Nurse On The Move:

Nurses on the Move Mireille Kingma, 2018-07-05 South African nurses care for patients in London hospitals recruit Filipino nurses to Los Angeles and Chinese nurses practice their profession in Ireland In every industrialized country of the world patients today increasingly find that the nurses who care for them come from a vast array of countries In the first book on international nurse migration Mireille Kingma investigates one of today's most important health care trends The personal stories of migrant nurses that fill this book contrast the nightmarish existences of some with the successes of others Health systems in industrialized countries now depend on nurses from the developing world to address their nursing shortages This situation raises a host of thorny questions What causes nurses to decide to migrate Is this migration voluntary or in some way coerced When developing countries are faced with nurse vacancy rates of more than 40 percent is recruitment by industrialized countries fair play in a competitive market or a new form of colonialization What happens to these workers and the patients left behind when they migrate What safeguards will protect nurses and the patients they find in their new workplaces Highlighting the complexity of the international rules and regulations now being constructed to facilitate the lucrative trade in human services Kingma presents a new way to think about the migration of skilled health sector labor as well as the strategies needed to make migration work for individuals patients and the health systems on which they depend

Faculty of Nursing on the Move Geertje Boschma, 2005 Faculty of Nursing on the Move provides a historical analysis of the Faculty of Nursing at the University of Calgary in contrast and comparison to the broader evolution of academic nursing in Canada It addresses how the faculty has responded to important social trends and changes in health care policy and helps the reader to understand contemporary nursing issues Starting with the dramatic changes in health care policy after the Second World War it establishes the role of nursing education as pivotal to a growing health care industry The book then moves on to describe the challenge of developing an identity for an academic unit within the larger academic and health care structure This book will be of particular interest to anyone involved in women's studies as it represents a case study for broader women's issues within an academic environment Gender And The Professional Predicament In Nursing Davies, Celia, 1995-02-01 Gender and the Professional Predicament in Nursing examines the ways in which our understanding of nursing is gendered and how our notion of nursing is connected to our idea of what it is to be a woman It explores the implications this connection has for the status of nursing as a profession and re-examines some of the fundamental questions that the nursing profession has tried to address such as what is nursing care who should do it why is it so difficult to manage the provision of nursing care Gender and the Professional Predicament in Nursing demonstrates that once nurses try to define and shape the nature of their work they are marginalized or silenced Frequent descriptions of them as sentimental divided or incompetent highlight the need to understand nurses exclusion from policy debates and why their voices are so seldom heard Celia Davies contends that in a society divided by gender defining nursing as women's work is deeply
