Women's Sexual and Reproductive Health Karen J. Leong, Kathy Nakagawa, Aggie J. Yellow Horse, 2024-07-22. Women's Sexual and Reproductive Health addresses the sexual and reproductive health needs of Asian American, Native Hawaiian, and Pacific Islander (AANHPI) women from a structural and intersectional perspective. AANHPI women in the United States have often been grouped together due to their race and gender, regardless of their specific communities, diverse histories with the United States, and different educational and economic opportunities. The authors argue that AANHPI women are misunderstood by health professionals and researchers and foregrounds AANHPI women's experiences to demonstrate the challenges they face when seeking health care. The book

highlights the diversity of AANHPI women by drawing on their first hand experiences and argues for the disaggregation of health data on AANHPI women Women s Sexual and Reproductive Health is of value to college classrooms that address racial disparities health disparities and women s experiences as well as for health care professionals Bioethics: Latin American Perspectives ,2022-01-04 This book presents a unique view of the current state of development of bioethics in Latin America Twelve Latin American thinkers who share a primary interest in bioethics address a vast range of questions including autonomy rights justice and the role of culture and religion in bioethics These studies contribute to an understanding of Latin American thought and they make possible a transcultural dialogue on bioethical issues **Program of Cooperation for**

Maternal Health and American Cultural Values Barbara A. Anderson,Lisa R. Roberts,2023-03-20 This book uniquely explores American cultural values as a factor in maternal health It looks beyond the social determinants of health as primarily contributing to the escalating maternal morbidity and mortality in the United States The United States is an outlier with poor maternal health outcomes and high morbidity mortality in comparison to other high resource and many mid level resource nations While the social determinants of health identify social and environmental conditions affecting maternal health they do not answer the broader underlying question of why many American women in a high resource environment experience poor maternal health outcomes Frequent near misses high levels of severe childbearing related morbidity and high maternal mortality are comparable to those of lower resource nations This book includes contributions from recognized
