

Gathering Evidence To Answer Key Questions

- “We need to consider the results of the test within the context of its own curriculum and students by gathering evidence to answer key questions:
 - How is writing represented in the text?
 - Does it elicit a sample that adequately represents the students’ skills and abilities?
 - Once the evidence is gathered from the investigation, it must be evaluated to determine if it is an adequate test”

From Evidence to Outcomes in Child Welfare Aron Shlonsky, Rami Benbenishty, 2013-11-04 The information age is upon us and with it a new era of human services has emerged The terms Evidence Based evidence informed best practice and effective have become ubiquitous in scholarly and professional publications government documents funding applications and training institutions across the world Yet despite this avalanche of words there is substantial disagreement with respect to the definition of evidence and how it should be used to improve the lives of children and youth This book builds on the burgeoning evidence informed practice movement in social welfare that evolved from evidence based medicine some twenty years ago Key insights from an internationally recognized group of scholars representing several child welfare systems promotes a nuanced understanding of evidence in all its forms makes a strong case for understanding the role of context in generating interpreting and employing evidence and provides guidance for integrating evidence and context in the provision of child welfare services The book begins with an introduction to evidence informed practice and a broad overview of the different types of evidence that can be useful in guiding difficult decisions under uncertain conditions This is followed by a decision making framework that incorporates the use of evidence within the context of a complex child protection system Next empirically supported programs and treatments are evaluated with respect to their transportability across contexts with sometimes surprising results Two revolutionary approaches to the

delivery of effective services common factors and common elements are then introduced and followed by a treatise on the importance of implementation in child welfare settings Embracing different types of evidence used for different questions the role of randomized controlled trials epidemiology administrative and survey data are then explored Finally the context of service provision within an agency is explored through an overview of the structure function and culture of human services organizations the role of universities in training staff and conducting relevant practice and policy research and an applied example involving a partnership between a major university and a large child welfare agency
