Planning in Cold War Europe Michel Christian, Sandrine Kott, Ondrej Matejka, 2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War

Poverty as Ideology Andrew Martin Fischer, 2018-12-15 Winner of the International Studies in Poverty Prize awarded by the Comparative Research Programme on Poverty CROP and Zed Books Poverty has become the central focus of global development efforts with a vast body of research and funding dedicated to its alleviation And yet the field of poverty studies remains deeply ideological and has been used to justify wealth and power within the prevailing world order Andrew Martin Fischer clarifies this deeply political character from conceptions and measures of poverty through to their application as policies Poverty as Ideology shows how our dominant approaches to poverty studies have in fact served to reinforce the prevailing neoliberal ideology while neglecting the wider interests of social justice that are fundamental to creating more equitable societies Instead our development policies have created a poverty industry that obscures the dynamic reproductions of poverty within contemporary capitalist development and promotes segregation in the name of science and charity Fischer argues that an effective and lasting solution to global poverty requires us to reorient our efforts away from current fixations on productivity and towards more equitable distributions of wealth and resources This provocative work offers a radical new approach to understanding poverty based on a comprehensive and accessible critique of key concepts and research methods It upends much of the received wisdom to provide an invaluable resource for students teachers and researchers across the social sciences
