Queenship, Gender, and Reputation in the Medieval and Early Modern West, 1060-1600 Zita Eva Rohr, Lisa Benz, 2016-10-08 This edited collection opens new ways to look at queenship in areas and countries not usually studied and reflects the increasingly interdisciplinary work and geographic range of the field This

book is a forerunner in queenship and re-invents the reputations of the women and some of the men. The contributors answer questions about the nature of queenship, reputation of queens and gender roles in the medieval and early modern west. The essays question the viability of propaganda, gossip and rumor that still characterizes some queens in modern histories. The wide geographic range covered by the contributors moves queenship studies beyond France and England to understudied places such as Sweden and Hungary. Even the essays on more familiar countries explore areas not usually studied such as the role of Edward II's stepmother Margaret of France in Gaveston's downfall. The chapters clearly have a common thread and the editors' summary and description of the collection is valuable in assisting the reader. The collection is divided into two sections: Biography, Gossip and History; and Politics, Ambition and Scandal. The editors and contributors, including Zita Eva Rohr and Elena Woodacre, are scholars at the top of their field and several engage and debate with recent scholarship. This collection will appeal internationally to literary scholars and gender studies scholars as well as historians interested in the countries included in the collection.

A Cultural History of Women in the Middle Ages Kim M. Phillips, 2015-04-02
The medieval era has been described as the Age of Chivalry and the Age of Faith, but also as the Dark Ages. Medieval women have often been viewed as subject to a punishing misogyny which limited their legal rights and economic activities, but some scholars have claimed they enjoyed a rough and ready equality with men. The contrasting figures of Eve and the Virgin Mary loom over historians' interpretations of the period 1000-1500. Yet a wealth of recent historiography goes behind these conventional motifs, showing how medieval women's lives were shaped by status, age, life stage, geography, and religion, as well as by gender. *A Cultural History of Women in the Middle Ages* presents essays on medieval women's life cycle, bodies, and sexuality, religion, and popular beliefs, medicine and disease, public and private realms, education and work, power, and artistic representation, to illustrate the diversity of medieval women's lives and constructions of femininity.

Jennifer Ward,2014-06-11 Women in Medieval Europe were expected to be submissive but such a broad picture ignores great areas of female experience Between the thirteenth and fifteenth centuries women are found in the workplace as well as the home and some women were numbered among the key rulers saints and mystics of the medieval world Opportunities and activities changed over time and by 1500 the world of work was becoming increasingly restricted for women Women of all social groups were primarily engaged with their families looking after husband and children and running the household Patterns of work varied geographically In the northern towns women engaged in a wide range of crafts with a small number becoming entrepreneurs Many of the poor made a living as servants and labourers Prostitution flourished in many medieval towns Some women turned to the religious life and here opportunities burgeoned in the thirteenth century The Middle Ages are not remote from the twenty first century the lives of medieval women evoke a response today The medieval mother faced similar problems to her modern counterpart The sheer variety of women s experience in the later Middle Ages is fully brought out in this book **The Oxford Handbook of Women and Gender in Medieval Europe** Judith M. Bennett,Ruth Mazo Karras,2013-08-22 The Oxford Handbook of Women and Gender in Medieval Europe provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C E The essays collected in this volume speak to interpretative challenges common to all fields of women s and gender history that is how best to uncover the experiences of ordinary people from archives formed mainly by and about elite males and how to combine social histories of lived experiences with cultural histories of gendered discourses and identities The collection focuses on Western Europe in the Middle Ages but offers some consideration of medieval Islam and Byzantium The Handbook is structured into seven sections Christian Jewish and Muslim thought law in theory and practice domestic life and material culture labour land and economy bodies and sexualities gender and holiness and the interplay of continuity and change throughout the medieval period It contains material from some of the foremost scholars in this field and it not only serves as the major reference text in medieval and gender studies but also provides an agenda for future new research *Material Culture and Queenship in 14th-century France* Marguerite Keane,2016-05-18 In *Material Culture and Queenship in 14th century France* The Testament of Blanche of Navarre 1331 1398 Marguerite Keane considers the object collection of the long lived fourteenth century French queen Blanche of Navarre the wife of Philip VI d 1350 This queen s ownership of works of art books jewelry reliquaries and textiles among others and her perceptions of these objects is well documented because she wrote detailed testaments in 1396 and 1398 in which she described her possessions and who she wished to receive them Keane connects the patronage of Blanche of Navarre to her interest in her status and reputation as a dowager queen as well as bringing to life the material adornment and devotional interests of a medieval queen and her household **Women and Wealth in Late Medieval Europe** T. Earenfight,2010-03-15 The twelve essays in *Women and Wealth in Late Medieval*

Europe re examine the vexing issue of women money wealth and power from distinctive perspectives literature history architectural history using new archival sources The contributors examine how money and changing attitudes toward wealth affected power relations between women and men of all ranks especially the patriarchal social forces that constrained the range of women s economic choices Employing theories on gender culture and power this volume reveals wealth as both the motive force in gender relations and a precise indicator of other more subtle forms of power and influence mediated by gender

