

The background of the entire image is a photograph of a forest floor. Sunlight filters through the dense canopy of green trees, creating a pattern of bright, dappled light and deep shadows on the ground covered with fallen leaves and pine needles. The overall tone is natural and somewhat somber due to the dark shadows.

Marx And Nature Red Green Perspect:

Marx and Nature P. Burkett, 1999-02-14 With Marx and Nature Paul Burkett reconstructs Marx's approach to nature society and environmental crisis While recognizing that production is structured by historically developed relations among producers Marx also insists that production as a social and material process is shaped and constrained by natural conditions including the natural condition of human bodily existence Marx's value analysis places him squarely in the camp of the growing number of ecological theorists questioning the ability of monetary and market based calculations to adequately represent the natural conditions of human production and development

Ecojustice and Education Kathryn Ross Wayne, David A. Gruenewald, 2014-05-22 First Published in 2004 This is Volume 36 in the Educational Studies series A Journal of the American Educational Studies Association which focuses on Ecojustice and Education Alongside articles and book reviews this features guest editors Kathryn Ross Wayne and David A Gruenewald This volume contains an examination of educational research theory policy and practice seeking to highlight an overwhelming absence of attention toward the ecological contexts of existence The articles in this issue aim to further stimulate and encourage a wide and rich web of inquiry into ecojustice and ecodevelopment

[The Politics of Ecosocialism](#) Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound it is clear that we need a fundamentally new approach to tackle these issues This innovative book offers a unique perspective stressing the necessity of both ecological and social change as it discusses how to create a red green or eco socialist society Examining the current crises of welfare capitalism as well as the challenges and conflicts of an eco socialist society the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability It analyses the key social and ecological issues related to the welfare state including green Keynesianism ecological Marxism the limits of growth and no growth capitalist barriers to a renewable energy transition proposals for a universal basic income and the role of technology Finally the book outlines possible paths of transformation towards creating an eco socialist society drawing out lessons that can be applied internationally This book will be of great interest to students and researchers in economics environmental studies and political science

[Elgar Encyclopedia of Environmental Sociology](#) Christine Overdevest, 2024-04-12 The Elgar Encyclopedia of Environmental Sociology serves as a repository of insight on the complex interactions challenges and potential solutions that characterize our shared ecological reality Presenting innovative thinking on a comprehensive range of topics expert scholars researchers and practitioners illuminate the nuances complexities and diverse perspectives that define the continually evolving field of environmental sociology

Ecosocialism Salvatore Engel-Di Mauro, 2024-11-30 This book offers an extensive critical overview of eco socialism one of the most generative and significant aspects of contemporary debates within socialism Marxism has played a foundational role in the development of ecosocialism since its inception and has also led to critical reflections on the 20th

century Marxism and ecological interpretation of Marxist writings Despite the relevance of ecosocialism to the pressing debates on the ecological crisis and the growing literature on ecosocialism there has not been a comprehensive account on ecosocialism and its variations This volume seeks to fill this important gap and to pave the way for a more systematic development of this emerging paradigm The book not only engages with a critique of other non socialist ecological schools of thought in defence of ecosocialism but also provides a critical overview of debates within ecosocialism and of ecosocialism itself The latter includes an appraisal of ecosocialism in Bolivarian Venezuela and the implications of current efforts in the People s Republic of China to build an ecological civilisation Furthermore the book contains a crucial discussion about the relation between eco socialism and indigenous studies and movements

Marxism and the Capitalist State Rob Hunter,Rafael Khachaturian,Eva Nanopoulos,2023-10-30 This book builds on the recent revival of interest in Marx and Marxism calling for a renewal and refinement of Marxist state theory It aims to provoke and encourage new debates and critiques that build on but also update and extend the rich tradition of Marxist analyses of the capitalist state including the well known debates of the 1970s The chapters present a dynamic and diverse constellation of arguments and perspectives on a range of topics from general re appraisals of the capitalist state to investigations of contemporary challenges including digitalisation the ecological crisis the coronavirus pandemic social reproduction and critical political economy What they share is a commitment to an understanding of the specifically capitalist character of the modern state and its significance for any serious discussion of the causes of our current age of global catastrophe and the overcoming of capitalist social relations

