Representation From Above Peter Esaiasson, Sören Holmberg, 2017-07-05 This book uses Sweden as a test case to analyze how elected representatives function in a representative democracy It is argued that the best summary characterization of Swedish democracy is an elitist system run from above The book also claims that the picture of European representative democracy as dominated by parties must be qualified An individualist representational model is relevant to the European setting as well

Representation From Above Peter Esaiasson, Sören Holmberg, 2017-07-05 This book uses Sweden as a test case to analyze how parliament and elected representatives function in a representative democracy Despite the status of Scandinavian countries as perhaps the world's most egalitarian societies the book argues that the best summary characterization of Swedish representative democracy is an elitist system run from above The book also argues that an individualist representational model is relevant to the Swedish setting and most likely to other settings as well

Representative democracy is not just party based democracy not even in a country with strong and disciplined parties The book takes a broad approach to the study of political representation It integrates into a single analytical framework concepts and theories from neighbouring traditions such as legislative behaviour opinion formation and interest organizations The study is based on a comprehensive set of data including three surveys of the Members of the Swedish Parliament corresponding voter surveys and content analysis of mass media and parliamentary records

significant lacuna by focusing on the thousands of ordinary candidates that participate in national elections It examines who the candidates are in terms of their socio demographic background and political career patterns how they were selected by their parties what their policy preference are and whether these are congruent to those held by their voters who they seek to represent and how they intend to do so once elected and what their visions are on representative democracy and party government Last but not least it investigates how they go about reaching out to their potential voters during the election campaign This book will be of key interest to scholars and students of political parties and party politics political elites political communication political participation elections theories of democracy and representation legislative studies voting behaviour and more broadly to European politics as well as to political and policy professionals throughout Europe

**Legislature by Lot** John Gastil, Erik Olin Wright, 2019-04-09 Democracy means rule by the people but in practice even the most robust democracies delegate most rule making to a political class The gap between the public and its representatives might seem unbridgeable in the modern world but Legislature by Lot examines an inspiring solution a legislature chosen through sortition the random selection of lay citizens It s a concept that has come to the attention of democratic reformers across the globe Proposals for such bodies are being debated in Australia Belgium Iceland the United Kingdom and many other countries Sortition promises to reduce corruption and create a truly representative legislature in one fell swoop In Legislature by Lot John Gastil and Erik Olin Wright make the case for pairing a sortition body with an elected chamber within a bicameral legislature Gastil is a leading deliberative democracy scholar and Wright a distinguished sociologist and editor of the Real Utopias series of which this is a part In this volume they bring together critics and advocates of sortition who have studied ancient Athens deliberative polling political theory social movements and civic innovation Without obscuring its limitations the contributors offer a wide variety of ideas for how to implement sortition and examine its potential for reshaping modern politics Legislature by Lot includes sixteen essays that respond to Gastil and Wright s detailed proposal Essays comparing sortition to contemporary reforms see it as a dramatic extension of deliberative minipublics which gather random samples of citizens to weigh public policy dilemmas without being empowered to enact legislation Another set of essays explores the democratic principles underlying sortition and elections and considers for example how a sortition body holds itself accountable to a public that did not elect it The third set of essays considers alternative paths to democratic reform which limit the powers of a sortition chamber or more quickly establish a pure sortition body With contributions by Arash Abizadeh Tom Arnold Terrill Bouricius Deven Burks Lyn Carson Dimitri Courant Donatella della Porta David M Farrell Andrea Felicetti James S Fishkin Brett Hennig Vincent Jacquet Rapha l Kies

**Representing Women?** Mercedes Mateo Diaz, 2024-10-31 This work discusses questions on political participation representation and legitimacy in the European Union national parliaments Three major empirical questions structure the book What affects women's presence in parliaments Does the number of women in parliament have an effect And are women in parliament representing women Empirical evidences show that institutional reforms need a minimal environment in terms of socio economic development so as to prove effective As opposed to the critical mass theory claiming that a few representatives cannot have an impact on the political outcomes here the empirical evidences suggest that smaller groups can also influence the different components of the legislative process The last part turns to the fundamental question of whether a parliament that is descriptively representative i.e. in which the parliamentarians share certain characteristics with the voters also is a substantively descriptive parliament i.e. in which the parliamentarians mirror the voters' opinions Evidence suggests that the electoral system's level of proportionality influences the extent to which assemblies socially and ideologically mirror their population The book ends by advancing new hypotheses and setting up guidelines for future research
