

# Bridging the gap between clinical and critical sociological perspectives in dementia

Noel Collins  & James Rupert Fletcher

## ARTICLE

### SUMMARY

There is a widening gap between the medical model of dementia and critical sociological perspectives of the condition. Given the relative failure of reductionism in dementia and its rising prevalence, consideration of the utility of these critical viewpoints is warranted. This article considers how these ideas, which challenge some prevailing assumptions about dementia, can be meaningfully applied in conjunction, rather than in competition, with conventional clinical ideas. To illustrate this, current perspectives on selfhood, biopolitics, citizenship and post-humanism are discussed. This article may also help to articulate sociologically oriented approaches already used by some clinicians and legitimise the time and attention needed to explore and deliver these. We support the view that dementia is an episteme in the making and that different traditions and dispositions can fruitfully collide to enliven interdisciplinary conversations about dementia and dementia care.

### KEYWORDS

Critical psychiatry; sociology; gerontology; dementia; citizenship.

### LEARNING OBJECTIVES

After reading this article you will be able to:

- explain how different models of the self in dementia suggest its resilience and may help in diagnostic counselling
- explain how citizenship is influenced by everyday activities and material objects
- consider dementia from a post-humanist perspective, offering some clinical initiatives, but also the possibility of iatrogenic harm.

The rising prevalence of dementia (from 57.4 million worldwide in 2019 to a predicted 152.8 million in 2050) due to population ageing poses a wide range of social and health challenges (Nichols 2022). Increasing dissatisfaction with the medical model's inability to account for the wide variation

in the individual experience of dementia has led to a proliferation of alternative theories of dementia arising from sociological and critical theory viewpoints. Some have accused the medical model of dehumanising people with dementia and failing to deliver treatments with substantive clinical effects (Fletcher 2023). In this article we consider how some of these perspectives, which challenge many prevailing medical assumptions about dementia, can be used alongside more traditional clinical ideas to improve the experience of diagnosis and post-diagnostic care for people with dementia. Although the use of 'dementia' as a singular umbrella term is almost as nonsensical as 'cancer' (given the multitude of aetiologies and varied individual experiences that it subsumes), it is used here for heuristic purposes. This article is most pertinent to late-onset early- to mid-stage dementia and may have less applicability to the challenges faced by younger people with the condition or those in more advanced or terminal phases of the condition. Finally, we introduce clinicians to some conceptual and practical implications of contemporary social science. This is valuable but, nonetheless, we must remember that most dementia care is 'informal', provided by family members and taking place beyond the clinic.

### Acknowledging current limitations

#### *The unstable nosology of dementia*

Ever since a group of influential German physicians (Alzheimer, Pick, Krapelin et al) reframed senility as a neurodegenerative disease over a century ago, the neurocognitive positioning of dementia has been contentious (Herrup 2021). This relates, in part, to the long-standing pathophysiological, cognitive and epidemiological challenges of differentiating the pathological and the normal to define a categorical dementia syndrome (Brayne 2007). The nosology of dementia remains unstable, with blurred and dynamic distinctions between aetiological subtypes (Morris 2000) and ever-changing diagnostic criteria, with limbic-predominant age-associated TDP-43 encephalopathy (LATE), vascular

**People** Mo G. Ray, Miriam Bernard, Judith Phillips, 2018-06-26 This timely text highlights the importance of informed and critical practice in social work with older people. With an emphasis on reflection throughout, it argues for the need to rethink how social workers support some of the most vulnerable people in society. The text begins with an exploration of the relationship between gerontology, the study of aging, and social work and demonstrates that a gerontological approach has long been missing from social work practice. The central chapters consider key issues affecting older people and social work practice, such as risk of poverty, memory loss and dementia, palliative and end-of-life care, loss and bereavement, moving into a care home. Bringing together theoretical and research insights, this agenda-setting text provides a sound base for creative practice with older people. All those looking to make a positive and discernible difference to older people will find this text rewarding reading. **Health Matters** Eric Mykhalovskiy, Jacqueline Choiniere, Pat Armstrong, Hugh Armstrong, 2020-05-12

In *Health Matters*, contributors from a range of disciplinary and interdisciplinary traditions address multiple dimensions of health care, such as nursing, midwifery, home care, pharmaceuticals, medical education, and palliative care. Through their explorations, the book poses questions about the role that the forms of expertise associated with evidence-based health care play in shaping how we understand and organize health services. Authors critique instrumental, managerial ways of knowing health care and focus on how such ways of knowing limit our understandings of and responses to health care problems and are linked with the growing commodification, individualization, and privatization of Canadian health services. Working with analytic perspectives such as feminism, Marxist political economy, critical ethnography, science and technology studies, governmentality studies, and institutional ethnography, the volume demonstrates how critical social science perspectives contribute alternative perspectives about what counts as health care problems and how to best to address them.

