Research Methods with Gay, Lesbian, Bisexual, and Transgender Populations William Meezan, James I. Martin, 2012-12-06

Take an in-depth look at what works and what doesn't in research with GLBT populations. This essential book examines the usefulness of current frameworks for research with GLBT populations and highlights the necessity for greater complexity in the conceptualization and design of research with these populations. It will help you understand the need for more inclusive and representative samples and the need to protect the privacy of GLBT research participants and ways to accomplish these goals. In addition, *Research Methods with Gay, Lesbian, Bisexual, and Transgender Populations* considers the advantages and limitations of having an inside perspective when conducting research with these populations. It also explores the myriad ways in which this research can be used to better understand issues facing GLBT communities. Specifically, *Research Methods with Gay, Lesbian, Bisexual, and Transgender Populations* discusses eight strategies that outsiders can use to overcome barriers to doing their work: the challenges of finding and studying older members of gay and lesbian communities; the special challenges that studying gay drug users pose to the researcher; factors affecting research with urban Black and African American GLBT populations; sampling issues including ways to overcome the challenges of conducting research with sexual minority adolescents; issues related to dealing with institutional review boards and lessons derived from empirical articles in the *Journal of Gay, Lesbian, and Social Services*; unique features of AIDS service organizations to consider when developing an evaluation strategy; ethical standards for research and evaluation with GLBT populations; and a great deal more.

From the Foreword by Anthony R. D'Augelli: In social science research, the effort to extract durable principles of social causality from the apparent randomness of everyday life requires the construction of reliable, if tentative, knowledge that is significantly more informative than mere speculation. With our ever-increasing knowledge base, increasingly sophisticated and powerful quantitative and qualitative methodologies, and with an ever-expanding cadre of researchers, our ability to discern patterns of development of GLBT people from birth to death, the unique qualities of their relationships, and the impact of communities and cultures on the ways in which their sexualities are manifested will come into sharper focus. In this way, research becomes a tool by which GLBT people transcend invisibility and marginalization. As new research accumulates, the unique contributions that GLBT lives make to our understanding of the nature of human development will be documented in ways never before thought possible. Within the larger context of social science research on GLBT populations, this book describes the current status of social service researchers in their quest for methodological sophistication and conceptual complexity. The work of the contributors

to this volume exemplifies the progress that has been made since the first research reports on this topic were published

Sons Talk About Their Gay Fathers Andrew Gottlieb, 2014-01-14. Examine the impact of disclosure on sons whose fathers are gay. In this book Andrew Gottlieb, author of *Out of the Twilight: Fathers of Gay Men Speak*, explores yet another side of the impact of homosexuality on families. He now looks at how sons react to learning that their fathers are gay, allowing us to see over time how this has changed their family relationships and their own lives. Simply and elegantly written, this psychoanalytically oriented qualitative research study is accessible to both the beginner and the more advanced researcher and practitioner. It draws from a wide range of literary, popular, and psychological sources and includes an interview guide, a reference section, and an index. When someone discloses as gay, lesbian, or bisexual, it is not just an individual event; it is a family event. Based on estimates of married gay, lesbian, and bisexual persons, a spouse's coming out affects up to 2,000,000 couples. Yet its impact has been largely ignored. Children's voices are the least often heard. Little has been written about sons of fathers who came out during or after marriage. Data for studies that do exist most often draw from the fathers' point of view. The significance of this study lies in its comprehensive, detailed picture of sons and gay fathers as they develop their separate self-images as well as the images of their son-father relationships over time. Painful, sensitive, often triumphant, the stories and the author's analysis of their thoughts, perceptions, and feelings afford a multidimensional, longitudinal viewing. Step by step, we follow the complicated dance of these sons and fathers as they develop and define their connection from the foreword by Amity Pierce Buxton, author of *The Other Side of the Closet: The Coming Out Crisis for Straight Spouses and Families*. *Sons Talk About Their Gay Fathers: Life Curves* is a storybook, an extended narrative, moved along but not overshadowed by psychoanalytic theory. The introduction briefly reviews more recent writings of the fathering experience as told by gay men themselves, setting the stage for Father to Child to look at the father as seen through the ever-shifting eyes of his son at different phases of the life cycle. *The Quest for the Real Father* is an examination of sons' responses to their fathers' homosexuality as captured in film, fiction, nonfiction, television, and the psychological literature. *Methodology* is the story of the research process, including sampling, the search for subjects, trustworthiness, the interview, bias, and data collection. *The Stories* is an anthology of narratives the author constructed from the interview material, painting an intimate portrait of each individual son. *Findings* is a categorical analysis. *Discussion* is a summary of all the preceding material, cast in a developmental framework highlighting implications for future research and clinical practice.

Families, Schooling Publics Anne Harris, Stacy Holman Jones, Sandra Faulkner, Eloise Brook, 2017-09-19 At a time of increasingly diverse and dynamic debates on the intersections of contemporary LGBTQ rights trans visibility same sex families and sexualities education there is surprisingly little writing on what it means to queer notions of family and kinship networks in global context Building on the recent wave of scholarship on queerness in families and how families intersect with schools schooling and educational institutions more broadly this book considers how we are taught to enact family at home at school and through the media and how this pedagogy has shifted and changed over time Conceived as a collection of keywords that take up the vocabulary of queerness queering practices and queer families the authors employ a nuanced intersectional approach to connect the damaging and persistent invisibility of their subject to the complex and dominant and normalizing discourses of marriage and family Offering post structural post humanist and new materialist perspectives on kinship and the family this book moves the conversation forward by critically interrogating and expanding upon current knowledges about gender diversity queer kinship and pedagogy

Navigating Through the Storm Aharon Aviram, 2010-01-01 This book aims to systematically tackle the most severe crisis to ever beset Western education systems

which stems from the growing clash between the Platonic modern civilization still very much at the core of prevailing education systems and the postmodern civilization which has become dominant in Western societies in the last generations. The book counters this crisis by radically and systematically rethinking education for postmodern democracies beginning by comprehensively analyzing the main features of current postmodern storms along with their engulfing socio cultural and educational implications and proceeding to offer a theoretical and practical blueprint designed to harness these storms for optimally realizing the basic Humanistic values that should guide education in liberal democracies: personal autonomy, morality and dialogical belonging.
