Philosophy of Culture as Theory, Method, and Way of Life ,2022-05-16 The idea of culture comprises almost all human activities from science to art from music to microscopy Does anything important escape the limits of this idea The authors of this collection argue that all philosophy is really the philosophy of culture since in some way each and every discipline and subdiscipline is foremost a manifestation of our collective cultural effort Further they argue that by engaging with philosophy as a cultural activity and as a discipline to meaningfully engage with all dimensions of intercultural life we can live more meaningful flourishing and wisely guided lives

Marx's Social Critique of Culture Louis Dupre,1985-07-01 A distinguished philosopher presents a critical reading of Marx's interpretation of culture Dupre discusses the relation of Marx to previous philosophers especially Hegel the stages of development and contradictions within Marx's conception of culture and the contributions of various Marxists who followed Marx Intelligent discerning and carefully nuanced American Political Science Review

Philosophy and an African Culture Kwasi Wiredu,1980-04-10 What can philosophy contribute to African culture What can it draw from it Could there be a truly African philosophy that goes beyond traditional folk thought Kwasi Wiredu tries in these essays to define and demonstrate a role for contemporary African philosophers which is distinctive but by no means parochial He shows how they can assimilate the advances of analytical philosophy and apply them to the general social and intellectual changes associated with modernisation and the transition to new national identities But we see too how they can exploit traditional resources and test the assumptions of Western philosophy against the intimations of their own language and culture The volume as a whole presents some of the best non technical work of a distinguished African philosopher of importance equally to professional philosophers and to those with a more general interest in contemporary African thought and culture

intellectual biography provides an organic framework for understanding Antonio Gramsci's process of intellectual development paying close attention to the historical and intellectual contexts out of which his views emerged. The Gramsci in Notebooks cannot fully account for the young director of L'Ordine Nuovo or for the communist leader. Gramsci's development did not occur under conditions of intellectual inflexibility or absence of evolution. However, there is a strong thread connecting the political Gramsci with Gramsci as a cultivated man. The Sardinian intellectual's life is marked by the drama of World War I, the first mass conflict in which the great scientific discoveries of the previous decades were applied on a large scale and in which millions of peasants and workers were slaughtered. In all of his theoretical formulations, this dual relation which epitomizes the instrumental use of simpletons by ruling classes goes beyond the military context of the trenches and becomes full-fledged in the fundamental relations of modern capitalist society. In contrast with this notion of social hierarchy which is deemed natural and unchangeable, Gramsci constantly affirmed the need to overcome the historically determined rupture between intellectual and manual functions due to which the existence of a priesthood or of a separate caste of specialists in politics and in knowledge is made necessary. It is not the specific professional activity, whether material or immaterial, that determines the essence of human nature. To Gramsci, all men are philosophers. In this passage from Notebooks, we find the condensed form of his idea of human emancipation, which is the historical need for an intellectual and moral reform, the subversion of traditional relations between rulers and ruled, and the end of exploitation of man by man.

On Culture and Cultural Revolution V. I. Lenin, 2008-03-01 Vladimir Ilyich Lenin 1870-1924 was a Russian revolutionary, a communist politician, the main leader of the October Revolution, the first head of the Russian Soviet Socialist Republic and from 1922 the first de facto leader of the Soviet Union. He was the creator of Leninism, an extension of Marxist theory.

Presocratic Reflexivity: The Construction of Philosophical Discourse C. 600-450 B.C. Barry Sandywell, 2002-11 In this third volume of Logological Investigations, Sandywell continues his sociological reconstruction of reflexive thought with reference to pre-Socratic philosophy and science and their socio-political context.

Philosophy, Culture and Vision: African Perspectives Gyekye, Kwame, 2014-05-08 Believing that the intellectual enterprise called philosophy is essentially a part of the cultural as well as historical experience of a people, that the concepts and problems that occupy the attention of philosophers placed in different cultural spaces or historical times generally derive directly from those spaces and times, and that philosophy in turn has been most relevant to the development of human cultures, the Ghanaian philosopher Kwame Gyekye gives reflective attention in this book to some of the concepts and problems that in his view feature most prominently in the contemporary African cultural, social, political, and moral experience. Such concepts and problems include the following: political legitimacy, development, culture, and the pursuit of science and technology; political corruption; democracy; representation and the politics of inclusion; the status of cultural values in national orientation; understanding globalization; and others. It is these topics that are covered in the essays collected in this book. The unrelenting pursuit of the speculative activity by the philosopher in most

cases eventuates in normative proposals these normative proposals often embody a vision a vision of an ideal human society in terms of its values politics and culture Vision understood here has human not supernatural or divine origination and involvement and requires action by human beings in order for it to come into reality A vision may derive from sustained critical evaluation of a culture or some elements of it Gyekye attempts an articulation of the visions of the essays contained in the book Even though philosophical ideas and concerns are originally inspired by and worked out in a cultural milieu it does not necessarily follow Gyekye strongly believes that the relevance of those ideas and insights is to be tethered to the cultures that produced them For more often than not the relevance of those ideas or at least some of them transcends the confines of their own times and cultures and can be appreciated by other societies or cultures or generational epochs This trans cultural or trans epochal or meta contextual appeal or attraction of philosophical ideas and insights spawned by a particular culture or cluster of cultures or in specific historical times is to be put down to our common human nature including our basic human desires and aspirations Thus most of the essays published here should be of interest to the global community i e to cultures and societies beyond the African

Culture and Enlightenment Paul Crittenden, 2017-11-22 This title was first published in 2002 Culture and Enlightenment are the two words that best characterise the essence of Gyrgy Markus's career in whose honour this book is published Markus devoted the last twenty years of research towards a theory of cultural objectifications and their pragmatics and the great depth of his knowledge of the history of culture and philosophy informs all his teaching and writing The pursuit of Enlightenment ideals attains reflective self consciousness in Markus works forged in the knowledge of its own historicity of the embeddedness of rationalities in culture and in an awareness of the paradoxes that cling to the conscious affirmation of ideals which are no longer self evident or beyond questioning In taking up the challenge of these paradoxes Markus spans the whole history of modern philosophy and culture with a matchless authority This book draws together contributions from leading figures in contemporary philosophy who are also friends colleagues and former students of Gyrgy Markus The book is divided into two sections the first presents critical assessments of various aspects of Markus wide ranging works the second presents contributions in celebration of his influence and his wide interests In their critical assessment of Markus work and in the demonstration of his influence the contributors hope to convey something of the breadth and something of the excitement of doing philosophy in the company of Gyrgy Markus
