Business Policy and Participative Decision-Making Wilson Essien Ph.D.,2019-07-08 The glue between efficient productivity and profitability is great decision making I do not think that a farmer has ever sown rice and harvested corn In computers the most common language is GIGO meaning garbage in garbage out Usually the decisions we make are our personalities and yet very few people accept responsibility for their actions their failures in business or in any endeavor in which they have failed They desire to blame others without remembering GIGO I have articulated the mystery that surrounds the lone decision maker or the CEO who enjoys lonely decision making and blaming his or her failures on the engineer or the accountant in his company The new name for decision making is participative decision making In this the senior officers take part but separately the engineers accountants supervisors workers and maintenance people form another group Both platforms must have a dialogue format there must be a writer or clerk a vote taken on each discussion for its authenticity or viability and in the end the senior officers must compare their notes with the second group so that amendments can be made where necessary The final product is now ready to be presented before the board of directors as a formal decision for the company In a smaller company this activity stops with the owner but the owner must understand that two heads are usually better than one The CEO and his group must not be taken over by egos the only time for pride in business is when business is doing well financially Even then business needs a lot of careful activity because pride goes before a fall It is good to entrust the CEO with the decision making responsibility but it is the biggest risk a business can take because business is a collection of ideas Therefore it a discipline of collective learning and inquiry Any student manager or business owner who wants to use participative decision making skills in his or her business or as a consultant in participative decision making should attend a workshop at least twice and read about participative decision making thoroughly and practice it from case studies

The Dumbest Guy at the Table David Shein,2022-08-02 Twenty one years after selling the company that I founded Com Tech Communications for an enterprise value of over 1 billion arguably Australia s first tech

unicorn I decided to write a book Drawing on over three decades of experience gee I m getting old and sharing some lessons that I hope will provide valuable advice to anyone looking to start a company or manage a good business Since 1987 I have hired hundreds of outstanding people knowing that if I paid well listened to their valuable ideas and ensured that they loved coming to work every day I could still be part of something great even if I am the dumbest guy at the table These principles have formed the basis of my management style for over 30 years So much has changed from a technology perspective yet in some ways nothing has changed Products come and go but you will always have customers staff and business partners How you treat these three constituents will be the difference between building a good company a great company an irrelevant company or one that simply disappears As a businessman David Shein has lived up to his ideals Don t be fooled by the title of the book this guy really knows his shit Ian Chappell
