

CASINO GAMES

ROULETTE

WINNING STRATEGIES

- If available, then play the European style tables that only have single 0
- Play the most money bets if the casino offers surrender
- Be careful about where you place your chips; putting them on the line is a different bet than in the center
- Although outside bets pay less, they do win more frequently than others
- Split your bets instead of playing straight up numbers
- Betting on any of the sets of 12 is a good bet, and even better if you bet on 2 sets and cover 24 numbers
- Do not follow the strategy of doubling each bet after a loss in an attempt to recoup your losses
- Never play the five number bet (5), as it gives the worst odds for its payout
- Since the roulette wheel is not numbered consecutively like the board, try to cover different parts of the board
- Look for trends that defy mathematical probability, as they are rare but not unheard of, especially with outside
- Betting on the 0 and 00 (either singly or together) to cover your other bets is about as useful as insurance in blackjack
- Bet corner bets and cross bet between them

HOW TO PLAY

- Money (or regular casino chips) are exchanged for unique colored chips of any single bet amount when the table limits and are good only at that table
- Player can continue to make bets while the wheel spins until the croupier calls no more bets
- On an inside bet, the player can bet straight up (A) or split between two (V), three (H), four (S), five (C) or six numbers (X)
- Besides the table minimum, there may be a minimum spread
- On outside bets, player can bet on a column (30), a square (12), Red or Black (2), Odd or Even (2), and either first or last 18 numbers (12)
- If ball falls into the 0 or 00 slot, then some casinos offer a surrender on even money bets
- To bet on more than one number, you are required to straddle your chip on the line between the numbers

TERMINOLOGY

Banked bet	Most popular bet in roulette; covers the 0, 00, and 2
Croupier	The roulette dealer
Inside bet	Any bet made inside the numbered grid on the table
Outside bet	Any bet made outside the numbered grid on the table
Straight Up bet	Betting on a single number
Surrender	Player's wager is split between the player and the casino on even money bets only

SLOTS

GENERAL RULES

- There are many different types of Slot Machines, each with different jackpots and payout rates
- In most cases, you can play more than one coin at a time
- However, paying less means that you did not play the maximum number of coins allowed, then you may win less than, or none, of the jackpot (depends on the machine)
- It must be noted that the average payout for a slot machine is defined as that slot machine's average, which is usually calculated over the span of a year
- Even though you got \$1.00 in a slot machine with a 98% return rate, you cannot expect to always get back at least 98¢
- It is also important to remember that anything you win over a certain amount at the slot (approximately \$1200 in U.S.) is taxable; varies by jurisdiction
- This is not the case with other casino games, as it is very difficult to keep track of what you originally brought before playing and what you won when you cash out
- With slots, big jackpots are not paid out by the machine; they are paid by the slot attendant
- When this happens, you are required to fill out a tax form and sign it
- If you are not a U.S. citizen, then the taxes are simply withheld by the casino and you are paid the remainder; some withholding taxes are recoverable

WINNING STRATEGIES

- The best time to play the slots is in the early hours of the morning, as most machines will have been played heavily the night before; it is also easier to get a good machine
- Each machine is set at a certain payout percentage, with some being higher than others; watch for these machines, or ask other players or slot attendants to point one out
- In many cases, machines with a high payout percentage are placed near doors or in areas of high visibility to entice
- Pay attention to what the machine pays off and, if available, when it last paid off
- Do not be fooled by the graphics used by the machine (for example, redac signs, pathetic signs) as they all play and pay the same way
- Playing a machine for a longer period of time does not necessarily increase your odds of winning
- A machine can pay off two jackpots in a row or go for days without paying
- In general, the more the machine costs to play, the better the odds of winning their odds are a lot worse than the \$1.00 and \$3.00 machines
- However, in order to play these machines, you will need a lot of money to start slots, and risk to two-coin maximum slots (unless they are progressive)
- Although they pay off in higher amounts, try to avoid three-coin maximum slots, as they will allow you to play more often for the same amount of money, providing you with more chances at the jackpot
- For video games, do not throw away a winning hand while trying to improve the hand (unless you are one card away from the top jackpot hand)
