Climate change in Africa: a guidebook for journalists Shanahan, Mike, Shubert, Willie, Scherer, Cameron, Corcoran, Teresa, 2013-12-31

Rethinking Climate Change Research Pernille Almlund, 2016-04-08 The problems and debates surrounding climate change possess closely intertwined social and scientific aspects This book highlights the importance of researching climate change through a multi disciplinary approach namely through cultural studies communication studies and clean technology

studies These three dimensions taken together have the ability to constitute a positive agenda for climate change science in its broader understanding To cope with the climate change challenge not only do we need new energy efficient technologies other ways of living and new ways to communicate but we especially need new ways to start thinking about climate change across disciplines and backgrounds We need to begin thinking across engineering cultural science and communication in order to create innovative solutions as well as to generate optimistic and progressive narratives about the future

Accentuating these softer scientific disciplines their overlaps and the positive discourses they can create this book provides some more profoundly researched themes pertaining to climate change and by that strengthening the analytical as well as the integrative approaches toward the fundamental questions at stake *Research Handbook on Communicating Climate Change* David C. Holmes, Lucy M. Richardson, 2020-12-25 Drawing together key frameworks and disciplines that illuminate the importance of communication around climate change this Research Handbook offers a vital knowledge base to address the urgency of conveying climate issues to a variety of audiences **Climate Action Report**, 1997 *Biological Environmental Science* William V Dashek, 2019-04-29 Biological Environmental Science is an introductory textbook for undergraduate students who desire a one semester course or alternatively a springboard course for advanced environmental offerings This book features timely issues such as global warming air ground and water pollutions population growth species extinction and environmental poli U.S. Climate Action Report - 2002, Third National Communication of the United States of America, Etc., May 2002, 2002 **The Role of Language in the Climate Change Debate** Kjersti Flottum, 2017-03-03 This volume takes a distinctive look at the climate change debate already widely studied across a number of disciplines by exploring the myriad linguistic and discursive perspectives and approaches at play in the climate change debate as represented in a variety of genres The book focuses on key linguistic themes including linguistic polyphony lexical choices metaphors narration and framing and uses examples from diverse forms of media including scientific documents policy reports op eds and blogs to shed light on how information and knowledge on climate change can be represented disseminated and interpreted and in turn how they can inform further discussion and debate Featuring contributions from a global team of researchers and drawing on a broad array of linguistic approaches this collection offers an extensive overview of the role of language in the climate change debate for graduate students researchers and scholars in applied linguistics environmental communication discourse analysis political science climatology and media studies **Routledge Handbook of Media, Conflict and Security** Piers Robinson, Philip Seib, Romy Frohlich, 2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies The academic sub field of media and conflict has developed and expanded greatly over the past two decades Operating across a diverse range of academic disciplines academics are studying the impact the media has on governments pursuing war responses to humanitarian crises and violent political struggles and the role of the media as a facilitator of and a threat to both peace building and conflict prevention This

handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies The handbook is arranged into five parts Theory and Principles Media the State and War Media and Human Security Media and Policymaking within the Security State New Issues in Security and Conflict and Future Directions For scholars of security studies this handbook will provide a key point of reference for state of the art scholarship concerning the media security nexus for scholars of communication and media studies the handbook will provide a comprehensive mapping of the media conflict field *Environmental Risks and the Media* Barbara Adam, Stuart Allan, Cynthia Carter, 2013-01-11

Environmental Risks and the Media explores the ways in which environmental risks threats and hazards are represented transformed and contested by the media At a time when popular conceptions of the environment as a stable natural world with which humanity interferes are being increasingly contested the medias methods of encouraging audiences to think about environmental risks from the BSE or mad cow crisis to global climate change are becoming more and more controversial Examining large scale disasters as well as everyday hazards the contributors consider the tensions between entertainment and information in media coverage of the environment How do the media frame expert counter expert and lay public definitions of environmental risk What role do environmental pressure groups like Greenpeace or eco warriors and green guerrillas play in shaping what gets covered and how Does the media emphasis on spectacular events at the expense of issue sensitive reporting exacerbate the public tendency to overestimate sudden and violent risks and underestimate chronic long term ones **Media Research on Climate Change** Ulrika Olausson, Peter Berglez, 2018-04-19

Research on media coverage of climate change as a particular subfield of environmental communication research has proliferated over the past decade This book sets out to consider what conclusions can be drawn in light of the existing body of work what lessons can be learnt what are the challenges to be met and what are the directions to be taken in order to further develop media research on climate change The mixture of articles in this volume serve well to illustrate the range of empirical theoretical and methodological approaches subsumed under the broad heading of media studies on climate change Some contributions focus on the past how the subfield has developed and what we can learn from that and some look toward the future Either way all the authors share the ambition to suggest important avenues of research be they centered on media context applicability of results or theoretical advancement As such they make a valuable contribution to identifying important directions for future research on the role of the media in communicating climate change This book was previously published as a special issue of *Environmental Communication* How Climate Change Comes to Matter Candis Callison, 2014-02-15

A rich ethnographic account describing the processes by which climate change comes to matter collectively and individually and how vernacular explanations of climate change reflect diverse ways of knowing and caring about the world Climate Action Report , The Adaptive Challenge of Climate Change Karen L. O'Brien, Elin Selboe, 2015-08-07 This book presents a new perspective on climate change for researchers and policymakers in the environmental social sciences and humanities
