Quest History Meaning In Religion:

The Quest Mircea Eliade, 1984-05-15 In *The Quest* Mircea Eliade stresses the cultural function that a study of the history of religions can play in a secularized society. He writes for the intelligent general reader in the hope that what he calls a new humanism will be engendered by a confrontation of modern Western man with unknown or less familiar worlds of meaning. Each of these essays contains insights which will be fruitful and challenging for professional students of religion but at the same time they all retain the kind of cultural relevance and clarity of style which makes them accessible to anyone seriously concerned with man and his religious possibilities. Joseph M Kitagawa *Religious Education* **The Quest: History and Meaning in Religion**, 1975 **The Collected Writings of Charles H. Long** Charles H. Long, 2018-02-22 Charles H Long is one of the most influential and pioneering scholars in the study of religion from the past 50 years. This is the first comprehensive collection of his writings edited by Long himself and contains 38 pieces including both published and previously unpublished articles, lectures, an interview, and two book reviews. The foreword is provided by Jennifer Reid, a former student of Long. The collection is divided into four thematic parts: America and the Study of Religion; Theory and Method in the Study of Religion; African American Religion in the United States; *Kindling Embers and Sparks*. Long's introduction provides much awaited insight into his reflections on his work expanding on questions that remained unanswered in his classic and influential text *Significations: Signs, Symbols, and Images in the Interpretation of Images* (1986). In particular, the new introductory essay explores the significance of ellipses that which is omitted, the projected spaces of the Other in the study of religion. Considered the preeminent founder and advocate of the study of Black Religion, Long was exploring religion and colonialism and the importance of Afro American religion as early as the 1960s and early 1970s, and this collection of his thinking which moves across the formations of religious studies, African diasporic studies, and social and cultural theory is a must-have addition for any institutional or personal library. [A History of Religious Ideas Volume 1](#) Mircea Eliade, 2014-02-14 Everyone who cares about the human adventure will find new information and new angles of vision. Martin E Marty *The New York Times Book Review*. This extraordinary work delves into the subject of religion in the prehistoric and ancient worlds, humankind's earliest quests for meaning. From Neanderthal burials to the mythology of the Iron Age to the religions of Mesopotamia, Egypt, Greece, Israel, India, and beyond, it offers both an appreciation of the wide-ranging diversity of religious expression and a consideration of the fundamental unity of religious phenomena. Will arouse the interest of all historians of western religion since it includes chapters on the religions of Canaan and Israel. However, the book must be read cover to cover if one wants to grasp the significance of its gigantic historical scope. Church History *History and Belief* Robert Eric Frykenberg, 1996 In this study of the relationship between history and belief, the author shows how our underlying commitments, whether religious or ideological, determine which events we find significant enough to remember as history, yet how those same beliefs distort our understandings of events, leaving them incomplete and contingent. Textbook of Spirituality in Healthcare Mark Cobb, Christina Puchalski, Bruce Rumbold, 2012-08-09 The relationship between spirituality and healthcare is historical intellectual and practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource

In Search of the Sacred Clinton Bennett, 1996-01-01 This text traces the growth and development of two related disciplines anthropology and the study of religions Locating these disciplines within the intellectual climate of the 19th century the study considers the contributions of scholars such as James George Frazer F Max Muller Emile Durkheim Mary Douglas and Clifford Geertz within an historical framework The author argues that both anthropologists and students of religion have abandoned an objective approach in favour of personal engagement with their subjects replacing observation with conversation monologue with dialogue a text based with people based approach He reveals how each discipline has influenced the other both in terms of methodology and by the provision of data The book also explores the criticism levelled at both disciplines that they have aided colonial domination of the developing world

Experience and Religion Wilhelm Dupré, 2005 The enactment of humanity begins with experiences and culminates in the effects of coping with experiences Experience confirms the human potential but indicates also its limitations both in the sense that the absence of experiences undermines established modes of behavior and that disregard and misunderstanding of experiences lead to distorted forms of personal and cultural relations This book is an attempt to localize religion as well as the study of religions within the context of experiences and as a topic of philosophical inquiry Focusing on the question of specifically religious experiences and investigating various models of the relationship between

religion and experience the study suggests that no specific experiences are needed to understand the emergence and development of religious traditions and attitudes Assessing the implications of basic questions and attitudes in religious studies it presents a theory of religion which is rooted in the internal dynamics of being human and cultural and marked by a culture oriented understanding of philosophy The book concludes with a discussion of various phenomena which can be addressed as modes and forms of implicit religion since they do not comply with expectations of traditional or explicit religion

