F-105 Thunderchief in Detail & Scale Bert Kinzey, 2024-12-21. The Republic F 105 Thunderchief is one of the most recognizable combat aircraft of the 20th century. Designed as a supersonic fighter bomber with the ability to deliver both nuclear and conventional weapons its lasting legacy was that of a conventional fighter bomber with a significant combat history in Southeast Asia and in the early years of the Wild Weasel suppression of enemy air defenses mission. In 1982 Detail Scale published its first book on the Republic F 105 Thunderchief. This new publication on the Thunderchief is not simply an expanded version of the original book with more color. The text and captions have been completely rewritten. All photographs that were originally taken in color are reproduced in color in this new book. The coverage in the form of text, photographs and illustrations has been significantly expanded. Following the Introduction a Thunderchief History chapter briefly summarizes the development and service of the F 105 including its use in the war in Southeast Asia where it played a major role as a fighter bomber while also performing specialized missions. The next chapter takes a closer look at each variant of the Thunderchief starting with the very first YF 105As and concluding with the specialized F 105F and F 105G Wild Weasels. The next chapter is called Arming the Thunderchief. The most common internal and external stores employed by the F 105 are covered in this chapter with no less than forty photographs and illustrations. From the two different Vulcan cannon arrangements to tactical nuclear weapons from conventional bombs to napalm and CBU's and from rockets to guided missiles these weapons are covered in photographs and detailed illustrations. The major focus of each title in the Detail Scale Series is devoted to covering the physical details of the aircraft. The Thunderchief Details chapter includes nine different sections that provide an in depth look at the F 105 with scores of detailed photographs and illustrations covering the cockpit canopy and windscreen fuselage internal bomb bay wings pylons fuel tanks ECM pods landing gear tail and engine details. What makes this chapter even more valuable is that more than ninety percent of the photographs were taken of Thunderchiefs while they were still in operational service. Additionally more than ninety percent are in color. As always the final chapter in a Detail Scale Series book is the Modelers Section. Several new scale model kits have been released in the forty one years since Detail Scale published its first book on the Thunderchief and all of these along with the older ones are covered. As explained in the reviews some of the older kits are better than the more recent ones when it comes to accuracy. F 105 Thunderchief in Detail Scale is 193 pages and has 260 photographs 230 in color plus color artwork. The Thunderchief Details chapter alone has 149 photographs and illustrations.

Davies, 2019-07-25 The F 105D Thunderchief was originally designed as a low altitude nuclear strike aircraft but the outbreak of the Vietnam War led to it being used instead as the USAF s primary conventional striker against the exceptionally well defended targets in North Vietnam and Laos F 105 crews conducted long distance missions from bases in Thailand refuelling in flight several times and carrying heavy external bombloads The MiG 17 was the lightweight highly manoeuvrable

defending fighter it encountered most often in 1965-68 during Operation Rolling Thunder. A development of the MiG-15 which shocked UN forces during the Korean War, its emphasis was on simplicity and ease of maintenance in potentially primitive conditions. Fully illustrated with stunning artwork, this book shows how these two aircraft totally different in design and purpose fought in a series of duels that cost both sides dearly. **F-105 Thunderchief Units of the Vietnam War** Peter E. Davies, 2012-11-20. The combat history of the F-105 Thunderchief units during the Vietnam War, detailing the strengths and weaknesses of the aircraft and the difficulties it faced during many months of dangerous combat. Facing the most formidably concentrated air defences in history, pilots of the F-105D flew against North Vietnamese targets day after day during the 43 months of Operation Rolling Thunder. Despite its limited maneuverability and the lack of self-sealing fuel tanks which made it susceptible to combat damage, the bombers shot down 27 MiG fighters in 1966-67. This book illustrates the importance of the Thunderchief in the Rolling Thunder campaign, including the pioneering suppression of enemy air defences (SEAD) methods developed by the F-105 Wild Weasel crews. Discussing the aircraft's strengths and weaknesses and using first-hand narratives, Peter Davies captures the essence of flying the Thud against heavy defences and describes the development of wartime tactics and the heroic accomplishments of a selection of its aircrew. *F-105 Thunderchief in Action* Ken Neubeck, Don Greer, 2002.
