South Africa: Time Running Out Policy toward (Southern Africa). : Study commission (U.S), 1981 **Integrated Reporting and Audit Quality** Chiara Demartini, Sara Trucco, 2017-04-13 This book analyzes the relationship between integrated reporting and audit quality within the European context presenting empirical evidence and drawing on a broad review of the available literature in order to evaluate the ability of integrated reporting to enhance audit risk assessment Dedicated sections first elucidate the concepts of integrated reporting and audit quality The main integrated reporting frameworks are compared the role of integrated reporting within a firm s disclosure is examined and all aspects of audit risk are discussed The key question of the impacts of integrated reporting on the components of audit risk is then addressed in detail with reference to empirical findings their practical implications and their limitations The concluding section explores the future of corporate reporting and the development of the next integrated reporting framework and summarizes the insights that the analysis in the book offers into the relationship between integrated reporting and audit quality in the European setting **South Africa's 1940s** Saul Dubow, Alan Jeeves, 2005 The 1940s was a turbulent period in the history of South Africa It opened with parliament s bitterly contested decision to enter the war was rocked by political turmoil and

ended with a bang as well as a whimper as the National party captured political power in 1948

South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N. Tempelhoff, 2018-12-01 Geologists, physicists and ecologists currently promote the idea of a post Holocene epoch the Anthropocene. As a result of constant innovation and modernisation in the fields of engineering, natural science, management studies and environmental studies, there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere, from the smallest pool of water to the earth's atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater and recycled wastewater, as well as special attention being given to capturing and preserving rainwater, bear evidence of a timely response to climate change, population growth and rapid development in many water stressed regions of the world. The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008, a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa, notable for increasing levels of aridity and more erratic rainfall patterns. This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation. The focus is on the Water-Energy-Food nexus, a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water, energy and food as resources.

The Integrated Reporting Paradigm Teresa Izzo, 2024-06-14 Integrated reporting (IR) has emerged as an accounting change initiative and has rapidly gathered worldwide attention. Great expectations are placed in IR becoming the ultimate tool to secure valuable strategy and business model of disclosure. Although often attributed to the sustainability domain, this topic deserves recognition within a broader discourse on the transformative nature of corporate reporting. Surely, IR represents a theme of great controversy, struggling to find strong theoretical roots as well as a more effective acknowledgment at a practical level. Given these premises, this book provides an in-depth review of the field, enhancing the IR conceptualization through a multi-level perspective of analysis. To this end, it explores the historical background of contemporary integrated reporting practices, illustrating the strengths and weaknesses of the prevailing approaches. The book also analyses the theories that have been used to interpret the IR rationale and explain its wide spread adoption among organisations. Lastly, it discusses and evaluates the state and the extent of the academic debate, identifying interesting future research paths.
