**Formation Attacks** Joel Johnson, 2010 As a Chess Master who has spent many years playing aggressive and attacking chess I was quite dismayed during a recent visit to my local bookstore I was in search of a book that covered an array of attacks against many Pawn formations in an organized fashion Needless to say my search came up empty The books on

attacking fell short in many ways Many of the books were simply a small collection of attack games with no instruction about the art of attacking or about the skills required to become a great attacker None of them provided the reader with any reference information about attacking or the weaknesses of various Pawn formations None of them contained games with attacking themes like the Traxler Variation of the Two Knight s Defense and the Jack Young Fishing Pole None of them contained any wild attacking ideas that can stream from opening gambits such as the Blackmar Diemer Gambit King s Gambit Scotch Gambit Nakhmanson Gambit etc 500 pages 435 games Figurine Chess Notation      **Chess and Individual Differences** Angel Blanch,2020-12-17 Research from the neurosciences and behavioural sciences highlights the importance of individual differences in explaining human behaviour Individual differences in core psychological constructs such as intelligence or personality account for meaningful variations in a vast range of responses and behaviours Aspects of chess have been increasingly used in the past to evaluate a myriad of psychological theories and several of these studies consider individual differences to be key constructs in their respective fields This book summarizes the research surrounding the psychology of chess from an individual differences perspective The findings accumulated from nearly forty years worth of research about chess and individual differences are brought together to show what is known and still unknown about the psychology of chess with an emphasis on how people differ from one another      **Attacking 101: Volume #003** Joel Johnson,2016-04-16 The goal of the books in this series Attacking 101 Volume nnn is to provide detailed analysis of my own attack games played against lower rated players The players are all rated in the range of 1700 to 2100 They make the same errors you regularly witness in your games but here you get to see a Chess Master dissect and exploit the moves show why they are wrong and how to punish the opponent s poor play This book covers White Openings and has deep coverage of the Center Game and Sicilian Grand Prix all lines
