Questioning Misfortune The Pragmatics Of Uncertainty In Eastern Uganda:

Questioning Misfortune Susan Reynolds Whyte, 1997 Some of the most interesting ethnographies of experience are concerned to highlight the indeterminate nature of life *Questioning Misfortune* is very much within this tradition Based on a long term study of adversity and its social causes in Bunyole eastern Uganda it considers the way in which people deal with uncertainties of life such as sickness suffering marital problems failure and death Divination may identify causes of misfortune ranging from ancestors and spirits to sorcerers Sufferers and their families will then try out a variety of remedial measures including pharmaceuticals sorcery antidotes and sacrifices But remedies often fail and doubt and uncertainty persist Even the commercialisation of biomedicine and the peril of AIDS can be understood in terms of a pragmatics of uncertainty

Questioning Misfortune Susan Reynolds Whyte, 1998-01-08 This study of adversity and its social causes in rural Uganda considers how people deal with life s uncertainties sickness suffering marital problems failure and death Divination may identify causes of misfortune ranging from ancestors and spirits to sorcerers Sufferers and their families will then try out a variety of remedial measures including pharmaceuticals sorcery substances and sacrifices But remedies often fail and doubt and uncertainty persist The peril of AIDS can also be understood in terms of the existing pattern of uncertainty

Questioning Misfortune Susan Reynolds Whyte, 1997 **Lifeworlds in Crisis** Andrea Behrends, 2024 Based on two decades of fieldwork an anthropologist s revealing exploration of conflict displacement and cooperation at the margins of the state **Fragile Futures** Helle Samuelson, 2024-02-02 Caring for small children and the family in Burkina Faso is hard work Although the health infrastructure in Burkina Faso is weak and many citizens feel neglected by the state *Fragile Futures* shows that the state continues to play an important role in people s engagements and hopes for a better future Based on more than twenty years of research engagement with Burkina Faso it is an ethnography of how rural citizens address ambiguities of sickness and care and try to secure a decent future for themselves and their families *An Anthropology of Biomedicine* Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09 In this fully revised and updated second edition of *An Anthropology of Biomedicine* authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and

award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health

Regulating Romance Shanti Parikh,2016-04-11 Drawing on ten years of ethnographic research two hundred fifty interviews and over three hundred youth love letters author Shanti Parikh uses lively vignettes to provide a rare window into young people s heterosexual desires and practices in Uganda In chapters entitled Unbreak my heart I miss you like a desert missing rain and You re just playing with my head she invites readers into the world of secret longings disappointments and anxieties of young Ugandans as they grapple with everyday difficulties while creatively imagining romantic futures and possibilities Parikh also examines the unintended consequences of Uganda s aggressive HIV campaigns that thrust sexuality and anxieties about it into the public sphere In a context of economic precarity and generational tension that constantly complicates young people s notions of consumption based romance communities experience the dilemmas of protecting and policing young people from reputational and health dangers of sexual activity They arrested me for loving a school girl is the title of a chapter on controlling delinquent daughters and punishing defiant boyfriends for attempting to undermine patriarchal authority by asserting their adolescent romantic agency Sex education programs struggle between risk and pleasure amidst morally charged debates among international donors and community elders transforming the youthful female body into a platform for public critique and concern The many sides of this research constitute an eloquently executed critical anthropology of intervention

Multi-sited Ethnography Simon Coleman,Pauline Von Hellermann,2011 This collection of essays emerged out of intense conversations on multi sited ethnography prompted by a workshop held at the University of Sussex that brought together researchers from different institutional backgrounds and affiliations in Europe the United States and Africa including George Marcus himself the person most associated with the term and the method These researchers were brought together not only to discuss the shifting meaning of the concept in anthropology but also to see how it has influenced actual research projects that have spanned the world The volume that has resulted is not meant to be read as a program but as an

extended provocation an argument that multi sidedness can be good not only to think but also to act both with and through Arguably this creation of a dynamic shifting perspective is not so different from anthropology itself a discipline dependent on the cultivation of aesthetic embodied and intellectual sensibilities in relation to the world at large

The Body in Balance Peregrine Horden, Elisabeth Hsu, 2013-08-01 Focusing on practice more than theory this collection offers new perspectives for studying the so called humoral medical traditions as they have flourished around the globe during the last 2 000 years Exploring notions of balance in medical cultures across Eurasia Africa and the Americas from antiquity to the present the volume revisits harmony and holism as main characteristics of

those traditions It foregrounds a dynamic notion of balance and asks how balance is defined or conceptualized by whom for whom and in what circumstances Balance need not connote egalitarianism or equilibrium Rather it alludes to morals of self care exercised in place of excessiveness and indulgences after long periods of a life in dearth As the moral becomes visceral the question arises what constitutes the visceral in a body that is in constant flux and flow How far and in what ways are there fundamental properties or constituents in those bodies