*Disability, Avoidance and the Academy* David Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon, indeed a potentially universal one, as life expectancies rise. Within the academic world, it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain. This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies. This innovative book brings together work in the humanities and the social sciences and draws on the

riches of cultural diversity to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture Disability Avoidance and the Academy Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies

**Health Care & Public Policy** George R. Palmer, Stephanie D. Short, 2000 *Introduction to Interdisciplinary Studies* Allen F. Repko, Rick Szostak, Michelle Phillips Buchberger, 2019-10-30 Completely updated to reflect advances in the literature on research learning and assessment Introduction to Interdisciplinary Studies is a comprehensive and practical overview of the roles and evolution of both disciplines and interdisciplinarity within the academy **Progressing Critical Posthuman Perspectives in Health Sociology** Kim McLeod, Simone Fullagar, 2024-08-16 This book shows the potential of posthuman thinking for rethinking health care experiences subjects and interventions It explores a range of posthuman dilemmas across diverse health issues as contributors grapple with the ethical ontological and epistemological relations of knowing and doing health The volume problematizes the rational agentic individual as the key driver of health related action and experience Contributors move beyond long held humanist assumptions about health illness and well being and attune theoretically and methodologically to the entangled relations or ecologies that instantiate realities They reimagine how care practices and healthcare experiences materialise through human non human relationality as biosocial environments Chapters explore and articulate the agency of more than human entities in health related processes to shed new light on health interventions evaluations and health policy Taken together the book highlights that although posthumanism enables health sociologists to progress particular agendas it is essential to further problematise the posthuman decentring of the human by bringing sustained attention to bear on the ethical and political implications of this approach to knowledge making in health This field defining collection consolidates and builds momentum in the burgeoning area of posthuman thinking in health It will appeal to scholars and researchers seeking to understand health as a relational achievement better This book was originally published as a special issue of Health Sociology Review *Critical Perspectives on Safeguarding Children* Karen Broadhurst, Chris Grover, Janet Jamieson, 2009-08-20 A critical and evidence based review of current and future child protection policy and practice Provides evidence based perspective with an up to date overview of policy and practice Covers several disciplinary boundaries Goes beyond mere description to enable engagement in critical analysis of various policy areas as they relate to children and families Drugs and Society Glen Hanson, Peter Venturelli, Annette Fleckenstein, 2011-08-31 Thoroughly revised and updated Drugs and Society Eleventh Edition contains the most current

information available concerning drug use and abuse Written in an objective and user friendly manner this best selling text continues to captivate students by taking a biological approach to the impact of drug use and abuse on the lives of ordinary people The Eleventh Edition incorporates the authors combined expertise in pharmacology drug abuse and sociology and extensive experience in research teaching drug policy making and drug policy implementation and includes hundreds of new citations that reflect the current state of drug abuse issues and the rapidly changing issues of substance abuse addiction

*Critical and Cultural Interactionism* Michael Hviid Jacobsen,2019-03-28 One of the longest standing traditions in sociology interactionism is concerned with studying human interaction and showing how society to a large part is constituted by patterns of interaction In spite of the work of figures such as Robert E Park Everett C Hughes Erving Goffman Herbert Blumer Norman K Denzin and Gary Alan Fine interactionism perhaps owing to its association with the perspective of symbolic interactionism remains something of an odd man out in mainstream sociology This book seeks to rectify this apparent neglect by bringing together critical social theories and microsociological approaches to research thus revealing the critical and cultural potentials in interactionism the chapters arguing that far from being oriented towards the status quo interactionism in fact contains a critical and cultural edge Presenting the latest work from some of the leading figures in interactionist thought to show recent developments in the field and offer an overview of some of the most potent and prominent ideas within critical and cultural criminology *Critical and Cultural Interactionism* will appeal to scholars of sociology with interests in interactionism social theory research methods and criminology

*Against Critical Thinking in Health, Social Care and Social Work* Tom Grimwood,2023-09-08 This book stages a provocative dialogue between social work health and social care and contemporary philosophy in order to inform theory and practice in a complex and challenging world Today the social world is marked by deep rooted complexities tensions and challenges Health workers and social workers are constantly reminded to employ critical thinking to navigate this world through their practice But given how many of these challenges pose significant problems for the theories that these subjects have traditionally drawn upon should we now be critical of critical thinking its assumptions its basis and its aspirations itself Arguing that health and social work theory must reconsider its deep rooted assumptions about criticality in order to navigate complex neoliberalism post truth and the relationship between language and late capitalism it examines how the fusion of theory and practice can re imagine critical thinking for health social care and social work It will be of interest to all scholars students and professionals of social work and health and social care

**Power and Conflict Between Doctors and Nurses** Maureen A. Coombs,2004-02-24 Through observations in three intensive care units this book draws on the reality of practice to explore how nurses and doctors work in intensive care settings It examines the power held by the competing knowledge bases the roles of the different professions the decision making process the sources of conflict the need for change Drawing together sociological theories and clinical practice *Power and Conflict Between Doctors and Nurses* explores the role of nurses in delivering

contemporary health care It makes a strong case for interdisciplinary working and is particularly timely when health care policy is challenging work boundaries in health care

*Service User Involvement in Social Work Education* Hugh McLaughlin, Joe Duffy, Brendan McKeever, June Sadd, 2019-10-23

In 2006 Social Work Education produced the first special edition vol 25 no 4 on service user and carer involvement in social work education with all of the articles coming from the United Kingdom In 2015 a mixed group of service users and social work academics wondered how and if the field had moved on since 2006 This publication confirms that it has Since 2006 service user and carer involvement in social work education has become embedded internationally this book contains contributions from Australia Israel Italy Norway Slovenia the Republic of Ireland and Sweden as well as all four nations of the United Kingdom Many of the contributions are jointly written with service users and carers highlighting the innovative practices which challenge social work academics students social workers and managers to think how we can all benefit from learning with and from service users and carers This book ably demonstrates that service users and carers can be effectively involved in social work curriculum planning delivery assessment and management This is not to say that these issues are not without their tension challenges or struggles but working with these helps to ensure that the social workers and managers of the future can practice more effectively meeting service user and carer priorities and needs The chapters in this book were originally published as a double special issue of Social Work Education
