## Question Of Trust The Bbc Reith Lectures :

**A Question of Trust** Onora O'Neill, 2002-06-06 In this 2002 book Onora O'Neill investigates sources of deception in our society and re-examines questions of press freedom A Question of Trust Onora O'Neill, 2002 **Rethinking**

**Professional Governance** Kuhlmann, Ellen, Saks, Mike, 2008-04-09 In bringing together research from a wide range of continental European countries as well as the United Kingdom Canada and Australia the contributors to this text highlight different areas of governance as well as the various players involved in the policy process *Work and Leisure* John Trevor Haworth, Anthony James Veal, 2004 Examines the profound transformations in the nature and organization of work that are occurring worldwide with potentially far-reaching social and economic consequences **Work and Leisure** John T. Haworth, Anthony J. Veal, 2004-03-01 Globalization economic development and changes in social environments have put the relationships between work leisure social structure and quality of life under the spotlight Profound transformations in the nature and organization of work are occurring with potentially far-reaching social and economic consequences Increasingly organizations demand greater flexibility from their workforces and are introducing new technologies and practices in response to global competitive pressures At the same time many employees are experiencing long working hours increasing workloads and job insecurity along with the challenge of balancing work and domestic responsibilities These changes threaten long-term gain in leisure time while simultaneously the leisure environment is also changing radically as we see increasing commercialization and professionalization of leisure services and experiences the influence of the Internet the rise of gambling and the decline of community-based activity Exploring all of these issues this book brings together specially commissioned chapters from international experts in a wide range of disciplines concerned with work leisure and well-being Each author takes stock of the current position identifies core practical and theoretical issues and discusses possible future trends in order to provide an invaluable resource for all policy makers educators employers and researchers in the field

Red Tape Robin Ellison, 2018-06-14 Argues that the solution to the excess of laws regulation and regulators is to change the mindset of lawmakers The Politics of Evaluation David Taylor, Susan Balloch, 2005-01-19 The widespread popularity of evaluation is based on the need to provide evidence of the effectiveness of policies and programmes This book sees evaluation as an inherently political activity and using a wide range of examples it relates practical issues in evaluation design to their political contexts *Values for Care Practice* Sue Cuthbert, Jan Quallington, 2008-04-14 Foreword Introduction 1 Rights Equality and Anti-discriminatory Practice 2 Respect and Dignity 3 Autonomy 4 Trust Confidentiality and Truth telling 5 Protection from Harm and Promoting Independence 6 Values Accountability and Responsibility 7 Conclusion Value-based Reflection References Index **Law and the Regulation of Scientific Research** Mark Davies, 2022-08-12 Scientific research is fundamental to addressing issues of great importance to the development of human knowledge Scientific research fuels advances in medicine technology and other areas important to society and has to be credible

trustworthy and able to command confidence in the face of inevitable uncertainties Scientific researchers must be trusted and respected when they engage with knowledge acquisition and dissemination and as ethical guardians in their education and training roles of future generations of researchers The core values of scientific research transcend disciplinary and national boundaries and approaches to the organisation and oversight of research systems can impact significantly upon the ethics and conduct of researchers This book draws upon legal expertise to critically analyse issues of regulation conduct and ethics at the important interface between scientific research and regulatory and legal environments In so doing it aims to contribute important additional perspectives to the existing literature Case studies are engaged with to assist with the critical analysis of the current position and the consideration of future possibilities The book will be of interest to academics in the fields of science law and policy science and law students and scientific researchers at more advanced stages of their careers Research professionals in government and the private sector and legal practitioners with interests in the regulation of research should also find the work of interest      *Academic Identities in Higher Education* Linda Evans,Jon

Nixon,2015-04-23 Academic identity is continually being formed and reformed by the institutional socio cultural and political contexts within which academic practitioners operate In Europe the impact of the 2008 economic crisis and its continuing aftermath accounts for many of these changes but the diverse cultures and histories of different regions are also significant factors influencing how institutions adapt and resist and how identities are shaped *Academic Identities in Higher Education* highlights the multiple influences acting upon academic practitioners and documents some of the ways in which they are positioning themselves in relation to these often competing pressures At a time when higher education is undergoing huge structural and systemic change there is increasing uncertainty regarding the nature of academic identity Traditional notions compete with new and emergent ones which are still in the process of formation and articulation *Academic Identities in Higher Education* explores this process of formation and articulation and addresses the question what does it mean to be an academic in 21st century Europe      *The University Becoming* Søren S. E. Bengtsen,Sarah Robinson,Wesley