Women In Dark Age And Early Medieval Europe c.500-1200 Helen Jewell, 2006-10-04 The period 1200 1550 opened in a time of population expansion but went on to suffer the demographically cataclysmic effects of the plague beginning with the Black Death of 1347 51 The period dawned with a confident papacy and the Albigensian crusade against heretics and ended with the Catholic church torn apart by the Protestant Reformation Huge challenges were affecting society in various ways but they did not always affect men and women in the same ways Helen M Jewell provides a lively survey of western European women s activities and experiences during this timeframe The core chapters investigate The function of women in the countryside and towns The role of women in the ruling and landholding classes Women within the context of religion This practical centre of the book is embedded in an analysis of the gender theories inherited from the earlier Middle Ages which continued to underpin laws which restricted women s activity an education system which offered them inferior institutional provision and a church which denied them ministry Three individuals who vastly exceeded these expectations crashing through the glass ceilings of their day are brought together in a fascinating final chapter Combining a historiographical survey of trends over the last thirty years with

more recent scholarship this is as indispensable introduction for anyone with an interest in women's history from the late Medieval period through to the Reformation

Queens, Queenship, and Natural Resource Management in Premodern Europe, 1400-1800 Susan Broomhall, Clare Davidson, 2025-04-14 This innovative collection examines how European queens participated in the conceptualisation, mobilisation and transformation of natural resources from the fifteenth to the end of the eighteenth century. Early modern queens interacted with human and nonhuman worlds through natural resource management activities that have rarely been the focus of sustained historical analysis. This volume engages with the wide range of nonhuman materials, living and inanimate, that premodern queens had the power to direct and dispose of, to utilise, enjoy and commercialise, to visualise and commemorate and even to destroy on and in their lands, forests, waterways and oceans. Both queenship and natural resource management were configured by contemporary gender ideologies which structured a dynamic relationship between queenship and the more-than-human world. The case studies in this collection explore how queens' natural resource management was impacted by their cultural and personal contexts, particularly their changing status as queens regnant, consort, dowager or regent. The contributors draw on diverse materials and employ a variety of historical approaches, including political, economic, cultural, literary, legal and animal studies, to demonstrate how queens interacted with the nonhuman world and how their engagements were embedded in premodern gender rules. This collection will be of great value for undergraduate and postgraduate students and scholars in gender and women's history, environmental history, queenship studies and early modern studies.

Women's Roles in the Middle Ages Sandy Bardsley, 2007-06-30 Information about women in this truly fascinating period from 500 to 1500 is in great demand and has been a challenge for historians to uncover. Bardsley has mined a wide range of primary sources, from noblewomen's writing, court rolls, chivalric literature, laws and legal documents to archaeology and artwork. This fresh survey provides readers with an excellent understanding of how women, high and low, fared in terms of religion, work, family, law, culture and politics and public life. Even though medieval women were divided by social class, religion, age, marital status, place and period, they were all subject to an overarching patriarchal structure and sometimes could transcend their inferior status. Numerous examples of these exceptional women and their words are included. Chapter 1 examines religion, focusing on women's roles in the early Christian church, the lives of nuns and other professional religious women such as anchoresses and Beguines, the participation of Christian laywomen and the experiences of Jewish and Islamic women in Western Europe. The second chapter examines women's work, looking in turn at the kinds of work performed by peasant women, townswomen and noblewomen. Women's roles within the family form the subject of the third chapter. This chapter follows women throughout the typical lifecycle, from girl to widow, examining the expectations and experiences of women at each stage. Chapter 4, 'Women and the Law', focuses on the ways in which laws both restricted and protected women. It also considers the crimes with which women were most often charged and surveys laws regarding marriage and widowhood. Women's roles in

creative arts form the basis of the fifth chapter Women and Culture This chapter examines women s roles as artists authors composers and patrons as well as investigating the ways in which women were represented in works produced by men Finally chapter 6 discusses women s experiences in politics and public life While women as a group were typically banned from holding positions of public authority some found ways to get around this stricture while others were able to exercise power behind the scenes The final chapter thus encapsulates a major theme of this book the interplay between broader patriarchal forces that limited women s status and autonomy and the role of individuals who were able to overcome or circumvent such forces Medieval women were as a group subordinate to their husbands and fathers but certain women under certain circumstances evaded subordination *Queenship in Medieval France, 1300-1500* Murielle

Gaude-Ferragu, 2016-08-31 This book examines the power held by the French medieval queens during the fourteenth and fifteenth centuries and their larger roles within the kingdom at a time when women were excluded from succession to the throne Well before Catherine and Marie de Medici the last medieval French queens played an essential role in the monarchy not only because they bore the weight of their dynasty s destiny but also because they embodied royal majesty alongside their husbands Since women were excluded from the French crown in 1316 they were only deemed as queen consorts Far from being confined solely to the private sphere however these queens participated in the communication of power and contributed to the proper functioning of court society From Isabeau of Bavaria and her political influence during her husband s intermittent absences to Anne of Brittany s reign this book sheds light on the meaning and complexity of the office of queen and ultimately the female history of power