Workers and Trade Unions for Climate Solidarity Paul Hampton,2015-06-05 This book is a theoretically rich and empirically grounded account of UK trade union engagement with climate change over the last three decades It offers a rigorous critique of the mainstream neoliberal and ecological modernisation approaches extending the concepts of Marxist social and employment relations theory to the climate realm The book applies insights from employment relations to the political economy of climate change developing a model for understanding trade union behaviour over climate matters The strong interdisciplinary approach draws together lessons from both physical and social science providing an original empirical investigation into the climate politics of the UK trade union movement from high level officials down to workplace climate representatives from issues of climate jobs to workers climate action This book will be of great interest to students and researchers in environmental politics climate change and environmental sociology

Mute Compulsion Søren Mau,2023-01-31 Shortlisted for the Deutscher Memorial Prize A new Marxist theory of the abstract and impersonal forms of power in capitalism Despite insoluble contradictions intense volatility and fierce resistance the crisis ridden capitalism of the 21st century lingers on To understand capital s paradoxical expansion and entrenchment amidst crisis and unrest Mute Compulsion offers a novel theory of the historically unique forms of abstract and impersonal power set in motion by the subjection of social life to the profit imperative Building on a critical reconstruction of Karl Marx s unfinished critique of

political economy and a wide range of contemporary Marxist theory philosopher S ren Mau sets out to explain how the logic of capital tightens its stranglehold on the life of society by constantly remoulding the material conditions of social reproduction In the course of doing so Mau intervenes in classical and contemporary debates about the value form crisis theory biopolitics social reproduction humanism logistics agriculture metabolism the body competition technology and relative surplus populations

Marx's Ecology John Bellamy Foster,2000-03 By reconstructing a materialist conception of nature and society Marx's Ecology challenges the spiritualism prevalent in the modern Green movement pointing toward a method that offers more lasting sustainable solutions to the ecological crisis

The Ecological Crisis and the Logic of Capital Xueming Chen,2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective The Ecological Crisis and the Logic of Capital explores the logic of capitalism as a fundamental cause of today's environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism

Fossil Capital Andreas Malm,2016-02-23 A sweeping study of how capitalism first promoted fossil fuels with the rise of steam power and contributed to the worsening climate crisis The more we know about the catastrophic implications of climate change the more fossil fuels we burn How did we end up in this mess In this masterful new history Andreas Malm claims it all began in Britain with the rise of steam power But why did manufacturers turn from traditional sources of power notably water mills to an engine fired by coal Contrary to established views steam offered neither cheaper nor more abundant energy but rather superior control of subordinate labor Animated by fossil fuels capital could concentrate production at the most profitable sites and during the most convenient hours as it continues to do today Sweeping from nineteenth century Manchester to the emissions explosion in China from the original triumph of coal to the stalled shift to renewables this study hones in on the burning heart of capital and demonstrates in unprecedented depth that turning down the heat will mean a radical overthrow of the current economic order The definitive deep history on how our economic system created the climate crisis Superb essential reading from one of the most original thinkers on the subject Naomi Klein author of This Changes Everything and The Shock Doctrine

The Distortion of Nature's Image Damian Gerber,2019-03-25 Illustrates how the notion of an ecological society remains a decisively political question The global ecological crisis is upon us From global warming to the long term implications of ocean acidification air and water pollution deforestation and the omnipresent dangers of nuclear technology the future of our planetary home is threatened Yet in the midst of the unfolding crisis the conventional ideologies of the twentieth century and their representations of nature remain

unchallenged by both the defenders of capitalism and capitalism's most radical critics *The Distortion of Nature's Image* illustrates how the anti-naturalism of late capitalist society in which nature is reified into the emptiness of mere matter simply a thing to be dominated is subtly complemented by the failure of the Left to go both beyond the historic limitations of Marx's nineteenth-century viewpoint and beyond anarchism's blind faith in natural law. However, an alternative for comprehending nature and the ecological crisis as historical and social phenomena remains open in the dialectical naturalism of Western Marxism and Murray Bookchin's social ecology. By examining in closer detail how Bookchin's social ecology politicizes the concept of nature as well as how precursory models in Western Marxist thought provide a foundation for this, Damian Gerber illustrates how the notion of an ecological society remains a decisively political question. There are very few studies that bring anarchism into conversation with an ecological focus. Gerber's book does this in extraordinary form, offering a critical but balanced overview. Simon Springer, author of *The Anarchist Roots of Geography Toward Spatial Emancipation*.