Mircea Eliade's Vision for a New Humanism David Cave, 1993 Mircea Eliade influential writer and scholar of religion envisioned a spiritually destitute modern culture coming into renewed meaning through the recovery of archetypal myths and symbols Eliade foresaw this restoration of meaning bringing about a new humanism of existential meaning and cultural religious unity but left it ambiguously defined Cave sets forward a structural description of what this new humanism might have meant for Eliade and what it signifies for modern culture through a biographical exegesis of Eliade's life and writings from his early years in Romania to his last years as professor of the history of religions at the University of Chicago Addressing Eliade's political associations and espousals on Romanian politics and culture theories on myth and symbols existential and comparative hermeneutics literature of the fantastic interpretation of homo religiosus views on the loss of meaning in modern consciousness and on the cosmic spirituality of archaic humans as well as other subjects Cave sets these topics within the totality of Eliade's oeuvre and evaluates them through the lens of the new humanism Cave's book is the first to organize and evaluate the whole of Eliade's work around a guiding principle and on Eliade's own terms To augment the new humanism Cave uses data and themes from the history of religions and draws on philosophy anthropology psychology modern science and literary studies The result is a broad and probing overview of this most influential enigmatic and frequently controversial man Cave concludes by endorsing Eliade's radically pluralistic vision which he argues offers a key to the revitalization of our demythologized and material culture Cave also repositions previous Eliadean studies and places the new humanism as the paradigm in relation to which future readings of Eliade should be evaluated

God Alexander Waugh, 2004-05 This is a book about God Not just any god but the god that created Adam and Eve the god of Abraham the god of the Jews the god of the Christians and the god of Islam without a doubt the most influential figure in the history of human civilization But what do we really know about him Who is he Where did he come from What does he look like What sort of character does he have What if anything does he eat Does he have a family In what ways can he be said to even exist at all Alexander Waugh has been asking questions like these for as long as he can remember Now having drawn from an enormous range of sources from the sacred books of the Torah the Christian New

Testament and the Islamic Qur'an from the Greek Apocrypha and the ancient texts of Nag Hammadi to the Dead Sea Scrolls he has sought out the answers Using material gleaned from the diverse writings of saints rabbis historians prophets atheists poets and mystics he has molded his findings into a singular striking biographical portrait of God Erudite perceptive and entertaining God reveals many startling and unexpected characteristics of the divine being From the simple stories of Genesis and Job explored from God's own viewpoint to the prophecies of Muhammad and Sybil and the intricate philosophies of Newton and Nietzsche Alexander Waugh has left no stone unturned in his compulsive mission to create a fascinating and complex portrait of God as humans have claimed to understand him

Faith and Work Timothy Ewest, 2018-01-01 Those who adhere to a faith tradition are longing for theories and insights into how they can be true to their faith within the workplace and yet be sensitive and respectful to others of varying faith commitments and beliefs Yet for Christians respect of other faith traditions is especially difficult since Christianity as the dominate religion has become secularized and institutionalized within the workplace as represented in holidays and days off Within the multiple theoretical and research dimensions of management religion and spirituality this book explores theoretical conceptual and strategic theories and research which consider how individuals and organizations integrate their Christian faith in the workplace and how these groups attempt to change society as a whole This historical movement is characterized by a desire for people to live a holistic life which integrates their Christian faith into the workplace also deemed faith at work Historically Christian's faith integration is manifested individually or collectively and is demonstrated in the ways it shapes and informs the values systems ethics character and attitudes towards work This edited volume draws themes out of the three historical epochs of the faith and work movement traced by Miller 2007 in the book *God at work The history and promise of the faith at work movement* These organizing themes while not congruent to the historical epochs do capture the ways in which people of faith have historically attempted to integrate their faith into the workplace These themes include Individual integration organizational strategies for integration and societal integration

Hermeneutics, Politics, and the History of Religions Christian K. Wedemeyer, Wendy Doniger, 2010 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach

s death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people s minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men s writings and their lives and in Eliade s case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men s contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies
