Branes and DAHA Representations Sergei Gukov,Peter Koroteev,Satoshi Nawata,Du Pei,Ingmar Saberi,2023-08-28 In recent years there has been an increased interest in exploring the connections between various disciplines of mathematics and theoretical physics such as representation theory algebraic geometry quantum field theory and string theory One of the challenges of modern mathematical physics is to understand rigorously the idea of quantization The program of quantization by branes which comes from string theory is explored in the book This open access book provides a detailed description of the geometric approach to the representation theory of the double affine Hecke algebra DAHA of rank one Spherical DAHA is known to arise from the deformation quantization of the moduli space of $SL(2, \mathbb{C})$ flat connections on the punctured torus The authors demonstrate the study of the topological A model on this moduli space and establish a correspondence between Lagrangian branes of the A model and DAHA modules The finite dimensional DAHA representations are shown to be in one to one correspondence with the compact Lagrangian branes Along the way the authors discover new finite dimensional indecomposable representations They proceed to embed the A model story in an M theory brane construction closely related to the one used in the 3d/3d correspondence as a result modular tensor categories behind particular finite dimensional representations with $PSL(2, \mathbb{Z})$ action are identified The relationship of Coulomb branch geometry and algebras of line operators in 4d $N=2$ theories to the double affine Hecke algebra is studied further by using a further connection to the fivebrane system for the class S construction The book is targeted at experts in mathematical physics representation theory algebraic geometry and string theory This is an open access book

The Forked Juniper Roberto Cantú, 2016-11-23 Widely acclaimed as the founder of Chicano literature Rudolfo Anaya is one of America's most compelling and prolific authors. A recipient of a National Humanities Medal and best known for his debut novel *Bless Me Ultima*, his writings span multiple genres from novels and essays to plays, poems, and children's stories. Despite his prominence, critical studies of Anaya's writings have appeared almost solely in journals, and the last book-length collection of essays on his work is now more than twenty-five years old. *The Forked Juniper* remedies this gap by offering new critical evaluations of Anaya's ever-evolving artistry. Edited by distinguished Chicano studies scholar Roberto Cantú, *The Forked Juniper* presents thirteen essays written by U.S. Mexican and German critics and academics. The essayists employ a range of critical methods in their analyses of such major works as *Bless Me Ultima* (1972), *Jalamanta: A Message from the Desert* (1996), and the *Sonny Baca* narrative quartet (1995-2005). Through the lens of cultural studies, the essayists also discuss intriguing themes in Anaya's writings, such as witchcraft in colonial New Mexico, the reconceptualization of Aztlán, and the aesthetics of the New World Baroque. The volume concludes with an interview with renowned filmmaker David Ellis, who produced the 2014 film *Rudolfo Anaya: The Magic of Words*. The symbol of the forked juniper tree, venerated as an emblem of healing and peace in some spiritual traditions, and a compelling image in *Bless Me Ultima*, is open to multiple interpretations. It echoes the manifold meanings the contributors to this volume reveal in Anaya's boundlessly imaginative literature. *The Forked Juniper* illuminates both the artistry of Anaya's writings and the culture history and diverse religious traditions of his beloved Nuevo Mexico. It is an essential reference for any reader seeking greater understanding of Anaya's world-embracing work.