Shumar,2021-06-23 This volume wholeheartedly engages with the current climate in higher education and provides not only a thorough analysis of the foundational elements constituting higher education but also a critical discussion of possible connections to societal and cultural domains and policy debates Today higher education institutions and programs are beset with multiple and often conflicting pressures and demands Higher education is regarded by societies in general and at the political level in particular as a pathway to securing continued economic growth and ensuring cultural growth in surrounding societal contexts Future academics are expected to become experts within their disciplines and at the same time to acquire and develop generic competences and transferable skills directly translatable into job market and professional contexts These conflicting and fragmented policy approaches to higher education leaves academic leaders teacher researchers and students with an incoherent curriculum and a confused and eroded academic identity and societal outlook Much literature

within higher education research that engages with similar topics are dominated by a backwards looking and heavy critique of current political and educational conditions for the university and higher education This volume suggests a new tack that is defined by openness and optimism towards possibilities for a transformative higher education curriculum that at the same time stays firmly rooted within the foundational academic soil By drawing on and contributing to the emerging research field the philosophy and theory of higher education the book combines critique with a constructive and future oriented approach and outlook on higher education Further it combines and links philosophical discussions on the idea of the future university with societal responsibility and a curricular and formational awareness **Tep Vol 31-N2 Teacher Education and**

Practice,2018-09-21 **Local Ownership and Security Sector Reform** Timothy Donais,2008 The notion of local ownership has emerged in recent years as part of the contemporary commonsense of security sector reform SSR While the argument that externally driven reform processes are unsustainable is now widely accepted the principle of local ownership has proven difficult to both define and operationalise With contributions by leading practitioners both insiders and outsiders Local Ownership and Security Sector Reform subjects the broader issue of local ownership to critical scrutiny furthers the debate on what local ownership is and why it matters and explores how ownership issues have played out in the context of specific SSR case studies Small Change, Big Deal Jennifer Kavanagh,2012-06-29 As we consider the plight of our

consumer driven economy it is easy to forget that money is about relationship between individuals and between communities In our current financial mess it is worth reminding ourselves of community based alternatives and to look closely at microcredit a model of peer lending to enable people to move out of poverty From Bangladesh from South Africa from Ghana and from the East End of London we are given a worm s eye view of small scale work of personal transformation and the building of community Small and local is still beautiful and has much to teach us **Saving Can-Do** Philip K.

Howard,2025-09-23 Frustration with government is widespread but neither party has a vision for making things work sensibly In Saving Can Do Philip K Howard shows how to revive our freedom to roll up our sleeves and act like Americans again All societies periodically undergo a major shift in the social order America is at one of those moments of change but neither political party is offering a vision for overhaul President Trump s approach to government is to swing a wrecking ball at the status quo But how will Washington work better the day after DOGE Democrats are in denial waiting their turn to run a bloated government that Americans increasingly loathe In this brief bold book Philip K Howard the civic philosopher who advises leaders of both sides offers a dramatically simpler governing vision Replace red tape with responsibility Let Americans use their judgment Let other Americans hold them accountable for their results and their values In Saving Can Do best selling author Philip K Howard unlocks the quandary of populist resentment and also of broken government Nothing works as it should because red tape has strangled common sense Of course people don t get along we re not allowed to be ourselves The geniuses in the 1960s tried to create a government better than people Just follow the rules Or prove that your

judgment about someone is fair But how do you prove who is selfish or doesn't try hard Bureaucracy makes people go brain dead so focused on mindless compliance that they can't solve the problem before them America is flailing in legal quicksand The solution is a new governing framework that allows Americans to roll up their sleeves and take responsibility We must scrap the red tape state What's required is a multi-year effort to replace these massive failed bureaucracies with simpler codes that are activated by people using their judgment The idea is not radical but traditional it's the operating philosophy of the Constitution As America approaches the 250th anniversary of the revolution it's time to reclaim the magic of America's unique can-do culture

**Technological Choices for Sustainability** Subhas K. Sikdar, Peter Glavic, Ravi Jain, 2004-04-08

This book offers a critical evaluation of current scientific work on defining the issue of sustainability and on measuring progress towards a sustainable state It aims to provide a common understanding of how progress towards sustainability can be achieved by optimising technological development environmental impact and socio-economic factors A further objective is to identify the major trends in methodologies that assist progress towards sustainability

**A Good Death?** Simon Woods, 2016-03-16 This interdisciplinary collection presents valuable discourse and reflection on the nature of a good death Bringing together a leading judge and other legal scholars philosophers social scientists practitioners and parents who present varying accounts of a good death the chapters draw from personal experience as well as policy practice and academic analysis Covering themes such as patients' rights to determine their own good death considering their best interests when communication becomes difficult and the role and responsibilities of health professionals the book outlines how ethical healthcare might be achieved when dealing with assisted suicide by organizations and how end-of-life services in general might be improved It will be of interest to students and academics working the area of medical law and ethics as well as health professionals and policy makers

**Sit on Our Hands, or Stand on Our Feet?** Roger Philip Abbott, 2013-01-07

The aim of Sit on Our Hands or Stand on Our Feet is not to present a theology that explains disasters In fact there is no such theology Nor is this work primarily for those who are responded to it is not part of the theological grab bag that Christian responders carry with them to use for the benefit of casualties It is more a part of the Christian's engaged practical theological apprenticeship prior to and during a response This book represents the role of the practical theologian who

empowers the church community's legitimation and contribution in disaster response and who encourages individual Christians whose calling into particularly relevant professions whose natural skills and or professional training could find them placed in a major incident responding status paid or voluntary doing their work as unto the Lord It is a serious must read for any Christians who have hearts heavy with compassion but who are not sure what to do or why when disaster strikes