Wasted Wombs Erica van der Sijpt, 2018-03-27 Central to this book are Gbibil women s experiences with different reproductive interruptions miscarriages stillbirths child deaths induced abortions and infertility Rather than consider these events as inherently dissimilar as women do in Western countries the Gbibil women of eastern Cameroon see them all as instances of wasted wombs that leave their reproductive trajectories hanging in the balance The women must navigate this uncertainty while negotiating their social positions aspirations for the future and the current workings of their bodies Providing an intimate look into these processes Wasted Wombs shows how Gbibil women constantly shift their interpretations of when a pregnancy starts what it contains and what is lost in case of a reproductive interruption in contrast to Western conceptions of fertility and loss Depending on the context and on their life aspirations be it marriage and motherhood or an educational trajectory and employment or profitable sexual affairs with so called big fish women negotiate and manipulate the meanings and effects of reproductive interruptions Paradoxically they often do so while portraying themselves as powerless Wasted Wombs carefully analyzes such tactics in relation to the various social predicaments that emerge around reproductive interruptions as well as the capricious workings of women s physical bodies

When People Come First João Biehl, Adriana Petryna, 2013-07-07 A people centered approach to global health When People Come First critically assesses the expanding field of global health It brings together an international and interdisciplinary group of scholars to address the medical social political and economic dimensions of the global health enterprise through vivid case studies and bold conceptual work The book demonstrates the crucial role of ethnography as an empirical lantern in global health arguing for a more comprehensive people centered approach Topics include the limits of technological quick fixes in disease control the moral economy of global health science the unexpected effects of massive treatment rollouts in resource poor contexts and how right to health activism coalesces with the increased influence of the pharmaceutical industry on health care The contributors explore the altered landscapes left behind after programs scale up break down or move on We learn that disease is really never just one thing technology delivery does not equate with care and biology and technology interact in ways we cannot always predict The most effective solutions may well be found in people themselves who consistently exceed the projections of experts and the medical scientific political and humanitarian frameworks in which they are cast When People Come First sets a new research agenda in global health and social theory and challenges us to rethink the relationships between care rights health and economic futures

Marriage Matters Lotte Meinert, Julaina A. Obika, Nanna Schneidermann, 2025-07-21 Statistics show steep declines in formal partnerships in Uganda Yet marriage commitment love and relationships still matter profoundly to individuals family generations friends and wider society What does it mean to be married or not married in contemporary Uganda Marriage Matters engages with new and classic anthropological theory gender studies marriage relatedness and temporality Through rich empirical cases the book examines how partnership kinship child filiation and friendship are changing in Uganda as are ideas about love and commitment and in doing so contributes to the burgeoning scholarship on marriage and partnership structures in anthropology and beyond This volume presents collaborative ethnographies that brings together the voices of scholars from Uganda and Europe to discuss how Ugandan realities are changing and how anthropology has changed as well Geographically the volume covers Northern Uganda affected by long years of civil conflict and relatively peaceful Eastern Uganda that nevertheless shares many similar social and economic conditions with Northern Uganda These two different contexts provide a special opportunity to consider the dynamics between marriage violence love commitment economics and politics

An Anthropological Approach to mHealth Charlotte Hawkins, Patrick Awondo, Daniel Miller, 2024-10-28 This book proposes a radically different anthropological approach to the development and dissemination of mobile health mHealth a rapidly growing sector in healthcare An Anthropological Approach to mHealth is based on ten 16 month ethnographies in settings across Asia Africa Europe and Latin America that showed how conventional health apps may be irrelevant particularly for older people Instead the studies found that many people use their mobile and smartphones for health purposes to a surprising extent They take

the communicative apps they have become comfortable with such as LINE WeChat and WhatsApp and are highly creative in turning them into their own health apps These are the practices from which this book seeks to learn in what we call a smart from below approach This body of research also provided many additional insights including the consequences of googling for health information the role of the smartphone in specific settings such as an oncology clinic in Chile or tele psychotherapy in Uganda and the lessons learnt during Covid 19 around the problems in self tracking Overall the authors show how an anthropological approach situated in the observation of everyday life can be the foundation for an alternative but highly promising perspective on the future of mHealth
