear and binding national mission for levelling up Realize the potential of place in policymaking Decentralize and devolve towards a multilevel federal polity Strengthen subnational funding and financing and adopt new financing models involving the public private sector and civic sectors to generate the

resources required Embed geography in the national state and in national policy machinery Improve subnational strategic research intelligence monitoring and evaluation capacity A failure to learn from the lessons of the last 70 years of spatial policy risks the UK becoming an ever more divided nation with all the associated economic social and political costs risks and challenges that this presents
