Schwartz,Marcel Poorthuis,2020-01-29 Time and space can take on a sacred nature in both Judaism and Christianity accompanied by a permanent critical attitude towards the sacred Conceptions of sacredness imply a conception of community and of society at large This study investigates the different attitudes toward sacred time and space from an interdisciplinary perspective ranging from the Biblical period through Qumran Patristics Rabbinics archaeology and theology to modern and even to post modern rituals This approach offers a fascinating insight into both the common heritage of Judaism and Christianity and their mutual differences Entheogens and the Development of Culture John A. Rush,2013-07-30 Entheogens and the Development of Culture makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association s Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today Anthropologists cultural historians and anyone interested in the effects of mind altering substances on the human mind and soul will find this book deeply informative and inspiring The Tree of Life Stephen B. Machnik,2021-03-25 What if the literary form of the Bible derived its pattern from the elementary process of creation Is there an underlying symbolic form to the book The Tree of Life is an analysis of this form and compares it to the operations of the intellect These operations are the process by which we come to know what is It also corresponds to the metaphysical elements which are the core of our being What becomes evident is that there is a form
