Representations Of Lie Groups Kyoto Hiroshima 1986 Advanced Studies In Pure And Mathematics Volume 14: Representations of Lie Groups, Kyoto, Hiroshima, 1986 K. Okamoto,T. Oshima,2014-07-22 Representations of Lie Groups Kyoto Hiroshima 1986 contains the proceedings of a symposium on Analysis on Homogeneous Spaces and Representations of Lie Groups held on September 1 6 1986 in Japan The symposium provided a forum for discussing Lie groups and covered topics ranging from geometric constructions of representations to the irreducibility of discrete series representations for semisimple symmetric spaces A classification theory of prehomogeneous vector spaces is also described Comprised of 22 chapters this volume first considers the characteristic varieties of certain modules over the enveloping algebra of a semisimple Lie algebra such as highest weight modules and primitive quotients The reader is then introduced to multiplicity one theorems for generalized Gelfand Graev representations of semisimple Lie groups and Whittaker models for the discrete series Subsequent chapters focus on Lie algebra cohomology and holomorphic continuation of generalized Jacquet integrals the generalized Geroch conjecture algebraic structures on virtual characters of a semisimple Lie group and fundamental groups of semisimple symmetric spaces The book concludes with an analysis of the boundedness of certain unitarizable Harish Chandra modules This monograph will appeal to students specialists and researchers in the field of pure mathematics **Representation Theory and Analysis on Homogeneous Spaces** Semen Grigor'evich Gindikin,1994 A combination of new results and surveys of recent work on representation theory and the harmonic analysis of real and p adic groups Among the topics are nilpotent homogeneous spaces multiplicity formulas for induced representations and new methods for constructing unitary representations of real reductive groups The 12 papers are from a conference at Rutgers University February 1993 No index Annotation copyright by Book News Inc Portland OR **The Penrose Transform and Analytic Cohomology in Representation Theory** Michael G. Eastwood,1993 This book contains refereed papers presented at the AMS IMS SIAM Summer Research Conference on the Penrose Transform and Analytic Cohomology in Representation Theory held in the summer of 1992 at Mount Holyoke College The conference brought together some of the top experts in representation theory and differential geometry One of the issues explored at the conference was the fact that various integral transforms from representation theory complex integral geometry and mathematical physics appear to be instances of the same general construction which is sometimes called the Penrose transform There is considerable scope for further research in this area and this book would serve as an excellent introduction **The Mathematical Legacy of Harish-Chandra** Robert S. Doran,2000 Harish Chandra was a mathematician of great power vision and remarkable ingenuity His profound contributions to the representation theory of Lie groups harmonic analysis and related areas left researchers a rich legacy that continues today This book presents the proceedings of an AMS Special Session entitled Representation Theory and Noncommutative Harmonic Analysis A Special Session Honoring the Memory of Harish Chandra which marked 75 years since his birth and 15 years since his untimely death at age 60 Contributions to the volume were

Barker,P. Sally,2012-12-06 A conference on Harmonic Analysis on Reductive Groups was held at Bowdoin College in Brunswick Maine from July 31 to August 11 1989 The stated goal of the conference was to explore recent advances in harmonic analysis on both real and p adic groups It was the first conference since the AMS Summer Sym posium on Harmonic Analysis on Homogeneous Spaces held at Williamstown Massachusetts in 1972 to cover local harmonic analysis on reductive groups in such detail and to such an extent While the Williamstown conference was longer three weeks and somewhat broader nilpotent groups solvable groups as well as semisimple and reductive groups the structure and timeliness of the two meetings was remarkably similar The program of the Bowdoin Conference consisted of two parts First there were six major lecture series each consisting of several talks addressing those topics in harmonic analysis on real and p adic groups which were the focus of intensive research during the previous decade These lectures began at an introductory level and advanced to the current state of research Sec ond there was a series of single lectures in which the speakers presented an overview of their latest research   **Conformal Field Theory and Solvable Lattice Models** M Jimbo,2012-12-02 Advanced Studies in Pure Mathematics 16 Conformal Field Theory and Solvable Lattice Models contains nine papers based on the symposium Conformal field theory and solvable lattice models held at RIMS Kyoto May 1986 These papers cover the following active areas in mathematical physics conformal field theory solvable lattice models affine and Virasoro algebra and KP equations The volume begins with an analysis of 1 and 2 point correlation functions of the Gibbs measure of random matrices This is followed by separate chapters on solvable solid on solid SOS models lectures on conformal field theory the construction of Fermion variables for the 3D Ising Model and vertex operator construction of null fields singular vertex operators based on the oscillator representation of conformal and superconformal algebras with central charge extention Subsequent chapters deal with Hecke algebra representations of braid groups and classical Yang Baxter equations the relationship between the conformal field theories and the soliton equations KdV MKdV and Sine Gordon etc at both quantum and classical levels and a supersymmetric extension of the Kadomtsev Petviashvili hierarchy   Geometric and Harmonic Analysis on Homogeneous Spaces Ali Baklouti,Takaaki Nomura,2019-08-31 This book presents a number of important contributions focusing on harmonic analysis and

representation theory of Lie groups All were originally presented at the 5th Tunisian Japanese conference Geometric and Harmonic Analysis on Homogeneous Spaces and Applications which was held at Mahdia in Tunisia from 17 to 21 December 2017 and was dedicated to the memory of the brilliant Tunisian mathematician Majdi Ben Halima The peer reviewed contributions selected for publication have been modified and are without exception of a standard equivalent to that in leading mathematical periodicals Highlighting the close links between group representation theory and harmonic analysis on homogeneous spaces and numerous mathematical areas such as number theory algebraic geometry differential geometry operator algebra partial differential equations and mathematical physics the book is intended for researchers and students working in the area of commutative and non commutative harmonic analysis as well as group representations

Automorphic Forms and Geometry of Arithmetic Varieties K. Hashimoto,Y. Knapp,David A. Vogan Jr.,2016-06-02 This book offers a systematic treatment the first in book form of the development and use of cohomological induction to construct unitary representations George Mackey introduced induction in 1950 as a real analysis construction for passing from a unitary representation of a closed subgroup of a locally compact group to a unitary representation of the whole group Later a parallel construction using complex analysis and its associated co homology theories grew up as a result of work by Borel Weil Harish Chandra Bott Langlands Kostant and Schmid Cohomological induction introduced by Zuckerman is an algebraic analog that is technically more manageable than the complex analysis construction and leads to a large repertory of irreducible unitary representations of reductive Lie groups The book which is accessible to students beyond the first year of graduate school will interest mathematicians and physicists who want to learn about and take advantage of the algebraic side of the representation theory of Lie groups Cohomological Induction and Unitary Representations develops the necessary background in representation theory and includes an introductory chapter of motivation a thorough treatment of the translation principle and four appendices on algebra and analysis   Integrable Systems in Quantum Field Theory and Statistical Mechanics M.