Work in a Warming World Carla Lipsig-Mummé, Stephen McBride, 2016-04-15 Global warming is perhaps the greatest challenge facing the twenty-first century. Environmental policies on the one hand and economic and labour market policies on the other often exist in separate silos, creating a dilemma that *Work in a Warming World* confronts. The world of work, goods, services, and resources produces most of the greenhouse gases created by human activity. In engaging essays, contributors demonstrate how the world of work and the labour movement need to become involved in the struggle to slow global warming and the ways in which environmental and economic policies need to be linked dynamically in order to effect positive change. Addressing the dichotomy of competing public policies in a Canadian context, *Work in a Warming World* presents ways of creating an effective response to global warming and key building blocks toward a national climate strategy.

Nature Swapped and Nature Lost Elia Apostolopoulou, 2020-06-23 This book unravels the profound implications of biodiversity offsetting for nature-society relationships and its links to environmental and social inequality. Drawing on people's resistance against its implementation in several urban and rural places across England, it explores how the production of equivalent natures, the core promise of offsetting, reframes socio-natures both discursively and materially, transforming places and livelihoods. The book draws on theories and concepts from human geography, political ecology, and Marxist political economy and aims to shift the trajectory of the current literature on the interplay between offsetting, urbanization, and the neoliberal reconstruction of conservation and planning policies in the era following the 2008 financial crash. By shedding light on offsetting's contested geographies, it offers a fundamental retheorization of offsetting, capable of demonstrating how offsetting and more broadly revanchist neoliberal policies are increasingly used to support capitalist urban growth, producing socially, environmentally, and geographically uneven outcomes. *Nature Swapped and Nature Lost* brings forward an understanding of environmental politics as class politics and sees environmental justice as inextricably linked to social justice. It effectively challenges the dystopia of offsetting's ahistorical and asocial non-places and proposes a

radically different pathway for gaining social control over the production of nature by linking struggles for the right to the city with struggles for the right to nature for all

Marxism in the Age of Ecological Catastrophe Eduardo Sá Barreto, 2024-11-26 Marxism in the Age of Ecological Catastrophe offers a stimulating discussion on the ecological unfeasibility of capitalist society Divided into three parts Eduardo S Barreto begins by providing a reconstruction of Marx's theory of value and articulating it into an ecological critique of this society Part Two surveys key debates between some of today's most representative Marxist ecologists Part Three explores political approaches tactical and strategic issues to see whether they align with the gravity of the challenges facing humanity or not Located at the intersection of the natural and social sciences Marxism in the Age of Ecological Catastrophe will be of interest to scholars of political science economics ecology climatology demography geography and sociology

Marx in Motion Thomas Nail, 2020-07-17 Karl Marx is the most historically foundational and systematic critic of capitalism to date and the years since the 2008 financial crisis have witnessed a rebirth of his popular appeal In a world of rising income inequality right wing nationalisms and global climate change people are again looking to the father of modern socialism for answers As this book argues every era since Marx s death has reinvented him to fit its needs There is not one Marx forever and for all time There are a thousand Marxes As Thomas Nail contends one of the most significant contributions of Marx s work is that it treats theory itself as a historical practice Reading Marx is not just an interpretative activity but a creative one As our historical conditions change so do the kinds of questions we pose and the kinds of answers we find in Marx s writing This book is a return to the writings of Karl Marx including his under appreciated dissertation through the lens of the pressing philosophical and political problems of our time ecological crisis gender inequality colonialism and global mobility However the aim of this book is not to make Marxism relevant by applying it to contemporary issues Instead Marx in Motion the first new materialist interpretation of Marx s work treats Capital as if it were already a response to the present Thomas Nail argues that Marx was a new materialist avant la lettre He argues that Marx did not believe history was determined or that matter was passive or that humans were separate or superior to nature Marx did not even have a labor theory of value Marxists argue that new materialists lack a sufficient political and economic theory and new materialists argue that Marx s materialism is human centric and mechanistic This book aims to solve both problems by proposing a new materialist Marxism **Karl Marx's Ecosocialism** Kohei Saito, 2017-10-24 Delving into Karl Marx s central works as well as his natural scientific notebooks published only recently and still being translated the author argues that Karl Marx actually saw the environment crisis embedded in capitalism The book shows us that Marx has given us more than we once thought that we can now come closer to finishing Marx s critique and to building a sustainable ecosocialist world Page 4 of cover
